Yet the spring is here. A robin knows it, for he was observed gleaning a grass plot for his breakfast while the tiny snowflakes fell fast about him. Many other signs are present. Elm and maple buds are swelling, the box elders are blooming, a vivid green tinges the lawns, and the irrepressible taraxacum shows signs of taking command again, just as it has in other springs. Soon the frugal housewife will be searching the banks for dandelion and mustard, sour dock and other greens, to piece out the homely menu and provide the succulent dish so world and of the life on it? ## An Apocryphal Tale.

By way of Tokio comes word through what is said to be an official publication of the imperial Japanese government, that King George (God save the king if he cannot produce an alibi) told two of Japan's delegates to the peace conference at a private audience in Buckingham palace that President Wilson was a and love bring us joy. Age and weakness and trifle too keen to control the earth and the fullness thereof, or words to that general effect.

Of course this story is impossible, even though cabled from Tokio. President Wilson's shrinking modesty and all but total self-effacement at Paris were quite too conspicuous to leave room for even such a thought as the Royal George is said to have uttered to his distinguished visitors. The good old chap may have been spoofing the Japs as the golden goblets of champagne were greasing elbows, don't y' know, but as serious conversation the whole story is bally rot-what?

find it not what we sought. Tangled in the web of mortality, dodging death daily, we are oppressed by the knowledge that we are dying, little by little, every day of our lives. Confounded by things we cannot understand, we finally come to know there is no escape from melancholy except by the cultivation of the spiritual side of our natures. Then a new realm opens to us. The everlasting joys of hope, faith and love beckon. Perchance the inspiration of a reasonable religion takes hold upon us. Happy are they whom this faith reaches, for it lightens their hearts, dissipates their anxieties, and satisfies their souls. They are ushered into the promised land flowing with the milk and honey of religious trust in God and a happy life beyond the grave. The ages have brought no substitute for the Rock of Ages.

#### William Hohenzollern a Frenchman?

Some enterprising antiquarians, zealously devoted to getting the former kaiser of Germany before a court of justice, have unearthed some curious information. Delving about the roots of the family tree, they have discovered that the grandmother of Frederick the Great of Prussia was a French woman. She also was grandmother to George II of England. One of the fictions of the tribe of-Hohenzollern is that all of the mingled nationalities involved in the descent of its princes are retained intact. This line of reasoning would make William a Frenchman, and therefore he can be extradited from Holland as such. As well set up that he is an Englishman, for his mother was daughter of Victoria the Good. It is said that at times the former emperor was wont to rail at his English blood, and assert his withered left arm was due to his extraction. We may readily believe, however, that he is not at the moment insisting that he is of anything but purest German blood, and the world ought to be willing to let it go at that.

## Poisoning Croker's Old Age.

"He that hath wife and children hath given hostages to fortune," wrote Bacon. And it frequently occurs that men of wealth who have adult children and marry the second time, lay the foundation for great bitterness of spirit in their declining years.

The case of Richard Croker, for many years grand sachem of Tammany Hall, and as such the most powerful political influence in New York City, is an instance in point. Ten or twelve years ago Mr. Croker married an Indian woman from the Oklahoma Reservation, abandoned politics, and went to Ireland to live. He was happy with his wife, but his relations with his children were strained by the second marriage. Now they have made charges against their step-mother's character before her marriage, and ask that their father be adjudged incompetent to manage his large estate. In retaliation, presumably, Mr. and Mrs. Croker charge the eldest son with gross misconduct in the father's American business affairs.

It is rather late to attack Mrs. Croker's record previous to her marriage, but the world knows no situation that will arouse meaner or more sordid emotions than a family row over a step-mother and an old father's money. The

## Fooling With the Time-Table.

"Daylight saving" did not die when the law was repealed by congress. A lot of folks still are enamored of the plan, and would like to see it revived. In cities where these are in majority, the clock will be set forward an hour, and 6 will become 7 on the dial. In some cities the matter will be sadly confused, for all will not follow the one rule, and it may be both 6 and 7 o'clock at the same time. Nature, however, will go along undisturbed. The sun will wheel through the sky on his well known course, and with only such variation in time as results from the zodiacal progress of our little ball. Factory workmen may be routed out by the toot of the whistle, and start their routine at any arbitrarily determined hour, but the cows and chickens will work as they have; grass will grow and grains will ripen according to the hours of sunlight and darkness, and without any regard for the process of the pointers on a dial. Here is one place where man is unable greatly to improve on "Nature's honest rule."

#### Pop Goes One Weasel.

A press telegram from Washington tells of action of the joint committee of congress to put a stop to war extravagance by the executive branch of the government. It says:

The committee found that the administration was issuing 266 regular publications, millions of copies of which were being sent Some of them were being widely distributed in the interest of the movement to procure acceptance of the league of nations covenant without reservations.

Then follows the welcome news that 108 of these partisan publications have been lopped off, with a saving of \$1,200,000 annually. The democratic party has been making the public pay for its propaganda.

#### First Aid for Throats Aflame.

Four and twenty blackbirds baked in a pie are no longer a fitting sequel to "sing a song of sixpence, a pocket full of rye." A man with such a pocket load in a crystal container properly corked has something more desirable to set before the king than blackbird pie.

The price per hour for the various operations in the manufacture of K-B printing is based on the cost of production taken from our cost records.

We know the cost of every hour we have produced in the various departments for the past five

We decline to gamble as to the time it will take to produce a given piece of printing, for the reason that we have an accurate method of arriving at the exact time when the work is completed, which guarantees the buyer that he will not be overcharged.

This is our square deal method of serving the buyers of printing, and has proven satisfactory to both large and small buyers. It eliminates the oldfashioned barter and trade practice, and gives every customer a strictly square deal.

The K-B System is based on good, sound, practical business principles, which have been in active operation for the past five and one-half years.
