

THE GETTING-WELL STAGE OF GRIP
Most Dangerous Period—
How to Gain Strength.

The long pull in getting over the grip demands that all the organs of the body be kept in their best working form, not only to drive out the poison left by the grip germ, but that the patient shall regain strength as soon as possible to avoid further attacks resulting from the poisons in the system, paralyzing the greater part of the tissues of the body and the organs which they compose.

Forced nutrition is a means toward good health after the grip—as it is a means of preventing the entrance of the grip germ to the system. Father John's Medicine builds up the body because it is all pure nourishment and free from opium, morphine, chloroform or other poisonous drugs. Father John's Medicine has had 60 years' success for colds and throat troubles, coughs and sore throats, and as a tonic and body builder.

PLANS LAID FOR OIL AND GAS PIPE LINES TO OMAHA

Chamber of Commerce Development Committee Proposes to Consider Project Immediately.

Oil and natural gas pipe lines will be constructed within the next few months between Omaha and the Wyoming oil fields if the plans of Edwin T. Swobe, member of the Chamber of Commerce, work out.

Mr. Swobe announced yesterday that he had completed a feasible plan to finance such a project and that he would take immediate action to put his plan into operation.

He held a long conference with John L. McCague, chairman of the oil development committee of the Chamber of Commerce, Tuesday. At the close of the conference Mr. McCague announced that he would call a special meeting of the oil development committee early next week to consider the project.

"The release of more than 6,000,000 acres of oil land through the signing of the oil leasing bill has brought the matter of constructing an oil pipe line to Omaha to a point where Omaha business interests can no longer ignore its necessity," said Mr. McCague. "I believe that Mr. Swobe's plan is largely practical, although it is somewhat unique, and the oil development committee of the chamber will give it close consideration. You can rest assured that immediate action will be taken to construct the much needed pipe line."

On the advice of Mr. McCague Mr. Swobe would not reveal the principles of his plan. He admitted,

however, that it involved the forming of a great corporation with operation centered in Omaha.

"The cost of constructing the line will be between \$7,000,000 and \$10,000,000," Mr. Swobe said. "The natural gravity from the Wyoming fields toward Omaha would make it possible to operate the line with only two or three pumping stations, thus minimizing the expense of operation."

His plan provides for the construction of a natural gas, as well as an oil pipe line. This would furnish Omaha with cheap fuel and prevent any fuel shortage such as the one last winter. The innovation of natural gas would also bring scores of industries to Omaha and the population of the city should be doubled in 10 years."

Twenty-three Boy Scouts Are Given Badges of Merit

Twenty-three Boy Scouts were awarded merit badges for efficiency in special lines of work and three others were promoted to first class scouts at a meeting of the Boy Scout court of honor Monday evening in the city hall. Nine scout masters also received merit badges for special training.

The scouts who received badges were Anton Zezulak, James Van Valin, Marcus Higgins, Ralph Church, Irving Sherwood, Fred Hill, Ralph Heffinger, Gage Hartman, Gene Caldwell, Fred Hill, Edward Vacek, Richard Scholer, Marcus Higgins, John Behmke, William Lee, Louis Smetana, Charles E. Dox, Leonard DeLong, Hawthorne Arey, Frederick Van Valin, Hampden, Judson, Clifford Elliston and Roland Howes.

Women Score Point

The influence of women again prevailed yesterday in the city council chamber, where a petition from residents of the neighborhood of Third and Walnut streets for a street light was granted without debate. The women, in a signed petition, stated that the light at Second and Walnut streets does not serve any useful purpose at Third street.

FOOD THIEVES AND WINDOW SMASHERS LOOT STORES HERE

Use Trunk to Carry Away Sugar, Eggs and Candy; Seven Robberies Reported.

When Morris Green, 2309 North Twenty-seventh street, returned home at 8:45 Monday night he found a lone burglar prowling about his residence. The burglar escaped by the rear door, as Mr. Green entered the house, he told police, but left his loot behind.

Burglars threw a brick through the front window of the Megeath Stationery Co., 1421 Farnam street, crawled through the hole in the glass, and ransacked the counters and cash register, getting \$53 in cash from the drawer.

Gowns and dresses valued at \$200 were reported stolen from the trunk in the apartments of Miss Esther Patterson and Mrs. Albert Hauck, 2117 Webster street, Monday night.

