

SLEEPY-TIME TALES THE TALE OF FATTY COON BY VICTOR SCOTT BAILEY

CHAPTER XIX. Fatty Grows Even Fatter. When Fatty Coon's burned feet were well once more, the very first night he left his mother's house...

He was thirsty, then.

his neighbors might have found that there were good things to eat about the camp. And Fatty wanted them all. To his delight, there were goodies almost without end.

fect. He felt very queer. There was a strange, tight feeling about his stomach. And his sides were no longer thin.

Now, there was some printing on the outside of the box which held those queer, spongy, flat things. Of course, Fatty Coon could not read, so the printing did him no good at all.

EVAPORATED APPLES. Now, evaporated apples are nothing more or less than dried apples. The cook of the loggers' camp used them to make apple pies.

soaked them in water so they would swell. Now you see what made Fatty Coon feel so queer and uncomfortable.

But he did it, though it cost him a few groans. And he frightened his mother, too. "I only hope you're not poisoned," she said, when Fatty told her what he had been doing.

Poor Mrs. Coon was much worried all the rest of the night. But when morning came she knew that Fatty was out of danger.

it because of something he said. It was this: "Oh, dear! I wish I had something to eat!"

I'M THE GUY

I'M THE GUY who steamfaced round his office. Well, what of it? I'm the boss, am I not?

Of course, I do most of my yelling at the girls and young boys. They need it most. They wouldn't do a decent day's work once in a month if I wasn't howling my lungs out at them all day long.

Why is it, I don't bawl out the men? They don't need it. They do their work. No, I am not afraid of them, although I wouldn't care to have any argument with any one of them.

with the baby's hand, or his height with the baby's height. He will learn in time. Bloomers. These articles of apparel, now so universally used, were invented by a Mrs. Bloomer, from whom the name is derived.

Parents Problems

How can an affectionate, but rough boy of 7 be taught to be more careful in handling his little sister of 2, of whom he is very fond? The little boy should not only be told how much smaller and less strong than his little sister is—this should be demonstrated to him by letting him compare his hand

with the baby's hand, or his height with the baby's height. He will learn in time.

Where It Started

These articles of apparel, now so universally used, were invented by a Mrs. Bloomer, from whom the name is derived, in the nineteenth century.

Shopmen Laid Off

Galesburg, Ill., Dec. 28.—Twenty-five per cent of the employes of the Burlington road here are to be laid off the first of the year, according to orders sent out today.

San Francisco Dear Folks: Early this morning a big party of us went down to Fisherman's Wharf to see the fishing boats come in through the Golden Gate with their catch for the day's market.
