1. New Union Passenger Station.

 Continued improvement of the Ne-brasks Highways, including the pave-ment of Main Thoroughfares leading into Omaha with a Brick Surface.

A short, low-rate Waterway from the Corn Belt to the Atlantic Ocean. 4. Home Rule Charter for Omaha, with City Manager form of Government.

THE ELECTRIC LIGHT BILL.

The appearance of House Roll No. 1, by Druesedow of Douglas county, lifts the curtain on another act of a drama which has been continuous before the Nebraska legislature for many terms. Yet-because there are many new members in the lower house and because this bill does not do what many assume it does-a word of explanation may be of service.

The bill proposes to give the Metropolitan Water District of Omaha power to submit to the voters the question of whether or not bonds shall be issued to construct a municipallyowned electric fighting plant. On its face it would imply that such action is needed in order to permit the city to have its own electric lighting service. But the truth is that the city already has power to acquire the existing plant, as it did the gas plant, or it may build its own independent and competing establishment.

The present law provides that the city commission may submit the issue to the voters at any time. The present law would authorize the Water board to conduct the election. That is the only essential change. In either case the Water board would build or manage the plant. In either case the voters have the power to enforce their will.

Legislators who are called upon to vote upon this question should understand that the principle of municipal ownership is not involved. The people of Omaha have the power in their own hands whenever they care to exercise it. They elect the city commission just as they do the Water board and they can make one responsive to their wish as readily as they world in which there is to be no more war. can the other. No good reason has yet been advanced for asking members of the state legislature to devote their time to a bill which merely transfers this authority.

A Test of the War Spirit.

The calm manner in which Americans seem to be taking the killing of an American naval officer by a Japanese sentry at Wladivostok. Siberia, ought to be reassuring to those who have feared for some months a breach between the two nations. It is true that the Japanese who are patrolling this Russian port have no busi ness there, and that the killing of Lieut. Warren H. Langton is utterly unjustifiable. Yet no overheated appeal to American honor to resent this affront in a way to awe the Orient has found currency.

Many wars have been started on grounds not less tenable than this. It is not so much the deed in itself as the injury to national pride that sometimes results. The death of an Austrian arch-duke was preliminary to the

The action of Germany and Austria in demanding the abrogation of sovereignty from Serbia in this instance made peace impossible without accepting national dishonor. Questions that affect the honor or pride of nations have aroused wars just as has the more practical desire for territory or other material conquests. Nations fear above all things the loss of

prestige, but thus far the case of the killing of the American naval officer has been handled in such way that neither nation can feel insulted. It is after all, a real test. If either Japan or the United States contemplated going to war in the future, the opportunity that now opens up for breaking off relations is probably the best that could be found. The fact, that thus far neither government has shown anything but the finest courtesy and consideration for the other gives hope of peaceful and unbroken intercourse.

Using Home Products.

A housewife who recently ordered some canned corn from her grocer chanced to glance at the name of the canning factory that put it up and was surprised to find that it came, not from the fields of the middle west, but from New England. If was good corn, but not more meder or succulent than that grown right in Nebraska. Ehe was quick to reason that Maine did not raise any more corn than its own population could consume, and that while she was cooking coorn on which freight had been paid half way across the continent, in some New England kitchen another woman was using corn irom Nebraska.

It was of wasteful methods of distribution such as this that the farmers spoke in their recent meetings at Lincoln. Native apples are shipped out and apples from Washington and Oregon shipped in, raw materials are sent east and brought back a thousand miles in the shape of finished goods, all to the ultimate expense of the consumers, and certainly not to the ad-

antage of the producers. Using home products is a practice that on the face of it promises real economy. A real step toward this sensible habit is being taken by the play stores that have been established in almost 40 Omaha schools. Counters and shelves there are loaded with a variety of products manufactured in this city, and the children are, while

learning something of the methods of buying and selling, familiarizing themselves with home products. School days are over for many of us, but it is not too late to learn that things made in Omaha or grown in Nebraska are just as good as similar ones brought from overseas or from the ends of the continent, and that eventually the building up of home industries will result in cheaper living costs.

