Millions of dollars had been tied up prior to March I in goods which had been sold but had not been moved because of bad weather conditions. Railroads did not have enough cars and these were able to do a maximum amount of work because of the weather. The backed-up goods have been getting to market the last three weeks and it is quite likely that a general movement to liquidate bank loans has progressed. Bankers are exercising a conservative attitude toward new loans and it may be that institutions in agricultural communities will be able this year to get through the season with a lesser demand on New York than in other years.

FORMING

FORMING

We are syndicating four oil leases into 75 units of \$1,000 each. The members will either make a minimum profit of \$15,000 for each \$1,000 invested with an annual income of \$1,000 or more, for a number of years, or they will lose their money.

No one is desired as a member of this syndicate who cannot afford the risk. We believe you have nine chances of winning against one of losing. The people who are furnishing the leases for this syndicate formed a similar syndicate in the early part of 1919. Each member of that syndicate has received better than 200% in dividends and has retained an interest that has increased in value many times.

The minimum investment is \$500. If you can afford the risk, let us lay full particulars before you.
