BEE TELEPHONES
Tyler 1000

The Bee's Platform
1. New Union Passenger Station.
2. Continued improvement of the Nebraska Highways...

A CONGRESS THAT WILL FUNCTION.

The promise made by Senator Harding that when elected he will see that congress is restored to its proper place in the government of the United States...

It was an unfortunate thing for the country that the last congress under President Taft was controlled by the democrats. That body, inspired by a narrow partisanship...

Woodrow Wilson's first message to congress earned for him the sobriquet of "The Schoolmaster," its tone being that of a teacher to his class.

In 1918 the people took entire control of congress away from the president. He could no longer dictate how the members should vote, save those of his own party...

Moving Omaha Nearer the Coast. That the New York Chamber of Commerce has protested against the St. Lawrence ship canal project does not mean that this would be a bad thing for the grain growing regions of the United States...

The railroads are now incapable of moving the crops as fast as is necessary for the needs of the producers. With the Atlantic ocean brought, as it were, 1,000 miles west, and Chicago turned into a seaport...

and eventually repay the entire cost of construction. Development of water transportation is pledged in platforms of both political parties...

Waging War on Lenroot.

Out of the maze of local complications which obscure the political situation in Wisconsin one fact stands out boldly. The forces that are opposed to republican policies are bending every effort to secure the defeat of Irvine L. Lenroot...

At the primaries this year Lenroot triumphed over the opposition headed by LaFollette, who has since then brought out a ticket of his own, heading it with the candidate rejected by the voters in favor of Lenroot.

However, there is more than the personal equation involved in the Wisconsin situation. Lenroot showed himself possessed of uncommon ability when serving in the house, and would undoubtedly have been the leader of the republican majority on the floor, had he remained there.

In the Next Legislature.

While the interest of Nebraskans in the outcome of the national election is paramount, publication by the secretary of state of a list of filings by candidates for the legislature reminds us that the voters of the state have another imperative duty. They must exercise great care in selection of the men who are to make the laws.

Many Years to Recover.

A famous Danish statistician estimates the cost of the world war to the human race at 35,000,000 lives. This number equals the present population of France.

Famine and epidemics made the deaths in Austria, Hungary, Poland, the Balkans and Russia larger than those of France, which suffered most severely of the allies. Its population is said to have decreased 7 per cent.

Washington is seriously alarmed by Senator Kenyon's suggestion that some of the government departments be moved to the middle west.

The street railway company is building warrants the belief that it does not expect Farnam street to be abandoned as a thoroughfare.

With 251,000 car loads of corn to be hauled, say nothing of other things, the railroads needn't worry about business in Nebraska.

This is one year in Nebraska when a republican is absolutely justified in voting the ticket straight.

Cleveland's victory is as popular as it was clean.

What is so rare as a cool day in October?

A Line O' Type or Two

OUR favorite political diagnostician and prognosticator, Mr. Mark Sullivan, considers every day from now until election a dangerous day for the republicans; something may happen, heaven knows what. We don't know how Mark is standing the suspense, but it is worrying us sick.

NOTHING less than sensational is Senator Edge's declaration that "we have clearly established that there have been violations of the corrupt practices act of Ohio."

SAYS Lloyd George, "The treaty of Versailles is better than none, and only party warfare in the United States has prevented America from accepting it."

Speaking, or Singing, of Facts—(From the Escanaba Press.) For sale, 1917 Ford. This car's valves need grinding and carbon knocked out.

IN a world chorus of complaint and denunciation constructive criticism is rare; but now and then a calm, clear voice rises above the tumult, like that of Bourke Cockran's.

LITTLE BOY BLUE. (With the customary grovel to the smoke-shade of Eugene Field.) The little brown pipe is covered with dust.

Ah, I'd the aroma of India Isles And the breath of the Sultan's urf! And I basked in the glow of the Lady's smiles—

THE RAVEN. SIR: Do you not feel that the dignity of the Immortals would be greatly increased by the admission of Graver Bird of Webster, Ia.?

PEOPLE in Clarksdale, Miss., seem not to be superstitious, as Dr. Hope Blocker enjoys a lucrative practice.

AMERICAN efforts to disentangle the knot of Article X (the period after it had been dropped, so it is now a symbol representing the unknown quantity) must afford the statesmen of France and England an occasional mirthless chuckle.

THE tide has turned," cries Vance McCormick. But perhaps it is only the wind blowing the surface water.

MARRIED at Clinton, Leo Hart and Anna Burns. Pass the soda tablets.

YOUNG Mr. Huxley, author of "Limbo," "Leda," and other highly seasoned dishes, has certainly a gift for phrases.

READY TO BE FIRED. SIR: A chauffeur in our shop phoned the boss and said: "I'm down at 8—, getting measured for a pair of rear fenders."

SENATOR SPENCER set the chorus of Woodydids going: Woodydid, Woodydidn't, Woodydid, Woodydidn't.

