

Auto Sales Firm To Sell Maxwell, Chalmers Auto

W. R. Hunter, Formerly With Mid-City Motor & Supply Company, to Manage Omaha Auto Sales.

"We have accepted the franchise to sell both Maxwell and Chalmers cars because we believe that they offer the motor car buyer the best value in their respective classes," says W. S. Johnson of the Omaha Auto Sales company, which will distribute Maxwell and Chalmers cars in the Omaha territory in the future.

WALTER S. JOHNSON

The Maxwell, at its present price, in our opinion, absolutely the soundest value offered the public today. And the Chalmers' consistent record for fine performance and mechanical stability impresses its worth on the careful buyer.

Guarantee for Future.

"And back of these two good cars is a new and powerful organization, headed by trained automotive executives, whose reputations are a guarantee for the future of this business."

"We feel that Maxwell and Chalmers cars are to assume the place in the automotive world to which their goodness entitles them. We are assured that the good Maxwell is to have a continuance of the goodness which has stamped it as a wonderful car, and this assurance is backed by the reputation of Walter P. Chrysler, as a manufacturer of motor cars."

In Largest Plants.

"Mr. Chrysler has clearly demonstrated in the largest plants of the industry that he is a strong executive who thoroughly understands quality manufacture, and we have a strong faith in the Maxwell and Chalmers because of his connection with the new organization."

"The strength of the new personnel is evident in the selection of Arthur E. Barker as general sales manager. Mr. Barker brought to his new office a wide knowledge of automobile merchandising that we feel will be of distinct benefit to all dealers selling these cars."

Has Been Selected.

"We desire to become acquainted with all Maxwell and Chalmers owners in Omaha and will appreciate their calling."

"W. R. Huntington, formerly with the Mid-City Motor and Supply company, has been selected to manage the affairs of the Omaha Auto Sales company."

REBELLION IN STOMACH

"Pape's Diapiesin" at once ends indigestion and Sour, Acid Stomach

Lumps of undigested food cause pain. If your stomach is in a revolt; if sick, gassy and upset; and if that you just ate has fermented and turned sour; head dizzy and aches; belch gases and acids and eructate indigestible food—just take a tablet or two of Pape's Diapiesin to help neutralize acidity and in five minutes you wonder what became of the pain, acidity, indigestion and distress.

If your stomach doesn't take care of your liberal limit without rebellion; if your food is a damage instead of a help, remember the quickest, surest, most harmless stomach antacid is Pape's Diapiesin, which costs so little at drug stores.

Indian Scout Breaks Long Distance Record

Riding his Indian Scout over the classic road course at Sale, Victoria, Australia, H. A. Parsons set a new world's road distance record, as well as a new figure for Australia, on August 28. In 24 hours over the varied surfaces of this course, Parsons covered 1,141.2 miles without trouble of any kind. His new record is over 250 miles better than that of Korner, the previous holder, who used an English machine, and betters the marks set for 6 cubic inch machines.

Parsons also set a new 12-hour record of 579 miles and substantially bettered the previous intermediate figures from one hour upward. He covered the last 10 1/2 miles in 11 minutes, which showed that the veteran Australian and his mount were still going strong at the completion of his "twice round the clock" record grind.

The trial for the record was commenced on the night of August 27 under the supervision of the Victorian Motorcycle Club, the leading body of the commonwealth of Australia. Parsons used a standard model of the Indian Scout and finished with it running even better than at the start.

Device Found to Stop Brake From Skidding Wheel

Means of Avoiding One Brake Acting More Quickly Than Other Has Been Developed.

Motorists, who have experienced the skidding due to having one brake act more quickly than the other will probably be interested in knowing that a means of avoiding this annoyance and danger has been developed. At present, it is found in only the Lafayette, which is handled locally by R. W. Hayward, who explains the device as follows:

"The Lafayette's brake equalizing differential is mounted on the rear of the transmission and operates on the same principle as the rear axle differential. It is completely enclosed, trouble-proof and insures unparalleled positiveness and equality of brake operation on both rear wheels and in both sets of brakes.

"The result in the eliminating of skidding materially increases the safety of operation. Largely as a result of the fact that the brake rods fulcrum at a common center with the torque tube, the Lafayette driver does not experience that chattering of brake bands and drumming of rear wheels on earth when the car is brought to a quick smooth stop."

Leaky Piston Rings

A good check on the condition of the piston rings may be had by feeling the crank case. If it is hotter than usual it is probable that there is leakage past the rings, which either are worn or stuck in their grooves because of carbon deposits.
