Short Term Notes

Chicago Grain and Provisions.

Chicago, Feb. 9.—Drastic declines took place in the corn market today, largely owing to notice that realized cars unloaded at grain elevators here could not be used for shipments from Chicago to the east. The close was neevous, 3% to 4% c net lower, with May, 31,25% to \$1,25% and July, \$1,22% to \$1,25% and july, \$1,25% to \$1,25% and july, and provisions 27c to 80c.

Notwithstanding that receipts of corn today were much smaller than had been looked for, the market was decidedly weak from the outset. General selling and no evidence of buying power formed the rule. Aside from difficulties of the financial situation the dominating influence was the virtual cutting off of any eastern outlet for Chicago shippers of feed stuffs. Cars on eastern roads were wanted for wheat and there were orders that equipment from western roads must be returned to the country for new supplies of corn. Under such circumstances breaks in corn prices were not checked until gossip became prevalent that farmers were not selling on the decline.

Oats sympathized with the downturns, in corn, but were steadled somewhat by good domestic demand.

Provisions reflected the weakness of grain despite the fact that hog prices were relatively firm. Chicago Grain and Provisions.
