MISTAKEN LABOR POLICY.

Opposition to the pending railroad law because it guarantees a return to capital invested s shortsighted. The policy may not be the wisest, but the expedient has been adopted as a measure of justice to the owners of the soads. In effect, it makes sure that each dollar of railroad capital shall have its wages, not at the current rate of pay, but at a figure that does not include either extravagance or starvation. When private concerns are borrowing at 8 per cent and selling stock on a basis of 6 to 7 per cent, if does not seem unreasonable that capital employed in the most important of our great national industries should be assured a return of 51% per cent.

The first big problem for the owners of the roads is to secure money whereby to pay for improvements, extensions and betterments; to restore the wornout rails and box cars, to renew engines and other equipment, and to carry on the business. This money will not be forthcoming unless it is made plain to the investor that some return is certain. A dollar can not be made to work, any more than a man, in fact not so easily. And if capital strikes against the railroads, the result will be as serious as if the brotherhoods should quit.

To assert that "this act makes the public and labor subservient to capital" is begging the question, the cheapest sort of pettifoggery. All the capital employed in the transportation industry is owned by the public, of which the great railroad brotherhoods and all other labor, organized and unorganized, are part. Immense sums of money so engaged are obtained through various fiduciary institutions, savings banks, insurance companies and the like, in which the savings of the workers are placed to earn the wages of money, which is the interest. Money must work, and it will go where conditions are best for its employment. The pending railroad measure only seeks to provide for a time that capital employed in the industry has fair wages, the same as the men.

A million-dollar prairie fire is reported from Argentina. Such a thing was possible once in Labor's leaders, having espoused the cause of government ownership, may be expected to press their case with all zeal, but they are making a mistake when they resort to such At the rate filings are being made the superficial methods as are employed in the primary ticket will be full, no matter how the present instance.

Robert Edwin Peary.

Another of America's truly great men has gone on, leaving behind him a record of accomplishment that will endure. The simple statement that Robert Edwin Peary, who has just died, was first to reach the North pole, to stand at the very top of the world, does not suggest the tremendous effort and sacrifice involved. Yet it does contain the truth that will keep the name of Peary alive while men inhabit the globe and study its composition.

The controversy springing from the false claims made by Dr. Frederick A. Cook threw a shadow over Peary's achievement, but he emerged from that well and thoroughly vindicated, although the enthusiasm that would have attended his announcement ordinarily was diminished by the bitterness of the contest. Those who championed Peary have been up-, lifted and those who accepted the Cook claims have been confounded by later events. Stefansson, the most persistent and painstaking of all Arctic explore's, although not seeking the pole itself, has corroborated many details and corrected some of the Peary observations, while quietly announcing certain facts that prove Cook to have made many untrue statements, some of them mistakes he could not have made had he been anywhere near the locations he undertook to describe. Peary's achievement, spectacular as it was, did not contain the elements of tragedy that distinguished the rival dash of Ahmundsen and Scott for the South pole. In fact, nothing in all the history of such ventures quite compares with the story of Robert Falcon Scott and his companions. In the quiet life of his closing years, Admiral Peary had all the satisfaction of knowing that his work was recognized, his ontributions to science appraised as well as they might be under existing conditions, and with full honor and credit he went along to join a glorious company of pioneers and adventurers in "that undiscovered country from whose bourne no traveler returns."

Labor Should Heed the Warning

From the Baltimore American.

. Whatever else may happen, labor seems de-termined that it shall lose none of the ground gained through the war emergency of the nation. If this position shall be successfully maintained, prices will remain crystallized at the present level. That is, until something more undamental than the edicts of labor unions shall become operative. Labor is dependent upon one thing-employment. When labor ceases to be an asset to society it becomes a burden. Capital, also, comes to be unemployed and unproductive, but it has resources and labor does not; it can afford to weather an era of depression and take its losses; labor must either be employed or suffer poignantly. In the pres-ence of an industrial crisis all the finely spun theories and hard-built-up prerogatives of labor organizations fall to the ground. A school of desperation holding to a doctrine of despair has sprung-up in these latter days that goes under the general name of bolshevism. This might be turned to, but, unfortunately, the workers of America have come to be capitalists; to own their own homes; to own bonds and bank accounts and to have provided investments of one or another kind. There are enough so fixed to make impossible the adoption of bolshevism in any case, for that is set for the direct destruc-tion of wages as commonly understood in this business. tion of wages as commonly understood in this business. country. The threat of bolshevism could hold 2. Are you naturally rude or abno terrors for the United States. Here it could rupt? Courtesy is the first requisite

