**Wood and Johnson Both to Obtain Support—Chairman to Be Named On Train.**

Lincoln, April 27.—(Special)—District delegates pledged to abide by the vote of the people on preference for the Republican nomination for president are bound only by the vote of the people who elected them and not by the state at large, it was decided at a meeting of the delegates held here.

Delegates and alternates from Nebraska will en route in a special car from Omaha at 6 p. m., June 6, and will select the chairman of the delegation while en route to the convention city.

This arrangement was approved at a meeting of 10 of the 16 delegates, held in Lincoln Monday night, on call of Frank Corrick, of the capital city.

R. B. Howell, national committeeman, Gould Dietz and W. G. Ure, district delegates, were appointed a committee on reservations for the delegation.

It was "the consensus of opinion" that 12 of the Nebraska delegates are in honor bound to vote for Senator Hiram Johnson.

**Richardson Leads Burkett For Convention Delegate**

Those counties give official figures on the disputed office of delegate-at-large to the republican national convention as Richardson, 7,702, and Burkett, 7,600. Because of the condition of the roads it may be some time before the last returns are received.

#### Mexican and Negro Roll Dice and Argue; Black Uses Shotgun

Grand Island, Neb., April 26.—(Special Telegram)—John Guerrero, Mexican, employed by the Burlington, near Abbott, has 23 buckshot, but declares it doesn't mean that number for him and that he will again be at work in a week. Stanley Greenwald, colored, aged 20, who, it is alleged, shot Guerrero, is awaiting developments in the county jail.

When the day's work was done the two engaged in a game of craps. An argument arose and the shooting appears to have resulted from a misunderstanding between the two men as to whether or not the argument was finished. Guerrero had said his say and was walking up a road when, he says, Greenwald fired a shotgun at him from the window of the bunk car. The Mexican was so far away that none of the shot penetrated deeply.

## Let the Apex Solve Your Laundry Problem

The cost of having the family washing done outside the home has grown to such an amount that few, indeed, can afford to have their laundry done in this way. Consequently a large number have adopted the less expensive way of washing by having it done within the home. But this has not alone solved the problem. For many the wages asked by competent help prevents their employment, and even if one can afford this they find it necessary to have a thoroughly modern electric laundry if they are to secure the best help.

There is left one excellent solution to the problem. Its adoption enables the securing of the best class of help when desired, or for greater economy one can do the work alone without noticeable effort or fatigue.

The Apex is the original oscillator. It secures double action upon the clothes and water and washes them in half the time ordinarily required. There are no interior moving parts—nothing to produce wear and tear upon the clothes. Hot water, steam and suds are forced through the fabrics and completely remove all the dirt.

No laundry is complete without the Apex. It is as advantageous to the home laundry as the gas stove is to the kitchen above. The saving it makes soon pays for itself; it is a constant satisfaction in its dependability and efficiency. Our easy payment plan makes it possible for all to own the Apex.

Ask for free trial in your home or see it demonstrated at our Electric Shop. Let the Apex do your next washing.

promotes your efforts for economy to the greatest extent. It washes your clothes every week for the rest of your life at a cost of less than 2 cents for current. No other help could be secured so cheaply, with such assuredness of thorough work, reliability and unselfish consideration.

The Apex is made entirely of metal, except the wringer, and lasts a lifetime. It is guaranteed rustproof. There is no wood to rot, warp and splinter—nothing to require attention or get out of order. The wringer is of the improved, adjustable, swinging type. It operates from four positions. It is driven by the same motor as drives the machine, and may be operated at the same time as the latter when desired. A great deal of time is saved by this feature alone.
