Silver bullion made another downward plunge, selling on today's London market for 35% pence per ounce, as against 3634 at last week's closing and 421/2 in the first week of January. Today's price was the lowest since November of 1916. So persistent a downward movement would appear to indicate emphasized reaction of call money on the Stock Exchange was a matter of almost per cent today for the first time since November, 17.

Money Rate Lower. Of itself, the difference between that rate and the lately prevalent 7 per cent is not important. It impressed the stock market today chiefly because of the remember today chiefly because of the rewith an average value of \$115.72 per head.

Opinion Not Shown.

It is impossible to say how far even a continued adverse verdict of the market would mean financial disapproval of the plan in itself, and how far it would mean only the market's doubt as to whether Germany could be induced to accept it. The German market which sold at 1.87c on Monday of last week, fell today from 1.79c to 1.55c, and exchange on pretty much all other central European markets declined with it. The plan of collecting the indemnity from an export tax undoubtedly opens up a many-sided problem. Even Wall Street could not agree today as to how it would work out practically or regarding its larger er economic implications, and experienced financiers, both here and in London, seem to be hesitant in giving opinion.

From the day's narrow stock market no opinion could possibly be extracted. Its movement was irregular and confused and its attention apparently fixed altogether or, the dividend possibilities of industrial companies or the price of oil. When the call money rate advanced in the closing hour, however, general reaction of prices followed.

Grain prices are so low that farmers have to sell three to five bushels of corn to get as much as one bushel brought a syear ago, while it takes a bushel of oats year ago, while it takes a bushel of oats ob buy & package of cigarets in western Nebraska. The weak buying power stands out above all other conditions. It is a case where canditions, not prices, are the governing factors. For the present the impression prevails that, economic conditions are against the friese.

No export depand was reported for cash wheat or corn and premiums on wheat at the gulf are working low. Sellers skeed 26c over March f. o. h. for February, 19c over for March and 18c for April loading without takers. There was some inquiry for No. 2. hard here from exatern mills, about 1½ 62c out of line.

Domestic shipping sales of cash grain at Chicago were 25,000 bushels wheat, 30,000 bushels corn and 50,000 bushels wheat, 20,000 bushels corn and 50,000 bushels wheat, 30,000 were 25,000 bushels wheat, 30,000 were 25,000 bushels wheat, 30,000 were 25,000 bushels wheat, 30,000 warde spring wheat was casier as compared with the March at Chicago. but other grades showed little change. New York, Jan. 31.—The market which was naturally watched to-day with the greater curiosity and interest was foreign exchange. Because that market, which would interest was foreign exchange that market, which would interest was foreign exchange. Because that market, which would interest was foreign exchange and reparations, had no full opportunity until today of passing on the practical merits of the Paris proposal. Sterling, francs and most of the other European exchange rates declined. But the foreign exchange market was by no means the day's only point of financial interest.

Money Talks

No. 14.

About the middle of the eighteenth century, Henry Fielding said, "A penny saved is a penny got."

If the penny of which he was thinking had been invested at 6%, with interest compounded semi-annually, it would have grown to more than \$100.00 by this time.

A penny invested gathers unto itself many another

What applies to the penny applies a hundred times as much to the dollar.

Saving is addition; investment is multiplication.
