What's What

By HELEN DECIE.

In the breakfast coat the modern woman possesses a garment which fills the main requirements of early morning dress in that it is at once dainty, comfortable and "slip-on-able." Mr. Everyman loathes the negligee attire which so many women wear at the first meal of the day—kimonas or dressing jackets which belong exclusively to the bedroom. All too often his "love's young dream" vanished before the reality of slip-shod breakfast wrappers.

In the illustration, Paterfamilias, himself groomed bracingly against the toil and turmoil of a business day, finds his first good cheer in the immaculate appearance of his daughter, who wears a tailored breakfast coat of turquoise blue washable satin. These charming coats button down the front, may be worn costlessly, and can be changed in two minutes.

YOU'LL GET RID OF BLACKHEADS SURE

There is one simple, safe and sure way that never fails to get rid of blackheads and that is to dissolve them. To do this get two ounces of calomel powder from any drug store—sprinkle a little on a hot, wet, sponge—rub over the blackheads briskly—wash the parts and you will be surprised how the blackheads have disappeared. Big blackheads, little blackheads, no matter where they are, simply dissolve and disappear, leaving the parts without any marks whatever. Blackheads are simply a mixture of dust and dirt and secretions from the body that form in the pores of the skin. Picking and squeezing only cause irritation, make large pores, and do not get the blackheads out after they become hard. The calomel powder and the water simply dissolve the blackheads as they wash right out, leaving the pores free and clean and in their natural condition. Anyone troubled with these unsightly blemishes should certainly try this simple method.

Do You Know—X

Three Questions a Day for the Housewife.

1. When was starch first used in clothes?
2. What is the best way to cook green corn?
3. Of what use is ammonia on wash day?

(These questions will be answered this week by the Housewife.)

Answers to Monday's Questions.

1. The tomato was introduced to Italy from Morocco and was hence called by the Italians Pomato dei Mori—apple of Moor

—which sounded to the French like pomme d'amour—apple of love, a name used by our grandmothers.

2. Orange juice, prunes, apple sauce or baked apples, and stewed peaches or pears are good for young children.

3. You can prevent stockings from running at the top if you stitch a strip of silk or piece of old stocking at the top of new stockings. Sometimes hose supporters do the mischief. They should then be lengthened by inserting wide tape where they join the corset.

Miss Bullock on Americanization.

Miss Edna Bullock of Lincoln spent Tuesday in Omaha on her return from an eastern trip. In Hyannis, Mass., she took an intensive four weeks' course in Americanization at the State Normal school under the State Board of Education. The state of Massachusetts is carrying on a state-wide campaign for Americanization. The state bears half the expense of Americanization work that is carried on by the public schools. Instruction is given

foreigners under public school supervision; it may be given in homes, club rooms, factories, school houses, etc.

Miss Bullock says it is time to look after the immigrant woman. In her opinion congress should amend the naturalization law to provide for the same process for naturalization for women as is now provided for men.

Twenty-six thousand emigrants arrived at Ellis Island last week, according to Miss Bullock, most of them being the wives and children of men already here.

George and Clarence Buffett leave Thursday to attend the University of Nebraska.
