#### Holding a Husband Adele Garrison's New Phase of Revelations of a Wife

How Lillian and Madge Began the Third Adventure in Earnest.

With a backward glance to see that no car was behind me, I turned my car around, drew up in front of the real estate office and parked. When I alighted and took the key from the ignition switch I heard Lik-lian's voice close to my ear in low. amused comment

"Will you walk into my parlor, said the spider to the fly?" She quoted softly. "Take a furtive glance as we walk past the place. I don't think we'd better go in the first thing."

I obeyed her and shaged her musement at seeing the eyes of two men in the real estate office fairly glued on us as we advanced toward he door. One of them started to his cet as we came abreast of it, turned bruptly, and whirled away from the door as we passed on.

#### An Obvious Posc.

"How they'd like to lean out and grab people who look like busers." Lillian observed maliciously. "It must be mighty hard on them to keep up this pose of proud indifference which they've adopted lately. Let's walk down around the corner here, and then come back. We've had a chance to give those men the once over before they begin to talk to us, which is always a strategic move." When we returned and mounted

the steps of the building, both men were busily engaged in writing or were pretending to be. As the door closed behind us the larger and older of the two men rose and looked at us inquiringly, but the other-a younger man, and the one who had sprung to his feet when we first passed the window-kept on writing. quickly surmised that the older and more experienced agent had cautioned him against showing any eagerness in greeting a customer. As the older man evidently intend-

ed to answer only when he was addressed, I spoke crisply.
"You advertised two places for

sale in Sunday's paper." "Ah, yes!" he said, warming per-ceptibly. "So we did. Mr. Bisgood," addressing the other man, "ah-those places are still on our list are they not, or did those last two purchasers put down their option? You see," turning back with an ingratia-ting smile to us, "real estate is turn-ing over so rapidly in this section that it is all we can do to keep track of our own lists. How about those places, Mr. Bisgood?"
"One is free," returned Mr. Bis-

A couple of thousand of miles From the westerly coast of Brazil, A half dozen green little isles Are peopled with cannibals still. And thither American traders resort, Who find it a paying vocation,
To sell to the King, who's a red-blooded sport,
The wonders of civilization.

His Majesty's strong for plug hats And satin pajamas and ties, Bass-drums and false teeth and mauve spats Are things that he greedily buys. But nothing the traders have got to display Can make him so eager and keen, As records of musical shows on Broadway

Spending a summer in Pleasant Valley was a small gentleman of the well-known Warbler family, who had so great a liking for worms that he was known as the Worm-eating Warblet. This tiny person spent little or none of his time in the treetops, but chose to stay near the ground. And more than once he had seen Grandfather Mole in Farmer Green's garden. He had heard somehow of Grandfather Mole's tastes and habits. And he was inclined to believe that it was Grandfather Mole that was to blame for the scarcity of worms in the neighborhood. It must be confessed that he felt none too kindly towards Grandfather Mole He thought it would be a good thing if somebody could persuade that odd, old chap to stay on top of the ground, instead of lurking most of the time below where he could catch the worms

Is "John Bull" the National Figure of England?

Just as Uncle Sam is symbolical of the United States and Jean Crapaud, with his exaggerated top hat and tightly-waxed mustaches represents France in literature and pictorial art, John Bull, bluff, hearty and heavy-set, is the national figure of England. Both he and his description date back to 1772, when Dr. John Arbuthnot wrote his po-litical allegory entitled "The History of John Bull", a book which caused a great deal of comment at

Dr. Arbuthnot's work was an admirable piece of satire, mercilessly ridiculing the Duke of Marlorough and voicing the disgust then felt at the protracted war against France. The nations at war are represented as tradesmen involved in a law suit, and their characteristics are skillfully portrayed, together with the devices used by Marlborough, as the principal attorney, to prolong the contest in order to meet his own ends. At the time of the appearance of the satire it was attributed to Swift, but it was later discovered that it was the work of Arbuthnot, and though this book itself has practically disappeared, John Bull, well fed on the roast beef of England, has survived more than two centuries.
