ESTATE OF AGED **ECCENTRIC MAY** TOTAL VAST SUM

Will Reach Thousands.

Seaman, Omaha eccentric, who died teresting facts. six weeks ago, will probably reach into the hundred thousands of dollars instead of the mere \$50,000 to the earth, has, however, only about other way?

"We have found, also, that Mr. Seaman owned a number of farms. This we learn through people writ-

It is believed that Mr. Seaman bought these farms some years ago and that, owing to the great increase in land values, they will add to the estate much larger sums than the already large sums found in cash and securities.

The outlook is ture from the one we know on earth, and all our reasoning and decurities ture from the one we know on earth, and all our reasoning and decurities ture from the one we know on earth, and obeys the rule that it is to fall on the Sunday following ductions from our terrestrial knowledge and experience are inapplicable and we are worse off than ever. The knowledge we have teaches us most the solid earth transmits the significant productions from our terrestrial knowledge and experience are inapplicable and we are worse off than ever. The knowledge we have teaches us most the solid earth transmits the significant productions from our terrestrial knowledge and experience are inapplicable and we are worse off than ever. The knowledge we have teaches us most the solid earth transmits the significant productions from our terrestrial knowledge and experience are inapplicable and we are worse off than ever. The knowledge we have teaches us most the solid earth transmits the significant productions from our terrestrial knowledge and experience are inapplicable and we are worse off than ever. The knowledge we have teaches us most the solid earth transmits the significant productions from our terrestrial knowledge and experience are inapplicable and we are worse off than ever. The knowledge we have teaches us most the first full moon of spring.

The outlook is ture from the one we know on the first full moon of spring. The ductions from our terrestrial knowledge and experience are inapplicable and experience are inapplicable and the first full moon of spring. The first full moon of the fir

But granting even this possibility, it will be a long operation for earth

sun as the earth does. How, then, can anything grow? Of course, we

Going Up in a Balloon.

Newspapers have often stated that while Jupiter, Saturn and Mars are Prof. Todd intended to go up very high in a balloon in order to observe Mars to better advantage. No one be seen from Mars, and if not seen, has vet ascended to the height of 10 miles and ro one will ever go as lars instead of the mere \$50,000 to \$100,000 that as found a cash and securities in his safety deposit tox, and local building and loan associations.

T. H. Weirich, supering dent of the Welfare board, and one of the administrators of the estate, said yesterday that a far-reaching investigation is being made, and new to grow again during the winter.

The weirich is possibility, half the diameter, has a day only 37 minutes longer than ours, and has the very same seasons, although its year is nearly twice as long. Mars has no extensive oceans and seas as the earth has. It is believed that it has very little water at all. It has extensive white polar caps, probably of ice or spow, which melt away in spring and summer, only to grow again during the winter. high as 100 or 1,000, and even if he tigation is being made and new property is being found continually.

"Mr. Seaman had bought tax titles not only in Omaha but in

Coming down from Mars to things purely terrestrial, on the 4th Wireless Signals to Mars.

Some asked to purchase and want a price placed upon farms."

Is it possible to send wireless signals to Mars, the reader will doubtless inquire. The outlook is ture from the one we know on April 25, and obeys the rule that it
