

RAILROAD TIEUP STILL IN EFFECT; MAY INTERCEDE

Refusal of Seniority Rights to Strikers Is Blamed by Switchmen for Continuation of Strike.

Chicago, May 4.—The switchmen's strike still was in effect today, following the refusal of the railroad managers to accept the offer of John Grunau, the strikers' leader, that the men would return to work if their seniority rights were restored. William Nelson Pelouze, president of the Illinois Manufacturers' association, interceded for a settlement because of a shortage in raw materials reported by plants.

Grunau claimed 19,000 men "who have not taken other work" still were out. About 125 of the 1,200 union iron molders in Chicago were on strike today for \$10 a day minimum wage. Ninety per cent accepted a \$2 a day increase to the \$6.40 basic wage for eight hours.

Employers today informed 4,000 striking carpenters in wood working mills that unless they return to work tomorrow offers of settlement would be withdrawn. The men, who were getting 85 cents an hour, demanded \$1.10 an hour from May 1 instead of June 1, as offered.

Striking waiters and cooks used picketing "sandwich" men today to inform people which restaurants were "unfair to labor."

Ice cream drivers, who threatened to strike today, were said to have reached an agreement with their employers.

Youngstown, Ohio, In Throes Of Famine Due to Rail Tieup

Youngstown, O., May 4.—The food situation here is becoming acute as the railroad strike continues. Sugar is practically unobtainable even for babies. Wholesale salers have been without sugar for several days and restaurants are substituting syrup.

This serious food condition, coupled with reports that 35,000 men are idle, has caused the city council to telegraph the railroad labor board at Washington, asking for quick action on the men's demands.

Says United States, as A Nation, Has Turned Away From Christ

Philadelphia, May 4.—The United States as a nation has turned away from Christ, as is evidenced in the general trend of school and college education, popular literature and favorite current amusements, according to Bishop Phillip M. Rhinelander, who addressed the 136th annual convention of the Protestant Episcopal church of the diocese of Pennsylvania.

"As for amusements, immodesty in dress, looseness in sexual relations, bestiality and crime as the chief attractions in theatrical shows and photoplays, unbridled license and extravagance in all things," Bishop Rhinelander said, "are so much the established order of the day that the most respectable among us have ceased even to shrug our shoulders."

"Apply these tests of literature, amusements and education to our world; that is, the world as we know it, and see how in each case there is evident a definite anti-Christian drift, which seems to be increasing in rapidity of force and movement."

Agent of Labor Department At Scene of Timber Strike

Rhineland, Wis., May 4.—The arrival here of J. D. Barrett, representative of the federal Department of Labor, was the only development in the strike of timber workers which has closed the lumber mills in Wisconsin, Michigan and Minnesota.

Most of the strikers remained away from work, but reports told of no disorders in any district. It is estimated 20,000 men are not working.

Mr. Barrett has made no attempt as yet to see manufacturers, but has talked to the union heads, it was said. He advised the union members and manufacturers to effect a settlement with the manufacturers instead of having the labor department step in.

Sent Undertaker's Wagon For "Corpse"—Joker Jailed

Kansas City, Mo., May 4.—A "dead wagon" halted at the home of R. L. Stafford the other afternoon. Employees of an undertaking establishment rapped at the door. A man responded.

"We came for the body of R. L. Stafford," one of the men said. "Well, I'm Stafford," said the man who had responded to the knock. The corpse seekers fled.

A young man roomer at the Stafford home was arrested in connection with the "joke."

Turkish Peace Treaty Communicated to Wilson

Washington, May 4.—The substance of the Turkish peace treaty and the request of the allied supreme council that the United States accept the mandate over Armenia were received today at the State department. The request relating to Armenia will be referred to President Wilson for his decision. The attitude of the American government has been against accepting any mandates.

Present Scientist Board To Continue In Authority

Boston, Mass., May 4.—Announcement that the present board of directors of the First Church of Christ, Scientist, would be regarded as the de facto board until the full bench of the supreme court has decided whether the dismissal of John V. Dittmore as a director was legal, was made in the supreme court today by Judge Pierce.