Ready to Redeem a Promise.

When Mr. Harding promised the world last summer that he would try to evolve a substitute for the League of Nations, the hoot of derision from the advocates of the Wilson plan was tremendous. However, it is now accepted that the scepticism of the president's partisans was not warranted. A plan has been formulated, at least in its main outlines, on which eminent Americans agree, and which will be offered the world by the next president of the United States. Jacob Gould Schurman, former president of Cornell university, a recognized authority on international affairs, and a diplomatist of experience, spent some hours with the incoming executive at Marion last week, and went away convinced not only of the feasibility of the plan, but of its workability. Dr. Schurman sums up the plan under four general headings, thus:

First-The codification of internation! law in order that innumerable clouded and disputed precedents, treaty provisions and unwritten understandings may be clarified in the interests of peace and humane relationship

among the nations.

Second—The establishment of a world court before which can be taken and adjudicated such disputes among nations as do not touch national honor and which otherwise are

fusticiable.

Third—The organization of a world conference which would be able, in a spirit of conciliation, to arrange disputes among nations that are beyond the reach of codified

international law.

Fourth—The advocacy by the United States of a program of disarmament. Dr. Schurman, thinks Mr. Harding will not announce his plan until sometime after he has taken office, because of the changing conditions in Europe, which make it mexpedient to lay down a fixed policy immediately. However, it is certain that no trivial matter will delay the statement of America's atitude towards the world. Congress is preparing a resolution which will empower the president to call a conference on disarmament, and this will probably be presented to Mr. Harding soon after he has taken office as president. Mr. Wilson has signified his purpose of allowing all such matters to be deferred until his successor is inaugurated. Nothing will be jeopardized by such action, because it is almost certain that the time between now and March 4 will be occupied by Europeans in maneuvers for advantage, such as have been going on for months over there. It is our moral influence that counts, we are told, and if this true, the fact that such an invitation will be sent to the powers by the United States may have much the same effect as if it were actually dispatched, at least so far as the

preparatory steps are concerned. What is of real importance is that the Harding program has been well digested, and that it does meet the approval of men of ability and experience, who have talked with and counselled its proposer. It will be offered to the world as the sincere expression of an earnest desire on part of the people of America to establish a The idealism of Woodrow Wilson nothing through being worked over by the practical mind of Warren G. Harding.

The High Cost of Farming.

The idea that anyone who failed in other work could take up farming and do well long ago was exploded, but there are still many people who think it possible for others to go back to the land with little capital if only they have some expert knowledge or real industrious-

How much does it take to set up farming? Investigation carried on in Saline county, Missouri, by the state agricultural college indicates that capital is just as important in the rural districts as in the cities. Few men, it was found, could own land and farm with less than \$5,000. Those having from \$5,000 to \$20,000 found it advisable to own some land but to rent most of that which they farmed. The first call on their resources is for proper equipment, with what-

When farmers have capital of from \$20,000 to \$40,000, then it was found they were able to own all the land they tilled. Those with more than \$40,000 usually rented out some of their land. Just as in every other business, there are farmers with similar amounts of capital whose profits vary widely. Skill in feeding cattle, in cutting down losses from hog disease, and efficiency in methods and equipment puts one farmer in the successful class, while lack of some of these qualities might leave his neighbor profitless. At 1919 crop prices, with land values as they were in 1914, the labor incomes of the more successful of these farmers should have been practically doubled, it is estimated. How-ever, at 1919 valuation of land and crops, returns were less than in 1914, and in the present year not even the most successful are said to have succeeded in making interest on their investment alone, to say nothing of the labor return.

New York police, who found a family of six starving to death in a tenement, might report this to some relief agency over in England that is interested in alleviating misery and suffering in foreign lands.

Mary Garden, as director of the Chicago Grand Opera association, probably will be able o supply all the temperament needed by the

Those who object to Mr. Harding smoking should have voted for a lady president-but then they probably would have asked her to renounce rouge and powder.

