

WANTS OMAHA TO GIVE REST OF STATE A CHANCE

George W. France of York Makes Plea for Election of National Committeeman Outside of Omaha.

York, Neb., April 17.—(Special.)—George W. France of York issued a statement today in behalf of the election as republican national committeeman of a man not a resident of Omaha.

Omaha, he said, has held this office 12 years and should be willing to give the rest of the state representation.

Mr. France endorsed Charles McCloud of York. He said:

"R. E. Howell of Omaha has been national committeeman of the republican party for the last eight years, and Victor Rosewater of Omaha was national committeeman for four years before that. In other words, Omaha has had the national committeeman for the last 12 years and Mr. Howell is seeking to be re-elected for four years more."

"These days it seems to be the style for most everybody to profiteer, either in the way of grabbing money or power, without regard to the rights of any one. It seems to me that after Mr. Howell has held this office for eight years, and it has been held in Omaha for the last 12 years, it is about time that the office went to some one out in the state. Give some one else a chance. I for one am going to vote for Charles McCloud of York, to help bring about rotation in office at least once in 12 years. Omaha should not hog this office forever."

Home Destroyed by Fire, Baby Wears Doll's Clothes

Cincinnati, O., April 17.—The children and grandchildren of Virginia Hensley will enjoy hearing her tell about the time when she wore doll clothes.

Little Virginia is one year old. The home occupied by the child and her parents, Mr. and Mrs. Fred Hensley, burned down here a few nights ago. Unable to get their clothing, the mother was forced to grab her scantily-clad daughter and get out of the burning building.

Fifteen-year-old Henry Kordenbrock was attracted by the flames. He lived across the street from the burning residence. Noting the clothesless condition of the babe, he hurried home and returned with some of his sister's doll clothes, which Mrs. Hensley put on little Virginia.

High School and College Girls Will Get Expert Advice on How Best to Choose Jobs

Vocational Guidance Day Booster Campaign Is Planned in Which Clowns, Spooks and Sandwich Board Girls Will Participate.

A huge vocational guidance day booster campaign will be launched Tuesday of the current week by over 400 student club girls of the various high schools. Clowns, spooks and sandwich board girls will be featured in this campaign.

"Choose a job" day for high school and college girls, will be observed at a luncheon and special lecture program in the Y. W. C. A., Saturday. Local high school club girls have secured University of Nebraska authorities and business men to advise them in choosing the most fitting career.

Central high school student club, under direction of Helen Winkelman, will station clowns at the three high school entrances Tuesday at the close of sessions to advertise the value of choosing a vocation early. "Want a Job?" and "Be a Merrie Clown" slogan tags, made and designed by the student club girls, will be distributed as part of the booster campaign.

A special "sandwich board" publicity stunt will be conducted at the High School of Commerce on Tuesday under direction of Marian White, Ellen Mattern and Louise Brown of that school.

Lucille Bliss heads the ouija committee for the vocational guidance publicity program to be carried out at South High school Tuesday of this week. Adeline McCullough and Dolores Patsch will play prominent parts in the spook booster program arranged by the committee.

Miss Blanche Fuller, superintendent of the Methodist hospital, and Miss Esther Warner, head of the home economics department of the University of Nebraska, head a list of prominent speakers to be featured on the vocational guidance day program.

Among others who will give addresses and professional advice are Miss Myrtle Fitz-Roberts, former head of the vocational guidance bureau of the board of education, and L. O. Smith, the "Find-a-Job-to-Suit-You" expert of Omaha.

Youngest First-Class Scout

Topeka, Kan., April 17.—The youngest first-class Boy Scout in Kansas is Tom Woodward of this city. He became a scout on his 12th birthday anniversary, was made a second-class scout one month later and has just been advanced to the first-class rank.

Left to right: Evelyn Johansen, Ruth Wallace, Lillian Browning.

Chicago Thinks New York Is the Most Extravagant

Chicago, April 17.—Is Chicago the most extravagant city in America? Perish the thought! The distinction belongs to New York.

Chicagoans who know said so after reading a report from the federal reserve board at Washington that "the people of the Chicago district are the most extravagant in the country."