stand only for group-outlawry, to be treated ex- of the hotel man. The standing joke actly like any other kind of outlawry. The labor organizations, therefore, would do a joke because courtesy is the thing well to do some clear thinking before they seek to control the political parties by their interest vote. Such a position for interest only is thoroughly un-American. It does not fit into the American system of party politics. It could be justified only in the expectation of the creation of a labor party such as appears to be upon the brink of taking over the administration of England out of the hands of the coalition government. Had the United States established coalition government at the time of going into the war, a course that had strong espousal, the foundation would have been laid for a labor party as in England. As matters stand, there s no foundation for anything of the sort. The American skilled worker has no taste for the segregation of himself and fellows into a labor camp. He looks upon his daily toil as a means of subsistence and his connection with a union as protective of the same. But he is far from willing to have the men who govern his union control his entire destinies. Nor is he to be led into the delusion that his organization is the thing of supreme interest to the country. He is first of all an American and not a union man

Office, Bee Building, 17th and Farnam.

The American Legion knows where it is at, and wants to know where the members of congress stand on the bonus question. The boys are right.

A new angle is given the hold-up game when baudits break into a union hall and loot the members gathered there. Prayer meetings may be next on the list.

It is just a coincidence, that the attorney who is trying to get overtime pay for 2,000,000 transport workers is named Goldenhorn. He is trying to blow one.

Petitions are out to place the name of William Jennings Bryan on the ballot as delegateat-large from Nebraska to San Francisco, which means that a perfectly lovely row is brewing in the democratic camp.

"Jim" Dahlman can tell the railroad detectives some of the ancient as well as the modern ways of doing business with desperadoes. As sheriff of a cowboy community he learned a lot of things that are not set down in books.

A resident of Platte county has just found out that citizenship in the United States is worth something. He sought exemption as an alien while the war was on, and now learns that his condition is permanent. He can never be a voter. A land that is worth living in is worth fighting for.

> Direct Primary and Townleyism

In North Dakota an Independent Voters' association has been formed to fight the social-ism of Mr. Townley's famous Nonpartisan league. The association held a state convention the other day. It is going to call a state mass convention of all voters, democratic or republican, opposed to Townleyism, and in thate body candidates will be nominated. In Minne-sota, dangerously infected by Townleyism, a Sound Government league has been formed to unite all voters averse to Townleyism and com-bat the elaborate system of radical propagandbat the elaborate system of radical propagand-ism of the Non, artisan league. It is noticeable that the Minneapolis Tribune, while heartily approving the aims of the Sound Government league, finds in the direct primary the source of the success of sinister and revolutionary organizations in Minnesota?

The mere fact that we have the Sound Gov-ernment league is proof that the unpartisan partical situation in this state is not prepared be fitical situation in this state is not prepared to and not capable of resisting the progress of allacious, mischievous, un-American sentiment and activity. . . . In our elections in this thate there are only candidates to care about, and "things"—issues—have no opportunity to get themselves before the public for considera-tion. . . . Disorganization and demorali-zation within the old parties, due to the flirect primary, have been taken advantage of by mis-chievous and dangerous movements seeking to hievous and dangerous movements seeking to becupy the field with the compact organization the national parties have abandoned. result was inevitable. The consequences

Thus that great "reform" and only genuine ran of "the will of the people" has paralyzed two great parties of Minnesota and worked e advantage of socialists and miscellaneous als, and to fight these a volunteer state ation is resorted to.—New York Times

Hitchcock and Nebraska.

