

LARGE DECLINE SHOWN IN WHEAT CROP FOR 1920

Total Production for Year Estimated at 160,000,000 Bushels Less Than That of 1919.

Washington, June 8.—Despite an improvement of 19,000,000 bushels in the winter crop during May and an indicated spring crop of 68,000,000 bushels greater than that of last year, the total wheat production for 1920 was estimated today by the Department of Agriculture at only 160,000,000 bushels, or 16,000,000 bushels less than the total for 1919.

From its condition June 1, the spring crop was estimated at 277,000,000 or 18,000,000 more than the five-year average. A total winter wheat production of 504,000,000 bushels was forecast. This is 228,000,000 bushels less than that of last year and 59,000,000 bushels below the average for the five years ending in 1918.

All told, the present outlook is considerably better than could reasonably have been hoped earlier, said the department announcement. "While almost a fifth less than the great crop of last year, it is only about a twentieth less than the average crop of the five years, 1914 to 1918, which included the three largest crops in our history, excepting last year's crop."

The department said that while the Hessian fly was present from North Carolina to Kansas, no very serious damage had been reported in the west, not serious, was reported in the southern central belt. The late spring and low temperatures were blamed for the slow development of the plant and it was said that there was possibility of a repetition of the grasshopper damage of last year in the Dakotas.

Simultaneously with the department's announcement of its production forecast, a committee representing farm organizations presented a memorial at the White House calling President Wilson's attention to what was described as "the critical situation existing on the farm and the resulting menace to the nation's food supply."

The memorial said that lack of farm labor had cut down production one-third in some sections and that many millions of acres of land were being "uncropped." The wheat crop the memorial said, was reported nearly 300,000,000 bushels short and the late spring had seriously affected the corn crop.

Aged Member Record Is Claimed by Sunday School at O'Neill, Neb.

O'Neill, Neb., June 8.—(Special.)—The Sunday school of the First Presbyterian church, O'Neill, claims to have the two oldest attendants in the state regularly attending. They are Mrs. Julia Irene Dodge, born May 6, 1820 and Andrew Potter, who Monday is celebrating his 90th anniversary of his birth. Both are in entire possession of their faculties and are regular attendants at Sunday school regardless of the weather.

Mr. Potter is the father-in-law of W. T. Evans, proprietor of the Golden hotel, where he resides and takes active interest in the hotel's affairs. He recently, when a youngster of 65 complained of age and rheumatism, showed the latter to his room, carrying a heavy suitcase jauntily up two flights of stairs.

Another old timer who doesn't get to church as often as formerly, but who still is able to be about, is Jasper Davis. Family records, although not giving the exact date of his birth, show him to be in his 115th year. He was too old to enlist or to be in the draft in the civil war, but soldiered with the northern Missouri home guards.

"and he gave it dead away"
IT'S REALLY surprising. THE MONEY you save. BY ASKING questions. I FOUND that the maker, OF A hair restorer. WAS BALD as a coot. SO I passed that up. AND A bird who came, TO SELL oil stock. HAD HIS own cash. IN LIBERTY Bonds, SO I ducked again. AND I asked a clerk. FOR THE best cigarettes. AND HE reached around. FOR A fancy box. AND I knew I was in. FOR THE same old line, SO I asked him this. "WOULD YOU smoke one of 'em. IF I bought a box?" AND THEN he smiled, LIKE A regular guy, AND SAID "No thanks. I'LL SMOKE my own," AND I got wise. AND ASKED him then. WHAT BRAND he smoked. AND HE showed me. AND THEN he said, "THEY SATISFY." AND B'GOSH, he's right. SURE they satisfy. Chesterfields have "body"—that's the reason. Body enough to satisfy a cigar smoker. And yet Chesterfields are mild. Impossible? That's it exactly—Chesterfields have accomplished the impossible. They satisfy and yet they're mild.
