

Mothers Forget Bible for Movies In Naming Them

Zachariah and Absalom Fade Into Oblivion In Favor of Douglas and Wallace.

Is there anything in a name? It seems to be a matter of opinion. Some people believe that certain names are meaningful and that other names are meaningless.

It was a custom years ago to go to the Bible for names to be conferred upon the children of men. Nowadays it frequently happens that the movie ads are scanned for a name to give the last born or the first born, whichever it may be.

In the olden days the pater familias reverently took down the family Bible and inscribed therein the name of Joseph, James or John, or Abel, Abraham, Adam, Absalom, Paul, Daniel, David, Peter, Mark, Timothy, Immanuel, Isaiah, Isaac, Jacob, Jeremiah, Job, Noah, Philip, Saul, Samuel, Simon, Zachariah, Thomas or Solomon.

Scan the list of names of great men and it will be noted that many were given their biblical names for Bible characters. There were Abraham Lincoln, Samuel Tilden, John Paul Jones, Paul Revere, Noah Webster, Daniel Webster.

Now It's the Movies.

In other days, if the proud parents thought their infant son was destined to be a great preacher, they named him Paul, after the great preacher of Tarsus. Nowadays, if a young hopeful gives evidence of agility and ambidexterity, his parents name him Douglas, for Doug Fairbanks.

An examination of the birth records in the health commissioner's office shows that the majority of Harold Lloyd, Wallace Reid, Rocco Arbuckle, Lionel Barrymore and other movie heroes will live on in the names of some Omaha boys.

Baby girls in Omaha are being named for Norman and Constance Talmadge, Madge Kennedy, Eileen Percy, Blanche Sweet, Betty Blythe, Marjorie Daw, Mildred Harris, Anita Stewart, Pearl White, Mary Miles Minter, Shirley Mason, Miriam Cooper and others.

Directories in Years to Come.

Omaha directories of the future will contain such names as these: House, Peters, Smith, Tom, Mix, Jones, Harold, Lloyd, Harrison, Charles Ray, Peterson, Wallace Reid, Williams, Lon Chaney Brown, Buck Jones Gray, Douglas MacLean Swanson, Will Rogers, Murphy, Marshall Neilan Palmer.

Huge Increase in Production of California Oil Wells.

Los Angeles, Nov. 19.—Speeding up production to the highest possible pitch in view of the ever-increasing demands of the oil industry of southern California, bids fair to contribute this year to the world supply approximately 10,000,000 more barrels than last.

Reports show that more than 1,000 new wells are spouting the wealth-producing fluid in this section this year.

Place last year's production here at Government and refinery figures 97,204,836 barrels and the value at \$132,000,000. According to H. H. Maxson of the Independent Petroleum Marketers' association, if the present average production holds up approximately 108,000,000 barrels will have been produced in the southern California fields by January 1.

Movie "Prop" Room Has Anything in Store From Stuffed Pelican to Flimsy Cobweb

By ADAM HULL SHIRK.

There are two institutions which for their infinite variety are almost on a par: One is the lost property office of some great railway system, the other is the "prop" room of a motion picture studio. One is a testimonial to the catholicity of forgetfulness, the other to the patience and ingenuity of the property master.

I recently toured the prop rooms of the moving picture studios in Hollywood, Cal., as representative of the art of accumulating useful articles, being one of the biggest and most complete departments of its kind in the world. An entire concrete structure is devoted to the purpose—a building of great expanse and with two floors occupied by the most heterogeneous collection of articles I have ever seen assembled anywhere.

The average country department store is the nearest thing to it in actual business life, yet this contains only a tithe of what may be found in the prop room. For there, anything may be of use. The problem would be, not what to throw away, but what not to throw away.

Furniture Galore.

It must be remembered that when a set is being dressed for a photograph scene it may be of any kind, of any period, of any character or degree of wealth or poverty, in any country. What makes up, for example, the contents of your living room? Try and recall offhand what it contains and then reflect that the property man has to be provided against.

Your table has on it perhaps books, papers, letters, an ink well and pens, writing paper, paperweight, a standard lamp, odds and ends of every sort. The mantle possibly has vases, a clock, bric-a-brac and so on; there is possibly a stand with a goldfish globe or a bird cage may hang against the wall. The same obtains in each room of the house—gathered into one pile—as you have doubtless discovered on moving day. This would make a formidable array of odds and ends, exclusive of the actual furniture, which is not to be considered in this article.

has its own prop man or boy. He is responsible for the properties used—the hand props, meaning the small articles, and the ordinary properties, which are more bulky in character. He has his special locker in the prop room containing his "carrier" bearing the name of the director and which is wheeled out to the set when work begins and replaced at night in the locker.