The newspapers of the state, under the duty of publishing the facts as they find them, report much whetting of knives among Nebraska democrats, preparatory to a finish fight over the instructions to be given the Nebraska delegation to the democratic national convention.

While some republicans may consider any ruction in the democratic camp grist for their mill, The Bee prefers to view the incipient disturbance with a broader spirit. The Bee is a republican newspaper, of independent tendencies. It believes that the national interests at this time are best to be served by the election of a republican president. But it is also a Nebraska newspaper, with faith in Nebraska and with pride in Nebraska's sons. It feels that that pride is legitimate and something which might well imbue all Nebraskans, eyen Nebraska democrats. Consequently, if The Bee were disposed to imagine itself a democrat for a moment, it could not join in any campaign to keep from Senator Gilbert M. Hitchcock the vote of Nebraska's delegates in the democratic convention.

Senator Hitchcock was born in Nebraska, rew to manhood in this state and-however politically misguided he may have been-has/ come to a position of power and prominence in his party through his ability and personal charm.) The attainment of such a position is of interest to Nebraskans as Nebraskans, is something which can be said of no other democrat new a candidate for the party's presidential nomination and it should count for something with Nebraska democrats.

Holland also has some "interpretative reservations" in accepting the League of Nations covenant. Looks like Uncle Sam is not peculiar in wanting to know just where he is

going. Texas is inclined to lineup back of Joseph Weldon Bailey, which indicates that "Jim" Slayden may have a come-back yet. And,

The Earl of Reading is understood to have declined the vacant post of ambassador at Washington. The place is not so attractive as

law that keeps wages from going down as in one that keeps them going up!

that of 1893, unless all shall work together. The basis for this condition lies in the matter that is wholly out of the control of labor to effect by its self-interest program, namely, the float-ing debt of \$4,000,000,000 in treasury certificates. Unless co-operation prevents the crisis and panic shall come, where will be the house of cards of the labor organizations? These have ards of the labor organizations? These have ower only in time of prosperity. They are su-ine in time of adversity. Let them isolate memselves from the sympathies of their fellows in the great body of consumers, and precipitate the service of the bellows in the great body of consumers, and precipitate the service of the bellows in the great body of consumers, and precipitate the service of the bellows in the great body of consumers in the sympathy thereby a panic, and see how much sympathy thereby a banned the service of the bellow of the bellow the bellow of the bellows the bellow of the bellows the bellow of the bellow of the bellow of the bellow the bellow of the bellow of the bellow of the bellow the bellow of the bellow of the bellow of the bellow the bellow of the bellow of the bellow of the bellow of the bellow the bellow of the bel power only in time of prosperity. They are supine in time of adversity. Let them isolate themselves from the sympathies of their fellows the great body of consumers, and precipitate they will receive when they are in the midst of the debris of business for which they will be held responsible. It is fine talk, this nonsense about a labor vote, cast for labor, but, unfortunately for the short-sighted labor leaders, it does not accord either with the American basic political conditions or conditions for economic welfare ...

We do not know what the present year shall bring to us, whether it shall be filled with sweet fulfillments and those things that color life in bright, cheerful tones, or whether it shall bring only disappointments and gray clouds. For many of us the next 12 months will be a mixture of joy and grief, brightness and sadness, of disappointments and realiza-tions. But it takes just such combinations to make us understand something of the signifi- astute make us understand something of the signifi-cance of life. We learn to appreciate our bless-ings when they take their flight more than at any other time, and the knowledge that the brilliancy of life's sun must be tempered by illiancy of life's sun must be tempered by litically, economically, as well shadows helps us to make the most of the sunny socially, being a man who loves, as days. We cannot expect to experience only Lincoln did, to mingle with the the brightness of life during the year that is just beginning to exist; the gray days must come and the clouds gather, sometimes with and charity for all." Let me suggest little warning, but such conditions are not typi-cal of any one life. There is always a little sunshine just behind the clouds to be shared by all alike, notwithstanding the fact that for a ile at least it does not seem to be evenly divided. The longer we live the harder our problems are likely to become, and the anxieties of one year run over into other years and often create new conditions to be taken into consid-eration and disposed of-Charleston News and Courier.
