The New York Eimes.

New York, April 13 .- Stocks recorded considerable strength among special issues today with an uncertain and heavy tone among the majority of standard shares. News of a much larger outflow of gold to South America than had been expected acted to arouse a conservative attitude among stock market traders toward the money market, and an advance of the call loan rate. from 7 to 12 per cent in the afternoon probably had much to do with the price movement. Official report shows number of brood sows in North Dakota to be 15 per cent less than last year. Number of pure bred sows shows a very substantial gain over last year. Supply of farm labor in the state estimated at 5 per cent less than last year. The wages demanded by farm laborers are so high that numerous farmers cannot finance labor this spring under existing conditions. The result of this situation is already assuming serious proportions and the outlook is that the cultivated acreage in this state will be reduced over 1,000,000 acres this season.

Charges Officials of New York Exchange With Stock Shortage

New York, April 13. — Allan A. Ryan, chairman of the Stutz Motor Car company, resigned from the New York stock exchange and accused members of the board of governors of being short in Stutz stock, trading in which was suspended by the exchange when the price skyrocketed.

A member of a committee of the exchange, according to Ryan, is a partner of a firm short many shares n Stutz and continued to sell Stutz up to the last moment trading was allowed and has as yet failed to

Ryan said threats had been made against him designed to extricate from their valid exchange contracts those who attempted unsuccessfully to depress the market value of his stocks and that he could not retain his self-respect if he remained a member. His letter of resignation, addressed to the board of governors, asked that his seat be sold without delay.

New York Coffee.

New York April 13.—The market for coffee futures recovered part of yesterday's losses during today's trading. The decline of 200 reis reported in the Rio market had evidently been discounted, while Santos futures were higher. The opening was but 2 points higher to 4 points lower, but offerings were smaller after the comparatively heavy selling of yesterday and prices soon firmed up on covering, with May advancing to 14.22c and September to 14.40c, or 13 to 20 points net higher, during the early afternoon.