I walked with keen interest through the long aisles of the building noting the innumerable articles; here are a few items taken at random: A suit of Japanese armor, a stuffed pelican, a stuffed mountain sheep, a life-size doll, snow shoes, crutches, cigar store Indian (one of the few in captivity), a stuffed fish, a gigantic mail box, toys of every

kind, statuary, books, whole libraries of them; vases, clocks from smallest to largest size, jewelry, dishes, match safes, combs, champagne buckets (not used much nowadays), etc.

The property construction department makes everything that is required, and which is not obtainable elsewhere. It can turn out a replica of the Venus De Milo overnight, and build a miniature of the Taj Mahal or the ruins of Pompeii without turning an eyelash. Recently a producer wanted some bats, not base ball, but the vampire variety. It took three days and a trip of 30 or 40 miles to find a cave where these bats hung out—or in—literally. But they got them. Cobwebs are used frequently for scenes in old attics, etc. These are gathered

ITCHING ECZEMA DRIED RIGHT UP WITH SULPHUR

Any breaking out of the skin, even fever, itching, eczema, can be quickly overcome by applying a little Mentho-Sulphur, says a noted skin specialist. Because of its germ destroying properties, this sulphur preparation instantly brings ease from skin irritation, soothes and heals the eczema right up and leaves the skin clear and smooth.

Directors' Troubles.

A director may ask for anything. That is, the scenario writer probably asks first in his script. Then the prop man gets busy day real earnest. It may be a copy of the first edition of the Koran or a circus hoop. He gets it—somehow. If he doesn't he is a poor prop man. Talk about a reporter getting what he is sent for—the property man can't even use his imagination. He has to give concrete evidence—show, deliver the goods. And he usually has to do it in a hurry or there's trouble. If the bottle of eau de cologne isn't on Milady's dresser, the star may have a little temper on tap to use on the director, who in turn loses the balls of his wrath on the assistant director, who takes it out on the prop man, probably so that usually there is never anything missing.

The strangest things imaginable find their way into the prop rooms of the studios. Some day you will wonder what happened to that old basket of wax flowers you put down cellar! You will very likely find that your husband sold it to a prop man. Maybe you've lost anti-macassar—look for it at the studios. No old clothes or rag-bottle-sacks man of history ever bought more diligently for the flotsam and jetsam of life than the property man. He pounces with joy on the thing you were about to consign to the trash heap. Maybe it is only an old broken down baby carriage. But it will fit into some picture admirably. It is hard to make things look as old as they should some times. So real antiquity is a great thing.

Animals, Too.

Live props—such as the bats—are a great bother. Sometimes it is a cub lion or a young fox that is needed; again merely rabbits or pigeons. A bear is in frequent demand and goats are always useful. Dogs and cats are at all times necessary. There are hundreds of felines at the Lasky plant. They are of all kinds and styles. In one picture the director required a family of newborn kittens to be discovered in a disused oven. They were there—the prop man had a lot of such families on his list and seized the amazed mother and her progeny before the latter had their eyes opened to the light of this strange world.

They were indignant, but the results were satisfactory.

Foreign stamps and postmarks are frequently necessary, and these are gathered from the fan mail received by stars and leading players.

The graveyard of cast-offs is surely the prop room. But do not imagine there is no fine or valuable stuff stored away there—on the contrary, many thousands of dollars worth of splendid furniture, draperies, rugs, articles of virtue, etc., are listed and kept carefully under lock and key against possible loss by theft.

It's a great institution—the movie prop room.

Huge Block of Marble Ready For Statue of Noted Cardinal

Rome, Nov. 19.—(By Mail)—An enormous block of Serravezza marble, drawn by 16 stout horses, made

its entry the other day in the Vatican garden and after a difficult maneuver, was deposited in the studio of the sculptor, Signor Quattrini. The latter has been commissioned by Benedict XV to execute the monument in memory of the late Cardinal Rampolla, Ivo XIII's famous secretary of state, for whom the present pope entertains sentiments of special devotion, having been a miniature clerk under the late cardinal.

When Signor Quattrini was modeling the statue in clay his holiness often visited him at the studio quite informally, watching the progress of his work and occasionally giving suggestions, as the pope possesses a very keen sense of art criticism.

The monument which will be placed in the basilica of Santa Cecilia, in the Trastevere quarter, which was the cardinal's titular

church, will be six meters in height, the statue alone measuring two meters. It is a real work of art and a valuable addition to the monumental treasures of the Eternal City.

"I tried a cake of Cuticura Soap and a box of Cuticura Ointment. By the time they were gone her face and head were healed." (Signed) Mrs. Mollie Fry, Hest, Missouri.

Daily use of Cuticura Soap, Ointment and Talcum usually prevents skin troubles.
