and the bears. Reports from Illinois, indiana, Ohio and Missouri indicate that the bulk of the surplus wheat has already been shipped, and that only sufficient remains on hand to supply the normal milling demand within the borders of these states until the 1921 crop is harvested. There is now a strong disposition to hold for around \$2.50 at country loading points. C. E. Lewis wired Stein, Alstrin & Co., that line clevator people said they were issuing storage tickets for more wheat than they were buying, as 10 days free storage is given. The bears believe that the competition of Canadian wheat will bring down premiums in the winter wheat markets and that as soon as August shorts have covered prices will commence to slip.

Austria has arranged to import around 4,000,000 bushels barley. First threshing returns from Pomerainia, Germany, show very poor yields of wheat.

A readjustment of wheat are not in limarkets to the new freight rates is expected by cash hardlers to be in evidence shortly. The decline at Minneapolis today about represented the difference between the old and new billing. This may become apparent in other markets.

At the last, spot No. 1 northern at Winnipeg, with exchange at 12c discount, was about 5½c under the outside price of dark No. 1 northern at Minneapolis. Some of the export brokers expect that with Canadian wheats offered lower than domestic, a good stock will be built up in Chicago as soon as the demand from winter wheat shorts is satisfied.

A request for an offer of new crop corn was received by a Chicage house from Montreal Thursday afternoon.

Chicago Grain

By CHARLES D. MICHAELS.
Chicago, Aug. 27.—Stock market trading today showed a lack of uniformity which denoted the absence of positive influences to satisfied prices in either direction. The appearance of the list at the close of business indicated that professional sharpshooting at particular groups of industrial issues comprised the bulk of the day's activities. In this process the motor and sugar stocks were the chief sufferers, one or two of the former going through rather abrupt reactions.
