

The Amazing Water Glass Test Proves No Ruinous Vibration

Here is the greatest test in the lighting plant field. Absolutely proves that there is no ruinous vibration—the jarring that wrecks any machine in a short time. See this test. It proves two things:

First—That there is no ruinous vibration. As you can easily understand, even a slight trembling would shake the plant off the glasses. And no ruinous vibration is one of the biggest things in engineering, because it insures long life to the motor and the whole plant.

Second—It proves that this efficient plant needs no special foundation. It will operate on any foundation that will hold it, and will stay where it is put without being chained down.

Heavy anchoring sometimes serves to camouflage vibration. But this does not eliminate it. And it does not relieve the bad effects. Heavy anchoring merely conceals vibration.

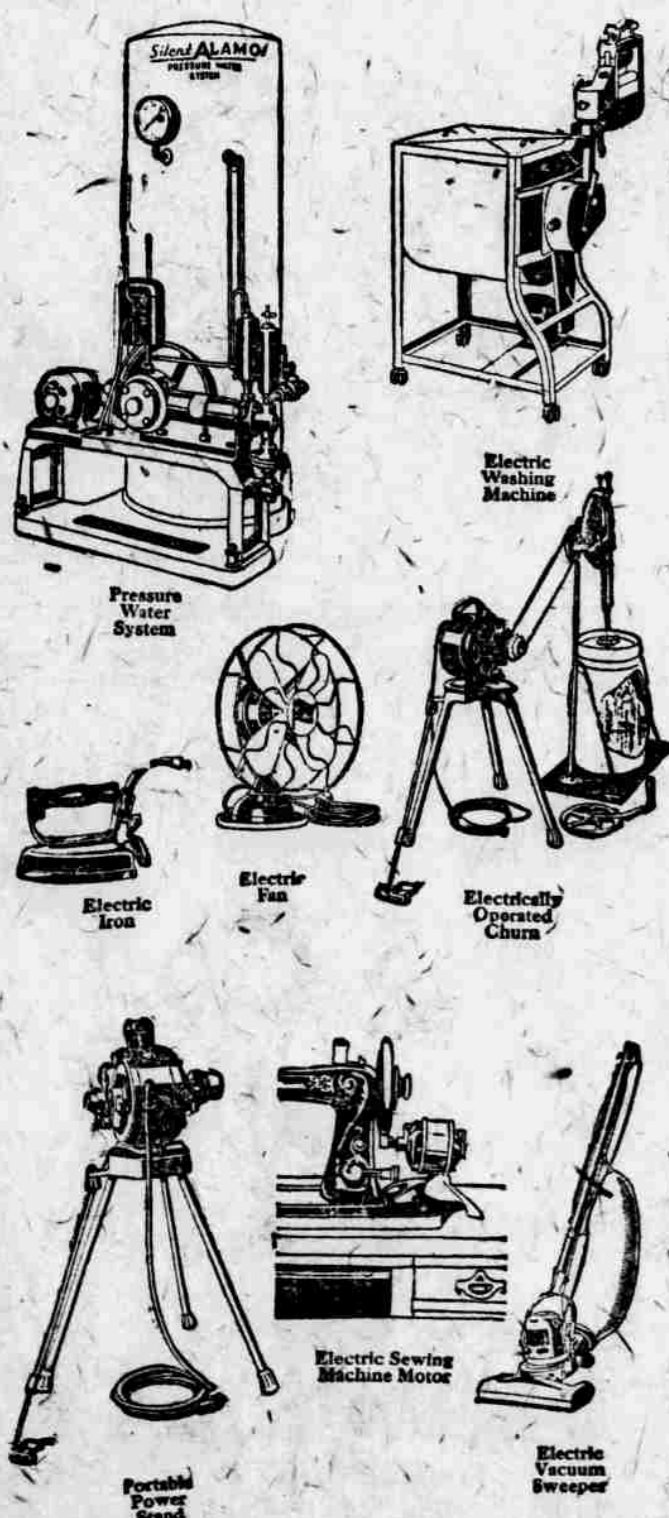

The Silent Alamo proves its mechanical superiority, and the fact that it positively has no ruinous vibration, by operating, under full load, mounted on three drinking glasses.

