New York. Feb. 11.—The market for ceffee futures was easier during today's trading owing to lower Rio cables and renewed liquidation. This included seiling by recent buyers while there was also some seiling believed to be for European account and after opening 2 to 20 points lower, active months sold about 25 to 36 points below last night's closing figures. May sold off to 13.70 or within 10 points of the lowest level reached on the break of last week and 90 points below the best price touched on the rally of Saturday. The market seemed to attract covering at this level for over the holiday tomorrow and railles were encouraged by reports that Santos shippers were not meeting the prices named by resellers.

Chicago Grain and Provisions.

Chicago Feb. 11.—Rapid upturns in the value of corn' today followed a broad commission house demand based largely on belief that supplies here would remain light even though cars were furnished in plenty. The close was unsettled, 2½c to 4½c net higher, with May, \$1.20 % to \$1.31 and July, \$1.28 to \$1.28½. Oats gained 1½ @1½c to 1½ @1½c and prosvisions loe to 80c.

Regardless of an evident teadency on the part of farmers to hold back grain, the corn market weakened during the first part of the day with a majority of dealers inclined to regard a railroad strike as more bearish than buillsh. Besides, gossip was current that there would be no modification of orders to give whoat the preference in grain shipments eastward from Chicago. Later, however, the attention of the trade veered to the out-right failure of receipts to grow in volume and to indications that the failure more, advices at hand described producers as extremely intagonistic because of recent big set backs in values.

Oats, like corn, jumped upward after showing temporary weakness. Domestic demand was reported keen, and country offerings meager. Provisions were ruled by the action of grain.
