New York Aug. 19.—The extent of the recent decline seemed to be attracting, little more demand in the market for coffee futures today and after opening 8 points lower to 2 points higher, prices sold about 42 to 63 points above last night's close. This carried December contracts up from 7.95 to 8.50c and March from 8.45 to 8.05c, but most of the demand was attributed to covering and the advance was checked by reports of a further decline at Santos. Later fluctuations were irregular, with last prices showing reactions of some 35 to 50 points from the best, but a net advance of 4 to 13 points. sure an adequate income on railroad investment.

When, after studying the decision from the two states, the short interest in stocks attempted to cover offerings became exceedingly light. Railroad and railroad equipment, automobile, steel and other issues advanced scoring net gains extending from large fractions to more than a points. The sugar snares were still under pressure and some irregularity existed among specialities, but the broad tone was of strength. Small turnover pointed to the absence of public participation, although brokers who devote efforts to the development of cash accounts reported a moderate increase of such purchases. Call money stood at 7 per cent throughout the day.

As the state of Pennsylvania had previously granted rate increases under its control, equal to those collected in the Interestate Commerce commission's award, it is seen that the eastern traffic districts are now well represented in the movement to approve the national rate structure in its major aspects. There is material in those decisions to relieve and among railroad managers lest a decided obstacle arise to postpone the general application of the new freight rates a week from today. Doubtless passenger rates will be the subject of contention for some time to come, but the revenue involved is by no means commensurate with that derived from freight and the roads will be able to effect a period of adjustments in this field if it proves necessary. Should there be rapid acceptance of state rate applications on a basis approximately those voted by the commerce commission, it is not beyond the real import of the rate decision. But the credit situation remains steadfast as a deterriment for speculation of the rise. Money is difficult to get at top quotations. The encouraging feature of the money situation at this time is contained in impressions of the bankers.