"How absurd," said Mrs. John A. Carpenter, a society leader. "Did the board overlook New York, I wonder? Everybody knows that there's more reckless spending in New York than here. Of course, money is being spent throughout the nation on a bigger scale than ever before, but Chicago doesn't take the lead. The women of Chicago are not unjuly extravagant at any rate."

"I do not believe that the people of the middle-west are more extravagant than the people elsewhere," said the head of a large department store. "I cannot agree with this report."

SWIFT DEATH WILL COME IN FUTURE WARS

Chemical Arm Is Arm of Future, According to Professor F. Francis Dean of Bristol University.

By PROF. F. FRANCIS DEAN, Dean of the Faculty of Science, Bristol University, (Written for International News Service).

London, April 17.—Swift and annihilating death, in the form of a fog, will come upon the nation in the next war. The chemical arm is the arm of the future.

We shall have a state of affairs similar to that produced by the first introduction of firearms. People wondered then what was going to happen next.

We have the present outcome of the use of firearms in guns that can sink a ship 20 miles away. This war has seen the advent of the new chemical warfare in its infancy. The Germans first used chlorine in 1915. No one knows what will be used in the future.

Beyond a certain limit what will happen in the future is more guesswork.

If the Germans could have sent mustard gas over as a lasting fog they would have won the war, for, at present, there is no effective provision against it. The nation that first discovers and uses such a fog must compel the other side to give in.

People may say it cannot be done, as they would have said in the days of muskets, if they could have been told of guns to carry 20 miles. There is no such word in science as "cannot," and all sorts of things will be possible in the future.

We might have a mustard gas cloud which would last like a London fog.

Nature can keep a fog over London. The question is, what nation can do the same?

It cannot be done at present, or the Germans would have done it. The natural fog is only water, with the fumes of the city atmosphere dissolved in it. A gas fog would be a fog intended to kill, or, at least, to put the enemy out of action.

I imagine the next war will not be a long, protracted struggle, but sudden, swift and annihilating. It seems certain to me that it will be a chemical war.

The war office is establishing a special department to deal with chemical appliances for use in war, but I hope no nation will use these things again. It would be too horrible.

Pastor Makes Tombstones

Stroudsburg, Pa., April 17.—Rev. C. A. Sellers, pastor of the Evangelical church, Stroudsburg, has resigned to go into the tombstone business.

ASSERTS HUNGARY NEEDS MONARCHY TO LULL COUNTRY

Admiral Horthy Says People Not Yet Ripe for Self-Government.

Budapest, April 17.—"I would rather talk about cabbages than kings," said Admiral Horthy, the recently elected regent and governor of Hungary, when asked about the restoration of the monarchy. "Still, when you question me why the monarchy is to be restored I can answer you. Hungary is not yet politically ripe enough for the people to govern alone. Bolshevism and the first revolution showed that the Hungarian people are unable to shape their own destinies. There must be a strong leading hand here to point the way. The thousand-year-old traditions of Hungary and the thousand-year-old constitution are the guarantee that my country can be ruled by a monarch."

"How will the monarchy be restored?" I asked.

"Very likely later on," answered the admiral, "when passions have died down and the present revolutionary and chaotic conditions are over, the nation will be asked to decide definitely whether it wants a republic or monarchy. To my mind there is only one answer. Hungary's king has always been obliged to govern through his ministers responsible to parliament. The constitution of Hungary is very similar to that of England, only the Hapsburgs frequently misused it. The future king of Hungary will govern on the strictest democratic lines, and the interests of the people will be safeguarded by amendments to the constitution."

"Who will be king?" I asked.

"To continue the simile of Alice in Wonderland," replied the governor, "that is like searching for haddock's eyes among the heather. It is a question I cannot answer. Probably no one in Hungary can. There are as many starters for the royal stakes, to use a British sporting expression, as there are for the English Derby. If I were to give you the list of those mentioned in connection with the throne you could fill a column."

The women of Downers Grove, Ill., boast of having had the first American Legion auxiliary in the country.

Shooting Ends Boys' "Movie" Newark, N. J., April 17.—Frank Sparto, 9, of No. 33 Johnson street, and his chums played "movies" in a cellar of No. 37 Johnson street. One boy was a "bad man" and carried a gun. The gun went off in the drama and Sparto was wounded in the leg, though his condition is not serious.

