your life don't you?

of life-happiness, success, love. accomplishes miracles. Perhaps you are one of those who have the vision to see that to get much from life, you must give much to it.

But life is tremendous and there They are the things that meau are only 24 hours in a day. Life it-

self has to be reckoned in terms of the thousands of years the world life is to be found. In the friendly has existed-and the thousands more relations of everyday lies the init will probably continue to be. We are pygmies who visit here for a lit-tle while and we cannot hope to forbear. We find the meaning of grasp all of life in the short time we loyalty and self-sacriffice. We gain

stay. So the thing for you and me to est day cheerful.

But discontent spreads over all that is near it and poisons all it touches. It's made of dissatisfaction and bitterness and lack of faith. It doesn't construct. It destroys.

Discontent that sits down bitterly in idleness and envice the rest of the world while it pities itself is another of the things that must be eliminated if life is to advance; if life is to mean anything but death and de-

cay. The other discontent which The other discontent which spurs to effort is worthy of another name. It is ambition. It is one of the things for which it is worth while to strive. But we are finding out what we must eliminate—what we must dismiss from our lives. Greed and self-seeking do not be-long in our scheme of things Help.

long in our scheme of things. Helpfulness and service are not in the vocabulary of the man or woman who thinks only of self. And they are two of the richest things in life. Service wins love and love is one of the things all of us crave.

We have decided that untruth and worry, discontent and self-segking are the things we will let go and put out of our lives. Now what shall we seek and keep and guard and use?

And earnest thinker has given us the key to the storehouse of things we need to retain in our lives. He

'Today is, for all that we know the opportunity and occasion of our On what we do or say today lives. may depend the success and completeness of our entire life-struggle. It is for us, therefore, to use every moment of today as if our very eternity were dependent on its words and deeds."

The importance of the moment is one of the most vital things for us to remember if we mean to make life worth while. Here and now is our chance for growth and achievement. Here and now is opportunity.

### Time as an Asset.

Time is the most valuable asset given us for our own growth and betterment. Our work is the best means we have of making time count. Through work we achieve

### Why High Noon Weddings

All of us frequently use expres-sions of which we do not really know the meaning. Did you, for example, know that noon is the traditional hour for a wedding cere-mony because in the olden days in England the bridegroom could not be relied upon to be sober any later in the day than this hour?

Did you know that the word "tip" meaning a lee given to a servant— is made of the first letter of the phrase "to insure promptness." and that the inscription used to be on money boxes in every tavern, in which travelers dropped their coins, which later were divided equally

among the servants? Did you know that when we say we give a person the "cold shoulder" that it was because of a custom once prevalent in France of serving a cold shoulder of mutton instead of hot meat to a guest who had stayed longer than he was welcome? Did you know that an unmarried woman is called a "spinster" because

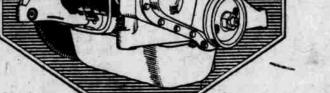

in olden days they were prohibited from marrying until they had spun a full set of bed furnishings, and because of the time they thus spent at the spinning wheels, were called "spinsters?" Did you know that in the olden

days a baker who gave short weight had awful things happen to him, and consequently when called upon for a dozen rolls he put in an extra one to be on the safe side? Thus, the phrase "baker's dozen" was originated.

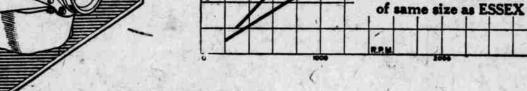

And did you know that in prim tive days a newly married man had to wait upon his bride and serve at her table on his wedding day?" Thus, the word "bridegroom" came into the language—The Craftsman.

#### Anti-Sunburn.

Anti-Sunburn. When preparing for a day of sport on the links or tennis court, use taleum powder for the face and arms instead of the rice or other face powders. Rub cold cream into the face and arms, wiping off well before putting on the powder, as this makes a body for it, and pre-vents the skin from burning. Do not wash the face and arms imme-diately after exposure to the hot sun er the wind. Rub in a good cold cream and let it remain on for about 10 minutes. Remove it with a bit of absorbent cotton, then proceed to wash in lukewarm water.

## Note How Essex Trebles Motor Power

Because of Patents the Essex Motor is Exclusive. Therefore Its Performance is Unmatched by Any Light Car. Retains Every Economic Advantage. Gives Big Car Performance and Reliability

The swing of interest to light cars, led by champions of the Essex, calls for particular caution.

Some may think Essex only one of the finer type, marking a general advance in standards throughout the light carfield.

But the facts quickly expose that mistake.

For the Essex motor is patented. No other can use it. And Essex performance, so enthusiastically admired by all motordom, is the product of that exclusive invention.

### All Results of Its ' **Patented Motor**

Essex has set the greatest official endurance record of 3037 miles in 50 hours. It has never been equalled by any other car, regardless of size or price. ,

And Essex made the world's 24-hour road record, by travelling 1061 miles over snowcovered Iowa country roads.

For cars of its piston displacement, it has won every official record, from 1 to 50 hours. It has proved speed such as only the fleetest of costly cars can rival.

And in its first year, it set a selling record, never equalled in motor history.

It creates a new standard of light car capacity in a totally new type. And it cannot be copied. Do not forget that. No other can use its motor or the principle which accounts for its superiority.

### Three Times More Power in the Same Size Motor

That is what the Essex invention means. Three times more power need not mean a thrice-better car. But consider how the enormous power of Essex is derived. That is the important thing. "

No larger than standard motors that yield by 18 H. P. at utmost, the Essex delivers 55 H. P. Neither size nor great fuel consumption figure in the high-power of the Essex motor. That is its great advantage over other types.

If you cannot get immediate delivery of an Essex, consider if its exclusive advantages are not worth waiting for, as against a less wanted car. The daily production exceeds 125 cars. More than \$35,000,000 was paid for the first year's output.

### The Man Who Says "The World Is Mine" Is The Man of Blood and Iron The Kind of Man Nuxated Iron Helps Make By Building Red Blood, Strength and Endurance

Physician Explains Relation of Strong Nerves and Physical Energy To Attainment of Success and Power and Tells Why the Cringing Weakling, Whose Blood Lacks Iron, Faces Defeat and Failure

Boosters.

The man who wakes in the morning, tingling with energy and buoyant with health is the man who is going to make good during the day. The World is in his grasp. ANYTHING he wants to do he is ABLE to do. He faces obstacles and overcomes them. They are mere incidents in the day's work. His blood rich in iron, feeds the brain wholesome food-makes it work evenly and think clearly. He is the kind of man Nuxated iron helps to make. Physicians explain below why they prescribe Nuxated Iron for weak, nervous, run-down people, to build red blood, strength and endur-

ance. "Many a man has changed himself form a cringing weakling and diamal failure into a veritable mountkin of strength and energy by building up has body with the courage and power to do and dare." says Dr. John J. Van horne, formerly Medical In-spector and Cinical Physician on the Board of Health of New York City. "The keen, active brains and tremendous force blooded people, often gives them a great advange over blooded people, often gives them a great advange over blooded people, often gives them a great advange over blooded people, often gives them a great advange over blooded people, often gives them a great advange over blooded people, often gives them a great advange over blooded people, often gives them a great advange over blooded people, often gives them a great advange over blooded people, often gives them a first of dread all them to the great be victures of all sorts of dread all weater. Viet there are thousands of such men water blood for suc moment they get ty of the right kind on into their blood endurance. Their endurance.