Food thieves used a trunk to haul four 100-pound sacks of sugar, 23 dozen eggs, and a quantity of gum and candy from the Basket Store No. 27 at Sixteenth and Leavenworth streets, Monday. Entrance was gained to the store by way of the skylight.

C. V. Taylor, 706 South Seventeenth avenue, reported to police that upon his return from a three-months visit to California, he found his home stripped of all linens and towels. He told the authorities that he had sublet his apartment to Mrs. Ida Williams, during his absence, but that he could not locate her upon his return.

If each man, woman and child in Great Britain had to pay an equal share of their country's war debt, the personal liability would be \$786 each.

DIVORCE GIVEN THOMAS E. HUNT ON CRUELTY PLEA

"Another Man" Mentioned, But Name Not Revealed—Divorcee Declines to Discuss Decree.

Thomas E. Hunt, owner of the Omaha Paper Stock company, Eighth and Marcy streets, and other interests, was granted a divorce from Gettrude T. Hunt by Judge Leslie in divorce court Tuesday morning.

Mrs. Hunt at her home, 2598 Kan-

sas avenue, refused to say anything about the divorce. The petition was filed in divorce court February 14. She did not appear in court to make any defense.

Mr. Hunt alleged "extreme cruelty," and told the judge that his wife "has become so interested in another man as to destroy our home life." He said she has become cold and indifferent toward him. The name of the "other man" was not revealed.

Mrs. Hunt is a handsome woman of the brunette type. The Hunts have three young children. Custody of the two girls was given to Mr. Hunt and of the boy to Mrs. Hunt, with the privilege to each to visit the children in the custody of the other.

An agreement between Mr. and Mrs. Hunt was attached to the decree. In this Mr. Hunt agrees to give his wife \$1,000 and to pay her \$25 a month as long as the boy remains in her custody.

The Hunts were married November 5, 1910, and seemed to be very happy until the other man appeared.

Woman Is Accused of Teaching Small Child To Aid In Shoplifting

A clever game of alleged shoplifting from counters of department stores in which a 5-year-old girl figured prominently, was uncovered Monday with the arrest of Mrs. Josie Marro, 1416 South Sixth street.

A charge of petty larceny was placed against Mrs. Marro, whom Special Detective Larry Finn of Brandeis' stores arrested with her small daughter, Rosa. Mrs. Marro is said to have had four children's dresses and 10 yards of silk in her possession when arrested.

According to the detective, the prisoner was seen to lay aside certain pieces of goods from counters while the child, following her, took possession of them. Mrs. Marro was released on bonds which she forfeited in Central police court today.

HEARTBURN
or heaviness after meals are most annoying manifestations of acid-dyspepsia.

SPRAGUE TIRES

More Fabric—More Rubber
More Miles
What More Do You Want?

Like the century-old missions, SPRAGUE TIRES are built to endure. Into the SPRAGUE there goes the best fabric that money can buy. And not a little of this fabric: SPRAGUES have one more ply of fabric than ANY other, two more plies than most others.

With these extra plies of better fabric there is used more rubber. The SPRAGUE tread is 88 per cent, and the sidewalls, cushion and friction are 94 per cent pure gum. There are no weak parts.

So well built, and of such splendid materials, are these tires that we expect every one to far exceed its

7,500-Mile Guarantee

Endurance Lies Within the Plies
This shows the difference in number of plies of fabric used by various tire builders:

Size	Ply in Sprague Tires	Ply in Other Tires
3 1/2-inch	6	4-5
4-inch	7	5-6
4 1/2-inch	8	6
5-inch	8	7

SPRAGUE TIRES are oversize. The SPRAGUE 30x3 1/2, for instance, is as big as the 31x4 of other makes.

More rubber, more fabric, built on oversize cores—such construction means more tire, more resiliency and ease of riding and more miles for the money.

Sprague Tubes

SPRAGUE TUBES are proper companions for SPRAGUE TIRES. They are laminated—built layer on layer of 94 per cent pure gum, and nearly twice as heavy as other tubes.

—and every SPRAGUE ply is 17 1/4-oz. fabric, the strongest known.

You'll find SPRAGUES just to your liking, in appearance, in size and in performance. And when you finally replace them with new SPRAGUES, you'll find they've proved the most economical tires you ever used.

Visit the Sprague Mill
You are invited to visit any time during Auto Show Week and see Sprague Double-Extra-Ply Tires and Sprague Tubes in the making.
Take any northbound car on Sixteenth street, get off at Eighteenth and turning, only nine blocks from center of the retail district.
