An Oil Lease May Make You a Fortune

Great fortunes are made in oil. The basis of oil wealth is the oil lease. Investors who are putting money into oil leases have the finest kind of an opportunity of acquiring great wealth.

In the marvelous development of the oil industry, oil leases are attracting the vast capital which seeks activity along development lines in connection with the production of more crude petroleum. Oil leases bought from a reputable company that is managed along skillful lines, located just ahead of development, may make you independent for life.

Owners of oil leases report an unprecedented demand for acreage by persons in states that are Western Texas, located in the very trend of drill

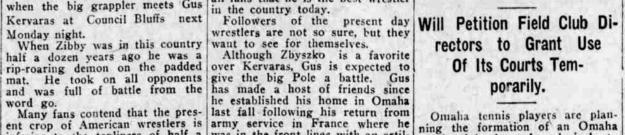

We offer you 40, 80, 160 or more acres in where such big concerns as the Sinclair Co., the Ohio City Gas Co., the Texas Co., the Standard Oil Co. and its subsidiary have acquired holdings in this section. More than 35 wells are now drilling and many more will start in the next 90 days. The big field may underly the tract which we are now selling. Remember that the greatest oil wells gush forth great wealth from what was considered outside territory. Yet, today, hundreds of derricks are in these fields. The undeveloped acreage of yeesterday becomes the gusher of tomorrow. Pluck and action are what have made rich those who had the courage to get in before the oil boom struck the wealthproducing oil. They are the ones now drawing big dividends. Your name is recorded as owner. If you own a lease it is recorded in your name and scouts representing oil companies are constantly looking out for new lands upon which to drill. If you lease is wanted by some operator he will learn from investigation of the county records that you own the lease and through correspondence or by telegraph will endeavor to buy it or possibly make a deal to drill on it, giving you 50 per cent of all oil produced. And this at no expense to you. Hundreds are wildcatting for oil throughout Texas. When new oil fields are discovered, leases anywhere near the new wealth will go sky-high.

Advance Price of Ground Gripper Shoes, April First Are You Throw	wing Your Nor	nous System Or	Toe, and Every Toe In Its Place

By wearing high-heeled or ill-shaped shoes?

Let our Ground Gripper Demonstrator explain and demonstrate why the existence of these facts was first responsible for the creation of Ground Gripper Shoes.

They are the actual shape of the Natural Foot, and they not only give you comfort, they give you efficiency and health.

They do not bind, pinch or distort. They permit every toe to take its natural position so that your feet are just as comfortable when you have your Ground Grippers on as when you are barefooted.

The correct Shoe for men, women and children

The Only "Ground Gripper Store" in Omaha-Do Not Accept Imitations.

far removed from the active oil fields. People north, south, east and west are purchasing oil leases as investments that promise splendid rewards. The wise investor has recalled John D. Rockefeller, the most prominent oil personality, who advises investments in oil leases, ahead of the drill, and John D. Rockefeller ought to know what he is talking about.

Just how many millions of dollars are coming from the rich communities for the purchase of oil leases in the rapidly growing Texas Oil Fields cannot be learned, as no statistics are available. But it is known that the leasing companies are selling thousands of acres of leases every day.

People who are skilled in the oil business have learned that the foundation of great oil fortunes has been laid in the purchase of oil leases at times when the prices of the acreage represented only a few dollars an acre. There are many who recall the leases that sold at Ranger, Burkburnett and other oil districts for as little as \$5.00 an acre. Those same leases reached values that represent enormous figures, hundreds of thousands of dollars having been paid for only a few acres after oil was known to be present on those same leases.

So there can be no surprise to learn that investors are getting into the oil business through the simple and profitable leasing system. Investors know that huge fortunes have been made by small investments in oil leases in the early days before oil gushed forth and blackened the timbers of the big derricks.

After oil is found anyone can then go and buy rich leases if he has a big bank account, but for the small fellow the investment in an oil lease is something so attractive that there is little wonderment expressed at the stampede whch takes place to gobble up a few acres in Western Texas ahead of the drill.

After the drill hits oil the time is too late to buy leases at low prices. That is the reason so many shrewd investors are now purchasing oil leases ahead of the drill, selected in new territory where one or more of the next big oil pools will create a new group of millionaires. Oil investments now are being made along scientific lines. The old gamble has been shoved aside. Leases at low prices are going to create millions in new wealth in the next decade.

COUPON Morris Milder Leasing & Producing Co., 503 Electric Bldg., Omaha, Neb. entlemen: Without obligation on my part, please send me further in-formation relative to your Texas acreage. Name Address City State

When you buy one of these leases you secure the full drill right to drill for gas and oil rights until its expiration.

Remember that a five or ten year lease means that you have five or ten years in which to begin drilling-if you pay your annual rental. If you or anyone else drills on your land before the expiration of your lease and gets oil, you then have the oil and gas rights so long as you continue to produce oil or gas in commercial quantities, and you have the privilege of assigning your lease to anyone at any time you wish.

A one-acre lease has sold as high as \$25,000.00. If operators bring in a well near your lease, there is no telling what sum you could sell your lease for. Nor with the enormous amount of drilling going on in Texas in all counties is there any telling where the next big oil boom will break out. If it is near your lease, or a few miles from it, your fortune is made. Take a fling at fortune. This is your big chance.
