REJECTS PLAN TO PAY INCOME TAXES BY BONDS

Assistant Secretary of Treasury Says Practice Would Injure Market for Liberty Issues.

Chicago Tribune-Omaha Bee Leased Wire Washington, May 23.— Assistant Secretary of the Treasury Leffing-well has rejected a suggestion that Liberty bonds be accepted in payment of income taxes, a procedure which he says would add further financial burdens to the government and injure the Liberty bond mar-ket. In replying to the author of the suggestion, Mr. Leffingwell said:

"The government's necessities are so urgent that the whole amount of its revenues must be applied to meet its current disbursements, including, if possible, the reduction of its floating debt. To accept payment of even 10 per cent of the taxes in Liberty bonds would add to the government's financial burdens and the difference would have to be made up by additions to floating debt, an operation which would not in the end benefit the outstanding bonds. After all, the thing which will most benefit the market for Liberty bonds, is the retirement of the float-ing debt. The suggestion which has been made to you would reverse this process and in effect convert funded

debt into floating debt.
"I may add that Liberty bonds are widely distributed among persons of small means, who are not themselves heavy taxpayers, and are not so largely held by corporations and persons of great wealth. A provision at this time permitting them to be accepted in payment of taxes would under these circumstances result in making it possible for corporations and wealthy persons to reduce the amount of their taxes by buying Liberty bonds in market at a discount and turning them in to the government at a profit. It would not correspondingly benefit the great majority of holders of Liberty bonds."

In Sprague Cord Tires there is a special reenforcement at the bead to prevent bead troubles and rim cuts. Spragues cost less per mile.-Adv.

last autumn, you'll see that nearly

than one-half. They plan to feed at the rate of two pounds daily for 100 pounds live weight to pigs on pasture, instead of the usual four or five pounds when they are in dry lots.

Pigs that are fed grain while on pasture will gain a pound or more a day from the time they are weaned until they weigh 200 to 250 pounds. Those getting little or no grain will gain only one-half to three-quarters of a pound a day. A grain ration reduces the time of feeding, the risk, interest on the investment, and produces a higher condition with a finer and more palatable pork. Light, steady grain feeding on pasture gives better results than heavier feeding during a shorter finishing period.
