10,000 PEOPLE KILLED IN AUTO ACCIDENTS, 1919

With 2,000,000 More Cars In Country This Year, Death List Will Be Correspondingly Higher.

Chicago Tribune—Omaha Bee Leased Wire. Chicago, March 5.—Last year this country had 7,000,000 automobiles and 10,000 deaths from automobile accidents.

In Chicago 420 persons were killed during 1919 by automobile accidents. In Cleveland the list was 136, in St. Louis, 97; in New York, 677.

Briefly it is apparent that the automobile has become the most deadly machine in the United States. Census mortality reports show that one-half the number of deaths are caused by automobiles.

Even more alarming than these statistics is the fact that in almost every case a comparison, year by year, of the number of automobiles in use and the number of automobile deaths, indicates that the deaths are increasing in almost exact mathematical ratio with the increase in the number of automobiles.

A FEW FACTS

To buy or not to buy is a question confronting many of us today. Whether as the year advances values of merchandise will be higher or lower we do not know.

What we DO KNOW is that desirable goods are scarce and very slow of delivery. We do know that there will be no decline in value during the Spring season. We have backed that knowledge by securing the delivery of early bought goods. We don't advise you to speculate. We don't advise you to hoard. We do advise you to buy what you are going to NEED this season NOW. Only so can we be sure of serving you well.