Plenty of Room. The new stadium at the Ohio university will be built to seat 65,000 people and will be the largest amphitheater in the world.

In Any Trade. "A dress designer" says a Camomile street dressmaker in the London News, "must be born." We always think this is an advantage.—London Punch.

It's a Grand Old Alibi. No situation can be regarded as entirely without hope so long as it can be blamed on the car shortage.—Pittsburgh Dispatch.

Sometimes Spun by Candidates. An ascertained fact about campaign lies made out of whole cloth is that the cloth is usually made up of yarn.—Boston Transcript.

How to Keep Well

By DR. W. A. EVANS. Questions concerning hygiene, sanitation and prevention of disease, submitted to Dr. Evans by readers of The Bee, will be answered personally, subject to proper limitation, where a stamped, addressed envelope is enclosed.

CONTAGION AND CHILDREN. The children who must be protected against contagion are the babies under 2. If a child can be carried beyond 2 without contracting contagion, the child is not very likely to die from any form of communicable disease.

What Dr. Palmer did was to tabulate the ages of all persons reported to the Detroit health department as having a year or more of contagion over a period of years.

Dr. Palmer's study showed one-fifth of all the whooping cough was in children under 2, or about 10 per cent a year. Children below 5 had 61 per cent of all the whooping cough.

Nevertheless, in Detroit one-third of all the whooping cough was in children 5 to 10. Since 88 per cent of the whooping cough was in children under 10, there is no reason why parents, teachers and employers of persons over 10 should worry about whooping cough.

Fourteen per cent of the measles is in babies under 2; 51 per cent in children under 5, and 45 per cent in children under 10.

REPLY. The case probably is some form of paraplegia and nothing can be done. Sometimes something can be done for cases of paraplegia due to accidents and also to a few of those due to syphilis.

REPLY. Increase Baby's Diet. Mrs. R. H. H. writes: "Please tell me the proper food for a baby 8 or 9 months old. We feed her on the bottle, malted milk and condensed milk. She weighs only 15 pounds."

REPLY. A. K. writes: (1) What causes adhesions after an operation for appendicitis? (2) Is there any cure for them without another operation? If not, is there any danger?

REPLY. 1. The infection and inflammation of the appendix and surrounding structures are responsible for most of the adhesions. Some are the results of handling delicate tissue during operation.

REPLY. 2. No. The pain and discomfort caused by adhesions generally disappear after a while. Permitting the mind to dwell on the queer sensations felt in the vicinity of operation scars does harm.

REPLY. Mrs. R. H. H. writes: "Please tell me the proper food for a baby 8 or 9 months old. We feed her on the bottle, malted milk and condensed milk. She weighs only 15 pounds."

The Bee's Letter Box

Senator Hitchcock's Reservations. Shenandoah, Ia., Oct. 11.—To the Editor of The Bee: Did Senator Hitchcock offer any reservations to the League of Nations covenant, to be acted on in the senate?

How Bryan Helps. Mr. Bryan says "silence is not inconsistent" with support of the democratic party. Silence, in fact, is the most effective support Mr. Bryan aids.

They Count. The big fidget in this fall's election is not over the repeaters, but over the first-timers.—Boston Herald.

Will you please advise the editor of The Bee your identity? We are holding your letter in which you question the intelligence, the integrity and the veracity of The Bee.

Approves The Bee's Stand. Oxford, Neb., Oct. 11.—To the Editor of The Bee: We have long been subscribers for The Bee, and I want to take this occasion to compliment you on the editorial which appears in this morning's Bee, page 4.

REPLY. They say she is undernourished and that babies of that age can eat solid food such as mashed potato, carrots, etc. Also should she not be fed orange juice and tomato juice?

REPLY. Since she is getting condensed milk and malted milk and since she digests it well, keep it up, but give her other food in addition. She should have commenced taking fruit juices, including strained tomato juice, months ago.

Not a Hopeful Case. F. P. writes: "Kindly let me know if there is a cure for what is called inflammation of the spinal cord. The person to whom I refer is stiff from the waist down. She cannot stand on her feet or move the lower part of her body."

REPLY. The case probably is some form of paraplegia and nothing can be done. Sometimes something can be done for cases of paraplegia due to accidents and also to a few of those due to syphilis.

Gunsights

No Answer. How are we ever going to get back to normal, with taxes going up faster than the cost of living goes down?—Providence Journal.

can give the party.—Columbia Record. Kipling Was Right. As the democrats tot up the Maine results they'll probably realize that the female of the species is more deadly than the male.—St. Louis Globe-Democrat.

THE WORLD AND ITS WOMEN. Women more and more are taking their place in the world of business, the world of politics, the world of progress. The First National Bank long ago realizing that this recognition was bound to come, made ample banking provision for women.

TRUCK PRICES. THE much-advertised statement that it is time war prices were reduced is indisputably sound. But not as sound as having no war prices to reduce. That is The White Company's position.
