"Oh, goody, goody!" said Kit and Kat, both at once; and they ran as playing around the kitchen doorstep, while their mother sat on a fast as their wooden shoes would bench by the door peeling some onions for supper. It was not yet supper time, but Vrouw Vedder was always ahead of the clock with the piles. He was stopping to light his

do coats have buttons on the sleeves?

(Copyright, 1920, by Wheeler Syn-dicate, Inc.)

TN the olden days, before handkerchiefs were invented, it was the almost universal custom to wipe one's nose on one's sleeve. Shortly after one of the early French kings had ordered new uniforms made for his guards, he noted that the men were ruining their apparel by

wiping their noses on the silken sleeves of their jackets-a habit which, at that time, was not considered either unsanitary or un-

usual. His majesty therefore ordered that a row of buttons be placed on the sleeves, at a spot directly opposite the one which they now occupy; for he

figured that buttons would put an end to the practice where orders might be overlookged. This touch of unusual tailor-ing was copied by many of the gallants of the court and gradually spread to England and to other countries. When haad-kerchiefs came into vogue the

buttons remained, but were gradually shifted around the sleeve to the position which they now occupy.

"I can carry two," said Kit. "We'll both be good," said Kat. "Very well," said father, at last. "We'll see how you work! And tomorrow morning, if it's fair, I'll see! But you must go to bed early tonight, because you'll have to get up early in the morning, if you go with me! Now, you each take a cab-bage and run along."

Father Vedder went back to his work. Kit and Kat ran to the cabbage pile. Kat took one, and Kit took two-just to show that he could. "When father says 'I'll see,' he always means 'yes,'" Kat said to