By the time congress finds a remedy for the nation's present affliction the disease probably will have cured itself.

Dickens' Characters. It seems surprising that the names of Dickens' characters, odd though they were, should be found in real life, for it was from life should be found in real life, for it was from life that many of them were taken. Some, as is known, were copied from the names of signs over business places, but that was not the novelist's only source of selection. John Forster, his biographer, found among his papers a carefully drawn list of names, with the sources from which he obtained them. Some of the names are too extravagant for anything but reality: Jolly Stick, Bill Marigold, George Muzzle, William Why, Robert Gospel, Robbin Srubban, Sarah Goldstacks, Catherine Two, Sophia Doomsday, Rosetta Dust and Sally Cimblett.—Chicago Journal,

Chicago Iournal,

SOME CLASS.

(From Detroit Saturday Night.) We are one publication west of New York who feel a great interest in the review of books, first, from the standpoint of our readers, everyone of whom are a class.

Atlas, How True!

(G. B. Street, in The Nineteenth Century.)

The prophecy that the experiences of the war would tend to break down, distinctions of class has been justified on the whole, but apart from that we have been growing fro long so like one another on the whole, but superiority tend to absurdity. Only the very old-fashioned keep them up. The monotony of communism is never likely to be ours. One man is more powerful, one richer, one has man is more powerful, one richer, one has better brains, and their fellows treat them accordingly. But more "social position" is not a matter about which many reasonable people are still concerned

CONSIDERING international relations to-day, one realizes that the years 1914-18 were an era of good feeling.

VOUS AVEZ MIS DANS LE MILLE. Sir: My mind seems to run on the affairs of Hinton, Farrell & Co. jately, but the scribes, in reporting the latter's soliloquy after his left to the former's jaw, have it thus: "It was evident from what he told the newspaper men that he considered his 25 years of service as a member of the navy imputed and his condict as a gentleman insuited."

gentleman insuited."

Can it be, I ask myself, that he also considered his uniform expunged? In that case 'twould seem that his mental counterpoise we're in perilous juxtaposition to the suicidal and that every effort should be made to foreclose such a denounement, n'est-ce pas?

D'ARTAGNAN. Why Copy Readers Go Wild.

Sir: Trying to lick into shape a story of an advertisers' convention I ran across this from one of my reporters: "The program then disbursed with pleasing musical numbers." You say it for me.

G. D. NEENAH, Wis., is not a large city, but things are done there on a onsiderable scale. This week a "big gigantic shoe sale" is going

A PLEASANT TIME BEING HAD. (From the Litchfield, Conn., Enquirer.) Henry and Fred Clock were over from New Britain and spent the week-end with their parents, Mr. and Mrs. Eigin Clock, in Litchfield.

Stung!

Sir: The almond-eyed waiter came to my table, in the Chinese restaurant, and asked "Sherry?" To which I glibly replied, "Sure! I'll have some." "Will you step to the 'phone, please, sir," he then requested. Right away I suspected a trap, but after some hesitation, took up the 'phone, "Is this Mr. Cherry?" SIM NIC.

We rather fancy this sign, which a reader reports from Jamaica: "Abraham, Jeweler, Not connected with any other Abraham." connected with any other Abraham.'

WILL IT NOT, INDEED! Sir: The announcement that C. M. Shiver is advertising manager of the Superior Underwear Company may retard sales in January, but what a splendid argument it will be in July!

AN IOWA OASIS. (From the Albia Republican.) Mrs. C. Double of Avery was visiting in Albia this week.
ADD Small Town Stuff: the impending inauguration in Washington.

Very Convenient. An Eldorado little girl, walking past the county jail the other day and noting the garage provided for the use of the sheriff and his deputies, said, "Isn't it nice to have a garage all fixed up so men can leave their cars in it when they go to jail?—Kansas City Star.

Nations Like People. Jud Tunkins says nations are a good deal like individuals, each hoping everybody else is going to be as unselfish and confiding as possible.—Washington Star.

No Heart. A profiteer was shot the other day in the left breast. But the bullet did not penetrate his heart. He hadn't one.—Manitoba Free Press.

