should live if it has intelligent care, but we do know that without a sufficient supply of vitalizing, life-giving oxygen it wastes away, and dies just as a plant droops and dies for lack of water.

Disease is merely the lack of some constituent element of the blood that is necessary to maintain life. Oxygen is the life-giver, the bloodbuilder - the germ-destroyer. But pumping oxygen into the lungs is not enough. The blood must assimilate it. Iron attracts oxygen just as the magnet attracts steeltherefore, if your blond is abundantly applied with organic iron it attracts the exceen from the air in the lungs and the blood is vitalized with life giving oxygen-
