

Y.W.C.A. Will Open Drive for \$70,000 Early Next Month

Increased Prices Forces Organization to Seek Assistance of Public, President of Board of Directors Says.

The Young Women's Christian association of Omaha will launch a campaign for \$70,000 November 9, according to an announcement made public yesterday by Mrs. George F. Gilmore, president of the board of directors.

"The association is obliged to ask the public for \$70,000 in order that it may continue its work along its present basis," said Mrs. Gilmore. "The association has suffered as a result of increased prices and has been a loser. The difference between the association's income and its required budget for 1921 is \$42,000. We have bills for current running expenses to meet totalling \$4,000. The equipment at Camp Brewster cost us \$8,000, and the equipment for the boarding residence which was opened in January, 1919, \$1,000.

The sum of \$6,000 is needed to meet the deficit for current running expenses of the residence. The association must raise \$8,800 to cover the cost of the property and equipment of the same to house the colored center. The colored people of the city will be asked to help raise this portion of the \$70,000 budget.

Glorious Sunsets of Hawaii 'Harnessed'

Professor Attempting to Correct Light Refraction Tables.

Honolulu, T. H., Oct. 23.—Hawaii's glorious sunsets are being "harnessed" to the drab treadmill of scientific facts and figures.

Prof. William J. Fisher, late of the University of the Philippines, is engaged in taking sunset observations in Honolulu, which, it is hoped, may be used to correct existing light refraction tables whereby navigators will be greatly aided in figuring the location of their ships while at sea.

Present tables, according to Prof. Fisher, permit observations no lower than 15 degrees from the horizon.

By minute figuring of the bending of the sun's rays as it sinks behind the Pacific beyond the beach at Waikiki, Prof. Fisher hopes to add materially to existing refraction tables. When his observations are complete he will forward the results to Prof. Constock of the University of Wisconsin, who is collecting similar data from different parts of the world and by whom the final collection in the refraction tables will be made.

Sugar Cane Brings Enormous Profits

Homesteaders in Hawaii Net \$7,000 to \$12,000 on 20 Acres, Expert Says.

Honolulu, T. H., Oct. 23.—Homesteaders growing sugar cane in the Territory of Hawaii are making enormous profits this year, some of them making from \$7,000 to \$12,000 on 20 acres, according to Albert Horner, territorial sugar expert.

Horne, in a report to Gov. C. J. McCarthy, deprecates the practice of many homesteaders in hiring alien labor to cultivate their lands and declares that when this state of affairs is brought to the attention of congress the lid will be clamped down on homesteading high class cane land in Hawaii.

Governor McCarthy said with regard to the report:

"The present system of cultivation contracts is a palpable evasion of the spirit of homesteading. It results in making the homesteader a landlord, who rents out his property to Japanese cultivators and does nothing to develop it himself. Unless this is stopped homesteading will be killed."

Terrorists Rule in Azerbaidjan

Despite Solemn Promises of Moscow of Independent Government, Reds Control.

Paris, Oct. 23.—An American citizen, member of the American Committee for the Relief of the Near East, has arrived in Constantinople from Baku with the first complete details of the establishment of the bolshevik regime in Azerbaidjan. His confidential report, signed and attested, is now on its way to the Department of State in Washington.

Through his courtesy, The Bee is able to publish for the first time authentic details of the bolshevik "rising" which has resulted in the absorption of Azerbaidjan by the Russian soviet republic after solemn promises from Moscow that her independence would be respected.

According to The Bee's information, there no longer exists such an independent state. While it has its tummy government, control of all affairs are in the hands of various "commissions" from Moscow, and the country is ruled by the terrorist organization known throughout Russia as the cheka, or extraordinary commission.

At his own request, The Bee withholds from publication the name of this gentleman.

How Merchants Keep an Eye on You

There's No Guess Work About Credit System Maintained by Retail Bureau—If You're Slow to Pay They Know and "Dead Beats" Haven't a Chance in Omaha Stores.

The debt paying habits of 250,000 persons are on file on the second floor of the Leflang building, Sixteenth street and Capitol avenue.

There is located the office of the Associated Retailers' Credit Bureau, an organization which has been in existence since 1912.

It has one business in life—the establishment of the credit of every man, woman and child who opens a credit account in 400 retail stores and banks in Omaha, members of the organization.

A man's wealth makes no difference. If he is worth a million he is put on file in the organization's office and if he is slow in meeting his obligations he is given a poor rating.

The number of persons indexed in the organization surpasses the population of Omaha. This, because out-of-town customers are put on record, the same as the Omaha customers, J. W. Metcalfe, secretary of the organization, explained.

Look at the Rating Cards.

The minute a man, woman or child applies for credit in an Omaha store which is a member of the organization, the clerk says "excuse me," or sends the would-be creditor to the credit man. In that event the credit man says "excuse me" and calls the Associated Retailers' Credit Bureau.

"How's so and so?" he asks.

"Looks like the clerk about two minutes to find the rating card of the person desiring credit and give the retail store credit man the information desired."

The credit bureau's rating usually decides whether further credit will be extended or not.

If the customer is new to the city, the satisfaction of its members, Mr. Metcalfe stated.

Music Speeds Up G. O. P. Women

Volunteers in Republican Headquarters Work Faster When Pianist Is on Job.

Music bath charms not only to soothe the savage breast, but it lightens labor, according to several observations in Omaha.

Women volunteers are stuffing envelopes at republican headquarters, 310 South Nineteenth street. Among these volunteers are Mrs. Ben S. Baker and Mrs. E. M. Syfert.

Friday afternoon the shift comprised Miss Helen Morris, Mrs. F. A. Ballinger and Mrs. S. E. Coleman. When some one began playing a piano in an adjoining room these young women quickened their movements and in a few minutes they were keeping time to the music. They stuffed to the tunes of "Old-Fashioned Garden of Roses," "Isle of My Golden Dreams," "Beautiful Ohio," "Lovely Indiana" and other selections.

An Omaha woman who lives in the 6700 block on North Thirty-first street avers that she starts her phonograph while doing her morning work and asserts that the music carries her through in half the usual time for doing these morning chores.
