# ESSEX MOTOR CARS

## San Francisco to New York 3347 Miles in 4 Days 14 Hours 43 Minutes

Lowers Transcontinental Record by 12 Hours 48 Min. Another Essex Going From New York to San Francisco Broke the Record For That Direction by 22 Hours 13 Min., Completing the Trip In 4 Days 19 Hours 17 Minutes

### So Essex Holds the Transcontinental Record Both Ways

Two Essex touring cars, carrying U. S. Mail, each one making the entire trip between San Francisco and New York, have set the time records for their respective directions across the American continent.

And thus comes to Essex another distinction for reliability and endurance.

Except for one airplane record, these two Essex cars have crossed the continent in less time than was ever recorded by any traveling machine. The fastest time possible between San Francisco and New York by train is slightly less than the time taken by the light weight economical Essex. But in the case of the railroad train, many different locomotives are used, each pulling the train only a few hundred miles.

From Cheyenne to Omaha the route taken by the Essex was 43 miles longer than the 550-mile route of the famous Overland Limited, yet the Essex time was but one hour longer than the express train time.

#### The World's Most Coveted Records

From the days of the Prairie Schooner, the Pony Express and the completion of the railroads, men have sought to establish new transcontinental time records between the Atlantic and Pacific oceans.

It has called for the highest development of skill and courage. And it has, as in the case of the motor car, blazed the way to mechanical reliability.

The purpose of this Essex test was to prove its reliability. In the period of 114 hours was crowded more strains, more calls for endurance and mechanical strength than the average owner demands in a life time.

Every requirement of motor car performance was met by these two cars. And the fact that they so consistently met their tasks proves Essex uniformity.
