Curling Iron Passes

The heated iron makes the hair dry and parched looking, burns off the ends, giving a most untidy appearance. You who have learned this from experience will be glad

learned this from experience will be glad to hear of a very simple method which is open to none of the objections referred to and, which gives better results than the curling from.

Just get a few ounces of plain liquid silmerine at your druggists, and apply a little with a clean tooth brush before doing up the hair, drawing the brush down one strand at a time from root to tip. In three hours your hair will be as beautifully wavy and curly as though Mother Nature did it, and it will be quite manageable, no matter what style of coiffure you adopt. The effect will be much prettier than if you used a waving iron, will last much longer, and the health of your hair will not suffer. Silmerine is not sticky or greasy, but is quite pleasant to use.