ABOUT SMALLPOX.

Several years ago this column prelicted an outbreak of smallpox at Niagara Falls during the following winter. The epidemic arrived on schedule time and the state board of health found it necessary to step in, take charge of Niagara Falls and vaccinate practically the entire town. During the last year when small-

pox was raging in southern Ontario. Niagara Falls, relatively secure against the disease yet surrounded by infected communities, must have been grateful to this column for the service rendered them several years

For months we have repeatedly t was evident that the disease was be unusually prevalent this winter. since the smallpox season holds on until July 1 there remains considerable time to repeat these warnings.

Many letters are being received isking us as to the efficacy of vaccination. The charges of inefficiency made by the various healing cults lined up in the anti-vaccination socleties apparently are getting more of wild and wooly statements.

are made immune for life, but no and read Bishop's book on the heart.

Research indicates that the danger smallpox becomes fairly considerble five years after successful vaccination. However, in health deportment practice it is assumed that one s fairly safe for seven years after successful vaccination. When the vaccination is unsuccessful, there being not vesicle or ulcer due to pus

Let us also understand that smallox vaccine easily becomes inert. If

pox vaccine easily becomes inert. It kept too long or tob hot or in a place that is too light or exposed to the air it quickly becomes inert.

They have just gone through an epidemic at Glasglow, among thee good, hard headed old Scotch people who need to get bumped occasionally in order to learn a thing or two. They cared for 477 people with smallpox n their hospital.

Of these 128 were children under

15, of whom 99 were unvaccinated and 30 were vaccinated in infancy. Of the 30 vaccinated in infancy none died. Of the 128 never vaccinated 32. or 33 per cent, died. Of the en-tire 477, 364 were vaccinated in in-fancy and of them. 54, or 15 per cent, died. One hundred and seven were never vaccinated and of these 38, or 35 per cent, died. No nurse, physician or other attendant working n the smallpox hospital contracted

to your kidneys! Physicians agree that many of the worst cases of kidney trouble are the result of some infectious disease. Too often the kidneys are neglected because the sufferer does not realize they have broken down under the strain of filtering the diseasecreated poisons from the blood. That's why so many people recover from infectious diseases only to find themselves victims of serious kidney ailments. Don't risk this neglect! If your back is bad, your kidneys act irregularly, you have headaches and dizzy spells, and feel weak, tired and all run down, help the weakened kidneys with Doan's Kidney Pills. Doan's have helped thousands. They

should help you. Ask your neighbor! These are Omaha Cases:

Forty-Third Street.

J. P. Johnson, painter, corner #3d and Vinton Sts., says: "Some years ago my back was so stiff I couldn't bend over enough to put my shoes on. My kidneys would act four or five times during the night and the secretion; were highly colored. Sharp pains would eatch me in my back and I could hardly move. I read of Doan's Kidney Pills, so I got a box. They gave me relief and I have only needed them ec-casionally since." South Seventeenth Street.

Mrs. Chas. Appleton, 2818 South 17th St., sayst "Three years ago I was quite poorly, owing to backache and kidney disorder. I bagan saing Doan's Kidney Pills and quick relief followed. They acted as a tonic to my kidneys, giving them strength and correcting all the trouble. The successful trial of this medicine by affother member of the family gives us further proof of its merits, for the help we have derived from Doan's Kidney Pills has been of a permanent nature."

Valley Street.

Erhard Corneer, prop. dairy, 3510 Valley St., says: "I had kidney trouble and I know so much jumping on and off my wagen was the cause of it. There was a constant ache across much jumping on and off my wagen was the cause of it. There was a constant ache across the small of my back and kidneys and a soreness through my hips. My kidneys acted frequently and the secretions were highly colored. A friend told me of Doan's Kidney Fills and after I had used two boxes, my back and kidneys were strong. That is the cure that Doan's Kidney Pills gave me."

Doan's Kidney

Every Druggist has Doan's, 60c a box. Foster-Milburn Co., Mfg. Chemists, Buffalo, N. Y.
