

Do You Know?

Three Questions a Day for the Housewife.

1. Whether it is real economy to do as much canning this year as usual when sugar is so high?
2. The best way to make green apple sauce.
3. The quickest way to clean silver.

(These questions will be answered tomorrow by the Housekeeper.)

Answers to Previous Questions.

According to experts in the Department of Agriculture it is never advisable to use any of the canning powders now on the market. Fruits and vegetables of all sorts if put up carefully in the usual way will keep perfectly and it is known that excessive use of canning powders, containing

boric or salicylic acid, is injurious to health.

2. To make berry jellies stiff add from a third to a half as much apple juice as berry juice.
3. The easiest way to hem napkins by hand is to run them through the sewing machine hemmer with an unthreaded needle. Double the hem back and overhand through the needle holes.

(Each of these household problems has been worked out by the author, who has not only taken a course in scientific housewifery and dietetics at Columbia university, and written and edited women's newspaper and magazine features for years, but is a practical housekeeper as well.)

Problems That Perplex

Answered By BEATRICE FAIRFAX

N. V. H.: You can stop biting your nails if you just make up your mind to do it. Some people apply bad-tasting fluids to break up this habit, but don't you think it is a stronger evidence of character to just shake up your own mind about it, and live up to your decision?

It is not sinful for a girl of your age to go to a "movie" with a boy friend, but a girl your age can put her evenings to better use. You should now be laying the foundation for your future intellectual life. Those are high sounding words I know, but if you don't learn something during these valuable years you will have nothing to grow on when you are older and cannot attend school. Get plenty of exercise, sleep and good reading.

Violet: I do not know the address of the young actress apprentice you are interested in. Nor can I pass on the merit of the toilet goods you mention. Most goods which have been on the market for years and have established a reputation are safe to use.

Peggy: A boy should be presented to a girl in some such way as this: "Miss Brown, may I introduce Mr. Smith." Or, "I would like to present Mr. Smith to you, Miss Brown." To which the young lady may reply, "I am very glad to meet you, Mr. Brown," or "How do you do, Mr. Brown."

When meeting a boy on the street a girl should speak first. If you have properly met a young man you should speak to him thereafter. Some maintain that meeting people at a formal dance does not necessitate recognition afterward. But it seems to me the human thing to do is to speak to people whom you have met, especially should this be true in a small town.

Greens, reds and pinks and some shades of blue should be becoming to you. Ask your city librarian what you should read. I cannot tell you, because I do not know how far advanced in school you are.

Be Careful What You Wash Your Hair With

Most soaps and prepared shampoos contain too much alkali, which is very injurious, as it dries the scalp and makes the hair brittle. The best thing to use is Mulsified coconut oil shampoo, for this is pure and entirely greaseless. It's very cheap and beats anything else all to pieces. You can get this at any drug store, and a few ounces will last the whole family for months.

New Hair Remover Works "Like Magic"

(Positively Removes Roots and All)

No discovery of greater benefit to hair-disfigured womanhood has been made in recent years than the marvelous plastic time method. It is entirely unlike and much superior to electrical, depilatory or other methods, because it actually removes the hair entire, roots and all—before your very eyes—easily, quickly, harmlessly! Get a stick of plasticine from your druggist, follow the simple directions, and you will be astonished and delighted with the result. It is odorless, non-irritating, and so harmless a child could safely use it. It leaves the skin so soft, smooth, hairless, that not the least sign of your former trouble remains.

What's What

By HELEN DECIE

Inquisitiveness is one of the 700 deadly sins of ill breeding. Unless we are hired detectives we must not seek to know more of the affairs of others than they choose to divulge to us. The woman who asks personal questions solely for the sake of ferreting out the innermost feeling of another is guilty of a peculiarly vicious rudeness which should be rebuked without mercy.

Well bred men and women never ask personal questions. Also, their training enables them to parry this form of discourtesy, with a sarcastic humor discomfiting to the Paul Pry tribe. Thus, as in the drawing, Madame Pry usually elects to attack the young and the sensitive who have acquired none of the defensive weapons of sophistication.

VICTIMS RESCUED

There is one simple, safe and sure way that never fails to get rid of blackheads and that is to dissolve them.

To do this get two ounces of calomine powder from any drug store—sprinkle a little on a hot, wet sponge—rub over the blackheads briskly—wash the parts and you will be surprised how the blackheads have disappeared. Big blackheads, little blackheads, no matter where they are, simply dissolve and disappear, leaving the parts without any mark whatever. Blackheads are simply a mixture of dust and dirt and secretions from the body that form in the pores of the skin. Pimples and squeezing only cause irritation, make large pores and do not get them out after they become hard. The calomine powder and the water simply dissolve the blackheads so they wash right out, leaving the pores free and clean and in their natural condition. Anyone troubled with these unsightly blemishes should certainly try this simple method.
