Mr. and Mrs. N. C. Leary, who motored to Christmas Lake, Minn., have returned home. En route they spent a few days at Lake Okoboji, the guests of Mrs. J. MacMillan Harding in her cottage there.

(Copyright, 1920. By the Wheeler Syndicate, Inc.)
If only on account of its extremely delicate and sensitive nervous system, the bat is one of the curiosities of the animal kingdom-because it may be said to have eyes all over its body. Those eyes, however, are not optical organs in the sense that the word is generally employed, but a series of minute and curious sense organs distributed over almost the entire wing surface and, apparently, extending into the ears. Spallanzani, a famous natur-

alist of the 18th century, noted that the bat's eyes are usually very small and deeply embedded in the fur of the head. Also that their construction is such as not to permit of the extension of the pupil, as in the case of the cat. In the interest of science Spallanzani conducted a number of experiments with bats, covering their eyes so that they could not posibly see and turning them loose in a darkened room which contained a number of pieces of hanging string and other obstructions. To his amazement the bats circled around, apparently as surely as they would have if their eyes had not been covered. But further experiments proved that the application of a coat of varnish to certain portions of their wings and even stoppage of their ear-openings had a great effect upon their sureness of flight. The inference, of course, is that the highly sensitive nerves in the wings and the ears notify the bat when he comes close to any obstacle and thus, to all intents and purposes, act as

ADVERTISEMENT Says His Prescription Has Powerful Influence Over Rheumatism

Mr. James H. Allen suffered for years with rheumatiam. Many times this terrible disease left him helpless and unable with recumatism. Many times this terrible disease left him helpless and unable to work.

He finally decided, after years of ceaseless study, that no one can be free from rheumatism until the accumulated impurities, commonly called uric seid deposits, were dissolved in the joints and muscles and expelled from the body.

With this idea in mind he consulted physicians, made experiments and finally compounded a prescription that quickly and completely banished every sign and symptom of rheumatism from his system. He freely gave his discovery to others who took it, with what might be called marvelous success. After years of urging he decided to let sufferers everywhere know about his discovery through the newspapers. The 5 Sherman & McConnell Drug Stores have been appointed agents for Allenrhu in this vicinity with the understanding that they will freely return the purchase money on the first two bottless to all who state they received no benefit.