To the Democratic Voters of Nebraska:

The primaries are next Tuesday, April 20th. Many candidates for different offices. The election of a Governor directly concerns the people of Nebraska more than any other.

Ex-Governor Morehead of Falls City is a candidate on the Democratic ticket. I served in the Legislature in 1911 when he was in the Senate, and I can recommend him to all my friends. Was very close to him during his two terms as Governor and hope the Democrats will nominate Mr. Morehead and the Republicans will help elect him at the election. Everybody is tired of the hysterical extravagance in our public affairs.

The ex-Governor is a safe, sane, economical and progressive citizen. Made us the best Governor Nebraska ever had.

We sure need him now more than ever before and I appeal to all Democrats and friends of mine to get back of Morehead and nominate a man we can elect and will make good after elected, and a friend of all law-abiding citizens.

C. B. LIVER.

This Miller Cord Tire has run 22,000 Miles On a Heavy Truck

22,000-Mile Tread And Why They Are Exceptions

Worn Miller Tires are often exhibited with some sign like above. Countless letters also reach us telling such mileage tales. These are very pleasing. But we don't want users in general to expect miracles from Millers.

Service to Expect Expect from Millers greater service than from any like-type tire. And 19 times in 20 you will get it.

Expect it to outserve any tire you put opposite, and it almost invariably will. Expect twice the mileage tires gave a few years ago, and they will doubtless do still better. Expect tread wear 25 per cent-better than from others and you'll not be disappointed.

But don't expect that Millers, under all conditions, can match some exceptional mileage.

Why Mileage Varies

A Cord Tire gives vastly greater service than a Fabric Tire. An oversize tire will vastly excel a tire that is undersize. Care, load and roads affect tire service greatly. Millers are uniform tires. That is a major reason for their supremacy. But uniform tires will vary with conditions.

Tread Patented Center Tread smooth with section cup, for firm hold on wet roads. Geared-to-the-Road side treads, mesh like cogs in dirt.

What Our Tests Show We run tires at our factory ten million miles a year to make these service tests. These are radical tests. Tires are run constantly, night and day, and under heavy load. We want quick comparisons. On our testing machines Miller Cords average 15,000 miles, and Fabrics about half that.

But these are not mileage records. We are running Miller Tires against high-grade rivals to prove that Millers last best.

Be Satisfied With This

You will get on a Miller an exceptional tread. It is by 25 per cent the best tread made. Not one Miller Tire, made under present methods, has ever come back with the tread gone. You will get uniform tires. Every Miller Tire is signed, both by maker and inspector. Every man knows that a faulty tire means a penalty for him. And faults are extremely rare. You will get greater mileage than from any tire you put on the opposite wheel. That is so nearly universal that we will stake your favor on any single test. But you will get the best tire built today. There are hundreds of thousands who know that. When you buy a new car insist on Miller Tires. Twenty car makers now supply them and there is no extra charge.

Miller Tires Now the Topic of Tiredom

Do You Change Gears in Traffic

POLICE records show that over 90 percent of all auto accidents could be easily avoided. Watching the car instead of the road seems to be the motorist's biggest trouble. Stand on any congested corner. Notice how the driver of practically every car is compelled to change gears when the traffic slows down even to 3, 4 or 5 miles an hour. Packard drivers keep both hands on the wheel—the car easily throttles down to two miles an hour on high—and then can pick up to thirty in twelve seconds. WE say—no other car can give you such a wide range of speeds on high as quickly

and as smoothly as a Twin Six. Further, take Packard turning radius—the 136" wheel base THE Fuelizer is THE NEW engineering development which makes any gas a perfect fuel— Eliminates carbon. Stops fouling of spark plugs. Prevents oil dilution on the cylinder walls and in the crank case. Makes starting easy in any weather. The Fuelizer is only found on Twin Six cars. Come in and see how it works.

of ordinary cars which have a wheel base 10 to 20 inches shorter. THERE is nothing radically new about Packard performance. Even those features which make it unchallenged in case of handling and performance, are simply gradual Packard engineering developments, brought about by 21 years continuous building of passenger cars. To test performance—drive any car, both in traffic and in the open—then try a Twin Six. After proving to yourself that Packard out-performs any other car—inquire for the facts that show a Twin Six is just as economical to run as many cars costing one-half to two-thirds as much.
