This Percentage, However, Is Contingent On Voting In Same Proportions as They Registered.

Chicago, Oct. 30.—The women's vote in the cities of the middle west on Tuesday's election will run around 40 per cent of the total, if the women vote in the same proportion as they registered. This is the conclusion reached here after a review of registration in a dozen representative cities.

Reports from 10 cities, from Minneapolis to Galveston, show women registered to the number of 739,930, as against 1,232,239 men. Figures follow:

Table with 2 columns: City, Women Registered, Men Registered. Cities include Chicago, St. Louis, Cleveland, Indianapolis, Minneapolis, St. Paul, Galveston.

The percentage of women registered in the cities named is 37 per cent of the total. As Kansas city election officials estimated a larger percentage, and at Milwaukee and Omaha it ran around this figure. At some other cities, among them Columbus, O., no separate count of the women was kept. Final registration in some of the cities was as follows:

It is evident from the foregoing that women in the larger cities of the middle west will cast a larger vote for president Tuesday than was polled by a number of entire states in 1916.

What Advances During Week Due to Farm Strike

Chicago, Oct. 30.—Attention given to farm strike reports has had little effect on the market here. The market was a week ago, when this morning was 6 1/2% higher, corn up 1/2% and oats up 1/2% gain in 10 days. In proportion the net difference varied from 1/2% to 1%.

Before the interest of wheat traders became focused on farm strike news, wheat was making a steady advance, that as low as \$1.50 a bushel had been bid for wheat in the market here. The result was a sudden ascent of prices, including an extra 1/2% in wheat for the December delivery. Moderate gains followed in other grades of wheat. Subsequently, frost reports from Argentina have risen to a few points in value. With bullish sentiment further stimulated by a report of an official authority that the farm strike was serious, the buying of corn helped to give a decided strength to wheat.

Financial

The New York Times. By ALEXANDER DANA NOYES. Chicago Tribune—Omaha Bee—Today's Weekly statement of the New York associated banks showed the previous Saturday's deficit of \$25,000,000 under the required reserves, to have been replaced by a surplus of \$13,000,000. This is the usual sequel under the federal reserve system of the four deficits in 1919, occurring respectively on June 2, August 21, September 21 and December 20, and the six in 1920 to date, occurring on January 10, March 20, July 24, July 31, October 2 and October 23.

A deficiency has been repeated in an immediately subsequent week only on one occasion. The private banks are always able to cancel such a deficit through pledging their mercantile collateral at the reserve bank and leaving the resultant credit as additional reserve against their own deposits.

Last week the surplus was restored almost wholly through addition of \$7,000,000 to the position, both of the private banks and of the reserve bank. It is interesting to recall that the New York banks have already reported more weekly deficits than for any year since 1914, 1917 and 1919.

Nothing more noteworthy occurred in the stock exchange, where advances and declines, mostly fractional, were interspersed without evidence of any uniform trend. The market was a week ago, when this morning was 1/4% higher, stock up 1/2% and oats up 1/2% gain in 10 days.

Market, Financial and Industrial News of the Day

Chicago Grain

Chicago, Oct. 30.—Weakness in wheat and strength and higher prices in coarse grains were features in the grain trade today. Wheat had its advance early, followed by a reaction, while corn and oats advanced to the highest prices of the week. At the close, corn was 3/4 to 2 cents higher, October leading, while oats were up 1/2 cent, and wheat was 1/2 to 1 cent lower.

Although efforts were made to keep prices down throughout the week, the close recorded gains on all grains, with wheat up 3/4 to 8/8 cents; corn, 3/4 to 4/8 cents; and oats, 1/2 to 3/4 cents; rye 7/8 to 8/8 cents; barley 7/8 cents as compared with the previous week. Last week 10 to 15 cents, the latter on October 15, 1919, with October leading, while port prices 20 to 25 cents.

Wheat prices were the highest early in the day on buying of cash futures, while at the inside they were 2 to 3 cents lower. Receipts were 10,000 bushels, which so far has not created any artificial enthusiasm.

Export buying was light and seaboard bids were out of line. Private cables for wheat were 1/2 to 3/4 cents below the top being 1 cent above Friday's finish, while at the inside they were 2 to 3 cents lower. Receipts were 10,000 bushels, which so far has not created any artificial enthusiasm.

Corn had independent strength and helped to make a better feeling in wheat at times. Local buying was as usual, commission house support was a factor in keeping prices up. Receipts were 10,000 bushels, which so far has not created any artificial enthusiasm.

Oats advanced to the best price of the week in the day on buying of cash futures, while at the inside they were 2 to 3 cents lower. Receipts were 10,000 bushels, which so far has not created any artificial enthusiasm.

Omaha Grain

Omaha, Oct. 30.—Demand for wheat was fair with the market unchanged to a cent higher, bulk of offerings in the best grades bringing a cent advance over bulk prices yesterday. Corn ranged 2 to 7 cents higher, white at the extreme advance, yellow 2 to 3 cents up and mixed about 1 cent higher. Limited offerings were largely the basis for higher prices. Oats advanced a cent. Rye was unchanged to 1 cent up and barley firm. The demand for barley was unusually good today.