Ten Important Silent Alamo Features

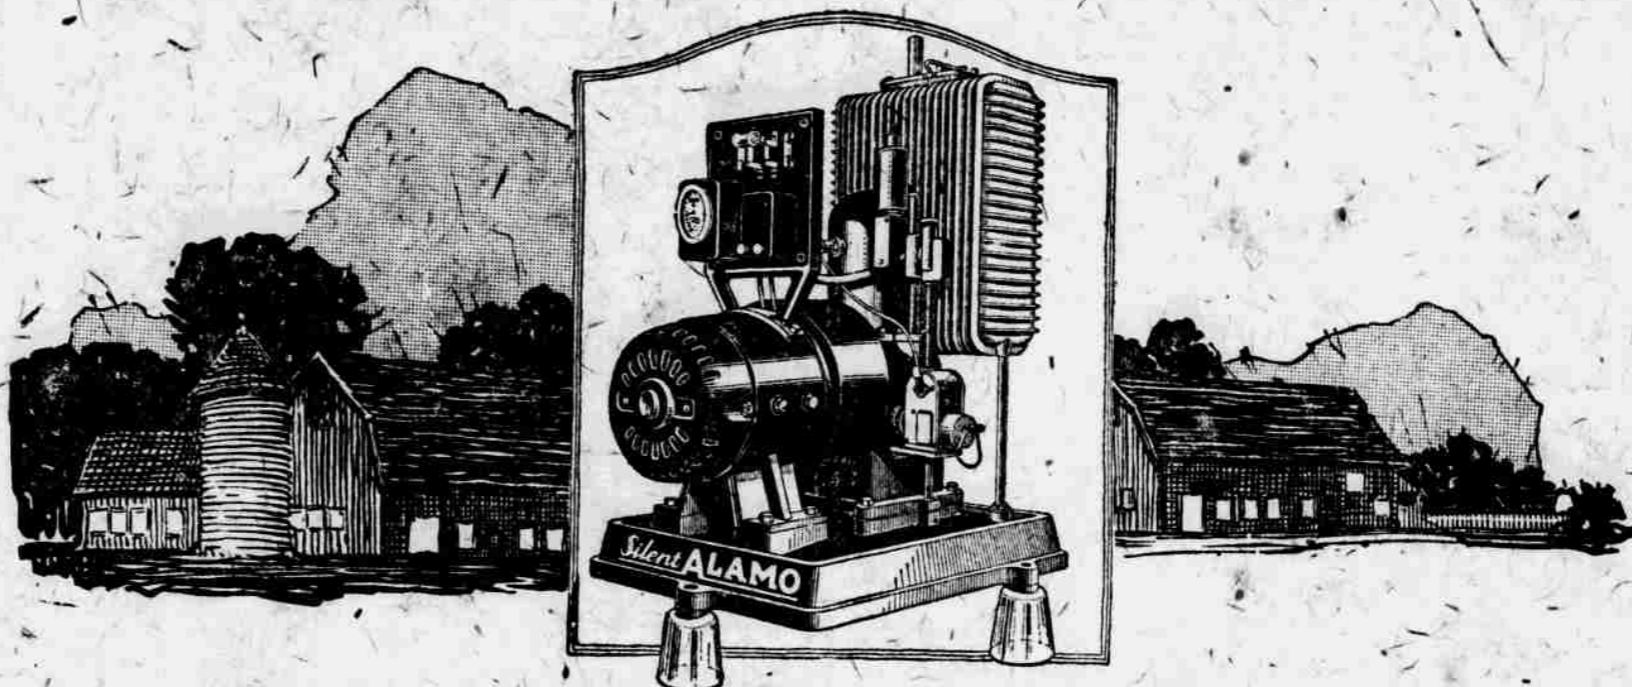

- 1—Wonderful rotating sleeve valve type motor, practically noiseless.
- 2—No vibration—due to scientific balancing and noiseless sleeve-valve motor.
- 3—Complete, compact unit—all parts, except battery, mounted on metal base. No other foundation needed.
- 4—All moving parts enclosed—insures long service and safety.
- 5—Motor automatically controlled. Gives battery a tapered charge which insures long life. Motor stops when batteries are fully charged.
- 6—All points oiled by rotary force pump under pressure.
- 7—Automatic throttle governor controls speed of engine at all times—prevents racing.
- 8—No spark plug fouling, due to sleeve valve construction.
- 9—No carbon trouble, due to sleeve valve construction.
- 10—No valves to grind, due to sleeve valve construction.

Electrical Accessories

We carry a full line of SILENT ALAMO electrical conveniences and labor savers, a few of them illustrated below. These accessories have been approved by the Engineering Department of the ALAMO FARMLIGHT COMPANY, and are especially adapted to the SILENT ALAMO. Come in and look them over.

Electric Light and Power for the Farm

Silent ALAMO

REGISTERED IN U. S. PATENT OFFICE

FARM ELECTRIC POWER AND LIGHT PLANT

“America’s Leading Electric Light and Power System”
