Big Lead in Straw Vote Republicans continue to lead overwhelmingly in straw votes in Omaha. At the Y. W. C. A. cafeteria Monday, Harding polled 178 ballots to 70 for Cox, while McKelvie led the gubernatorial candidates with 100, Morehead coming next with 78, and Wray thord with four.

The first 50 customers in the Star Show company Monday gave Hard-ing 34 votes and Cox 16, according to Manager Jacob Isaaeson.

Are Some Pencils Soft and Others Hard?

(Copyright, 1928, by The Wheeler Syndicate, Inc.)

In the manufacture of lead pen-cils, a special grade of fine clay s mixed with particles of graphite after both substances have been thoroughly pulverized. The prothoroughly pulverized. The pro-portions of this maxture deter-mine the relative "hardness" or "softness" of the pencil itself— a preponderance of clay produc-ing the hard variety and an extra amount of graphite making the

lead soft.

In addition, the hardness or softness of the pencil is also determined by operations which follow this mixing. The lead has to be compressed and moulded in order that it may fit the opening in the wood or other substance which is to encase it. The greater the pressure upon the clay-andgraphite mixture, the harder the lead, because the particles are fused together between dies cut from mineral substances, and therefore wear away less rapidly under the friction of writing than do the "softer" or less compact leads. A soft pencil usually carries a head considerably thicker than a hard pencil because the very mixture of the soft compound rendere it more litble to breakage, and at the same time, the user of a pencil of this kind desires a broad thick line rather than one which is

Over Rheumatism

rible disease left him helpless and unable to work.

He finally decided, after years of ceaseless study, that no one can be free from rheumatism until the accumulated impurities, commonly called uric acid deposits, were dissolved in the joints and muscles and expelled from the body.

With this idea in mind he consulted physicians, made experiments and finally compounded a prescription that quickly and completely banished every sign and sympton of rheumatism from his system.

He frealy gave his discovery to others who took it, with what might be called marvelous success. After years of urging he decided to let sufferers everywhere know about his discovery through the newspapers. Sherman & McConnell's 5 drug atores have been appointed agents for