Admiral Benson Says Sentiment of Country Opposed Preparedness

Washington, May 4.—In view of the general sentiment over the country, the navy would not have been justified in actively preparing for war with Germany in advance of a declaration by congress, Admiral W. S. Benson, war-time chief of naval operations, testified today before the senate committee investigating the Sims-Daniels row.

The admiral said that even before the beginning of the world war he personally had believed that war between the United States and Germany was inevitable.

"They were not complete," he testified, "and are not complete in some respects today."

ENFORCEMENT OF PROHIBITION TO COST 88 MILLION

Congressman Gallivan Declares More Illicit Stills In Operation Now Than Ever Before.

Washington, May 4.—Prohibition enforcement will cost \$88,000,000 annually, Representative Gallivan, democrat, Massachusetts, declared today in the house.

There are more illicit stills now than before prohibition became ef-

fective, he said, adding that the bulk of Anti-Saloon league funds are used to hire special agents to locate stills.

"There were 2,006 stills found in Georgia in 1918," he declared, "1,534 in North Carolina and 26 in Nebraska, the home of the first apostle of grape juice."

"Blind tigers are now surrounded by romance, if not respectability. Members of congress could tell interesting personal interviews with bootleggers who have become respectable citizens of the communities in which they live."

6,000 Stills Captured.

"During the year when prohibition was young over 6,000 stills were captured by prohibition inspectors and 300,000 gallons of 'moonshine' confiscated."

Control of congress and the presidential election may be decided by the prohibition question, Mr. Gallivan declared. "You can no more settle the prohibition question or

keep it out of politics than you can sweep back the ocean," said he. "Every tea kettle and stew pan is placed under suspicion since the Volstead act has become effective. It prohibits everything with more than one-half per cent alcohol and yet the sap of every tree flows in violation of that law."

Public Ship Board Contract With C. W. Morse Company

Washington, May 4.—At the request of the Department of Justice the house committee investigating shipping board expenditures went into executive session today to

continue its inquiry into the contract of the C. W. Morse company with the board.

Members of the committee denied that the investigation was connected with the indictment of Charles W. Morse by a federal grand jury at New York yesterday for violation of the shipping act.

Wilson Signs Measure Raising War Pensions

Washington, May 4.—President Wilson has signed the Fuller pension bill increasing the pensions of veterans of the civil war and widows and other dependents of veterans.

THE STORE OF
Thomas Kilpatrick Co.
ON DOUGLAS STREET FOR FIFTY YEARS

Certainly there never was a more opportune sale ever planned than this

BURGESS-NASH COMPANY

"EVERYBODY'S STORE"

If the Tub of the Apex Were Laid Out Flat

It would resemble the desert of Egypt; a flat, smooth, dreary surface, studded with comparatively insignificant pyramids, the "Apexes." There is a mystery about these "Apexes" to many. They can't see how so small a thing can be of any great importance, yet without them the rest would be as nothing. As the pyramids of Egypt are the great feature of the desert, so are the "Apexes" the most vital part of the Apex tub. Science offers an explanation.

The Apex Electric Washer.

Has no moving parts inside the tub. There is nothing but the smooth walls of the peculiarly shaped tub lined with these "Apexes." But when the tub oscillates and the machine is in operation these "Apexes" serve to create both vacuum and pressure that forces and sucks the water, steam and suds through the clothes, removing all the dirt. Without the "Apexes" there would be no vacuum, no pressure and no clean clothes. The "Apexes" take the place of the corrugations seen in most tubs, and they are more efficient than the old-fashioned corrugations.

Corrugations are seen in wood tubs. The Apex is made entirely of metal. There is no wood to rot, warp and splinter. The Apex Washer is ever sanitary, since there are no crevices to collect germs and filth. The Apex is guaranteed rustproof—it requires no more attention than your dishpan in the kitchen.

No laundry is complete without this modern machine. It costs less than 2 cents for current to do a washing with it. It eliminates boiling and rubbing—it washes and wrings electrically. Those who wish to save money, time and health are postponing each day that they are without the Apex the fulfillment of their desires. Our easy payment plan makes it possible for all to own the Apex—it pays for itself. Ask for a free trial—have the Apex do your next washing.
