We Have Struck Oil

Our Well No. Non the Geo. C. Eselin Tract in Montgomery County, Kansas, came in February 24th at 150 barrels per day. Pleased to state this is the best well brought in from Montgomery County, Kansas.

This oil sells to the Pipe Line Co. for \$3.50 per bbl., plus 5% bonus for its high-grade quality. We have started on Well No. 2 and expect it in this month. Contract holders in this tract call for 60% of the production of all well drilled on this tract and

capacity as soon as possible. Dividends to our tract purchasers will be paid with cash received from oil produced and sold. Dividend No. 1 will be paid within two weeks after receipt of money from the Pipe Line Co. and monthly thereafter. All holders of contracts not fullly paid up should do so before March 20, 1920, so they may partic-

we will develop this tract, which is proven, to its full

ipate in the first dividend. Pleased to state that the sales of our tracts have been unusually heavy and only a limited number will be sold at the present \$25.00 price, and may be taken

Why Oil Leases are the Best Investment

Millionaires are betting millions there is oil in the Panhandle. YOU may safely gamble a few hundred or a few thousand in leases located near or adjacent to their investment. Their expenditures pay for the proving of your holdings—see the point? Therefore, you are invited to become neighbors to millionaire leaseholders in the Panhandle. The sharpest men in the business don't risk their funds on drilling. They know from ex-

The sharpest men in the business don't risk their bunds on drilling. They know from experience that more BIG MONEY is made on leases. They make their cash cover protection in as many tracts as they are able to secure. They recognize three fundamental principles:

First: Sometime throughout the life of a lease held between drilling contracts the approach of development will make that lease command a profit. Second: This enhanced value is the inevitable result of the millions expended on nearby tests. Third: THE LAW OF AVERAGES in the Mid-Continent Oil Fields is an absolute guarantee that one or more of ten test wells will come in good. A purchase of ten or more leases is a demonstration of the greatest measure of good busi-

ness. With the chance to lose altogether elimin ated, through the law of averages, the TEN-LEASE combination possess possibilities for a limitless gain in wealth. This is a sound and sensible plan, worthy of the respect and attention of the business man. Anyone who will put this principle into practice may contentedly sit back in his easy chair and wait. It's only a question of how soon and how much you will make.

Buy a combination in connection with your business associates; if they fail to see the op-

portunity, buy what you are able to handle within your means and for YOURSELF.

Through this method you are playing the biggest game in the business world in the BIG MAN'S WAY. For further particulars call M. M. KIRSCH, Douglas 2787
