Ceach Candless announced at chapel Monday, that the athletic field will be completed by April 25. Daily practice for the events of the track meet is held on the field. Thirty-five men are in training for the events of the inter-class tournament, an event which will be the first of its kind at Chadron.

The exhibit of millinery and sewing which the classes in household management held last Thursday was a very interesting one. There were clever chart designs of floors and walls of homes, by means of which window draperies, rugs and wall decorations were illustrated, each design being planned in harmony and suitability of materials for the rooms, according to the exposure. The second semester class had on display tailored skirts and woolen materials. The young girls of the training high school exhibited gingham dresses for 8-year-olds. There were layettes for infants made by one of the classes. The advanced class in sewing had studies of costumes, some of them in silhouettes, others in figure charts. The latter showed the entire effect of materials, designs and trimmings.

The banquet room was simply but strikingly paneled in broad bands of cerise and white. Overhead a misty gray celling was formed by festoons of Spanish moss, among which glowed dozens of Japanese lanterns. The table decorations, made by students of the manual training and art departments, consisted of candlesticks and square flower boxes enameled in white and cerise. The flowers were sweet peas.

The excellent four-course menu was prepared and served by the home economics department. Covers were laid for about 200, including the two classes, Col. T. J. Rupture Kills 7,000 Annually

Seven thousand persons each year are laid away—the burial certificate being marked "Rupture." Why? Because the unfortunate ones had neglected themselves or had been merely taking care of the sign (swelling) of the affliction and paying no attention to the cause. What are you doing? Are you neglecting yourself by wearing a truss, appliance, or whatever name you choose to call it? At best, the truss is only a makeshift—a false prop against a collapsing wall—and cannot be expected to act as more than a mere mechanical support. The binding pressure retards blood circulation, thus robbing the weakened muscles of that which they need most—nourishment.

But science has found a way, and every truss sufferer in the land is invited to make a FREE test right in the privacy of their own home. The PLAPAO method is unquestionably the most scientific, logical and successful self-treatment for rupture the world has ever known.

The PLAPAO PAD when adhering closely to the body cannot possibly alip or shift out of place, therefore, cannot chafe or pinch. Soft as velvet—easy to apply—inexpensive. To be used whilst you work and whilst you sleep. No straps, buckles or springs stached.

Learn how to close the hernial opening as nature intended so the rupture CAN'T come down. Send your name today to PLAPAO CO., Block 840, St. Louis, Mo, for FREE trial Plapao and the information necessary.
