Says Sales Tax Will Solve U. S. Revenue Problem

Prominent Jurist Cites Success Of System in Philippines; Farmers Convinced Plan Is Equitable.

By HOLLAND.

Lebbeus R. Wilfley, now a member of the New York bar, but formerly attorney general of Philippine islands and later judge of the consular court at Shanghai, China, is persuaded that were congress to enact a small tax upon all gross sales of goods, wares and merchandise of the kind commonly called a sales tax, then much of the needed revenue will be secured and almost all, if not entirely all, of the annoyances, unjust burdens and inequalities which are associated with

reason of his personal knowledge of the practical operation of the sales tax in the Philippine Islands. At the time when he was attorney general the government was brought and the processing the practical operation of the sales tax in the Philippine Islands. At the time when he was attorney general the government was brought agont packing Co.

Agor Bros. eral the government was brought face to face with a crisis in taxation and in finance. After much study of the question it was proposed to levy a sales tax. This proved to be unpopular. The people in the Philippines were opposed to it and demonstrated their opposition in an cmphatic manner.

Tax Successful.

Every one of the arguments which have been employed by those who oppose a sales tax in the United States were also employed in the Philippines with intent to resist successfully the enacting of a tax law of this kind. But the law was cn-swift from Smiley.

of this kind. But the law was enacted. It has been upon the statutebook for 16 years, and Judge Wilfley said it had been so successful from every point of view that it is now collected without a murmur from the taxpayer. In fact the government is now contemplating in-

creasing the tax to 2 per cent.

Mr. Houston, who was secretary of the treasury in the last year of President Wilson's administration, having had his attention brought to the adoption of the sales tax in the Philippines, caused officiel inquiry to be made of the Philippine government, so that he might learn whather the tax was really in successful operation there. In reply to his inquiry the statement was made that "the sales tax is the most satisfactory, accurate economical, productive and equitable tax in our system."

When the suggestion was made two or

economical, productive, and equitable tax in our system."

When the suggestion was made two or three years ago by Otto H. Kahn that congress provide for collecting a small tax levied upon every sale of commodities, he went so far as to say that his careful study of the subject justified him in predicting that if a tax of that kind were levied it would go far towards producing all revenue needed by the government. Some of the professional economists protekted, saying that a tax of that kind would cause endless difficulties and would be a source of great embarcasement to merchants, who would be obliged to collect it upon every sale.

League Organized.

League Organized. League Organized.

In order to overcome the opposition which was at first created by the proposition that a sales tax be levied, the Tax League of America was incorporated. Its advisory board contains some of the ablest merchants and bankers of the United States. It was a success from its organization. Undoubtedly it is partly due to this league that a change in sentiment respecting this tax has taken place. In fact that change is now acknowledged by Senator Watson and is recognized by Senator Smoot who is reported to have completed a draft of a tax measure of this Senator Watson and is recognized by Senator Smoot who is reported to have completed a draft of a tax measure of this kind which will be brought to the attention of congress son after that body is organized in April.

Judge Wilfley said this morning that public opinion is almost unanimous in opposition to the excess profits tax and to the excessively high sur-taxes. In this opinion he is supported by Thomas W. Lamont who recently characterized these taxes as "a dead hand upon business."

The proposed sales tax appeals to many intelligent persons is an excellent substitute for some of the schedules in the tax law which are now upon the statute book. It is simply a trifling tax on, the sale of goods at the moment of the transfer of the property from the seller to the buyer. Of course, it is collected and remitted to the government by the merchant, but is paid by the purchaser of imported commodities pays the tariff, because the tariff upon these commodities is added to the price of the article.

Tax Absolutely Equitable.

statute of the property from the sell-ser to the buyer. Of course, it is collected and remitted to the government by the merchant, but is paid exactly as the purchaser of imported commodities pays the stariff, because the tariff upon these commodities is added to the price of the article.

Tax Absolutely Equitable.

Furthermore, the tax is spoken of as being absolutely equitable.

Everybody pays an amount proportionate to his purchaser, thuges. The revenue will be constantly ficwing into the Treasury department, thuge Willieg suggests the tax be not over 1 per cent on all turn-overs and a persuaded that it will yield not less han \$2,000.009,000 and possibly as much 14,000.000.000 annually.

At one time the farmers' organizations re opposed to a sales tax. But these unizations have now changed theeir v and are reported to favor the tax is a fair of the command high over 1 per cent on all turn-overs and is persuaded that it will yield not less than \$2.000.000.000 annually.

At one time the farmers' organizations were opposed to a sales tax But these organizations have now changed their prices.

When the farmers' organizations have now changed their prices of the tax because they are convinced it is a fail 12.50 to 12.50 to

RECEIPTS CARS-

DISPOSITION-CATTLE

Cattle—Sharply lower prices for fat cattle were the rule on Thursday, and although receipts were not excessive, about 5,500 head, there was not sufficient demand to clean up the offerings even at prices fully 25c lower than Wednesday and in many cases more. Desirable light cattle and yearlings were wanted, but anything heavy was a drug on the market. Best cattle here was selling around \$3.00 \$\pi\$9.25. Cows and heifers suffered fully as much as the beef steers but there was no material change in the stocker and feeder trade. Compared with a week ago both beef steers and cow stuff, are closing unevenly lower.

Chicago Grain

By CHARLES D. MICHAELS.

Chicago. March 24.-A fair amoun of liquidation was on in grains with prices down to the lowest of the season and with liberal buying for profits and to even up for the holi day tomorrow. Breaks ran into buy ing orders while bulges brought out liberal selling and failed to hold in the extreme. News in the main favored a continuation of lower prices, but sentiment was less bearish and at the close sales of wheat futures were at net gains of 2 3-86 on March and 1-c on May, while corn was 1-8c higher, oats 1-8 to 3-8c up with May leading, rye 1-2 to 3-4c higher and barley unchanged.

higher and barley unchanged.

Crop news was favorable for wheat with the exception of a few green bugs reports from Oklahema and Missouri. They served as a scare among the shorts after the early break, and helped to make the bulge of 3½ c on May and 4¾ on March. This brought out increased offerings and priced reacted sharply with the finish at \$1.63 for March and \$1.41% to \$1.42 for May or ¾ to 1c under the higher point. The impression prevailed that the liquidation by longs has been thorough and that the bearish conditions have been well discounted for the time being.

Corn Considered Too Low. Corn Considered Too Low.

Corn Considered Too Low.

There is a general feeling among many corn traders that it is selling below its real worth, that is the feeding value is greater than the price it is selling for in the market. Those who work on this theory covered their shorts while others took advantage of the strong spots to sell more. Prices at their lowest were the lowest of the season with May down to 63½c and the close was at %c from the top as a rally of nearly 1c followed the break. No. 5 grades declined 1½c to 2c in discounts under May, being 11c at the last. Shipping sales were 115,000 bushels with arrivals 121 cars.

Heavy covering of oats to take profits and fair buying to remove hedges against cash sales combined with the advance in corn and wheat after the early dip brought oats to nearly the inside of the session. Crop news was bearish.

Seeding is about over in the southwest and is being delayed in the central west by ground being too wet. Cash prices were off 1c at the extreppe with the close firmer. No. 2 white ½c to %c over May with shipping sales 100,000 bushels and arrivals 58 cars.

Speculators were fair sellers of July fye in expectation of a low price for July wheat next week. Export houses were buyers of May and are said to have the market in their hands. Prices devended 1½c for May from the low point and closed at the top while July was up only ½c. Export saics were 15,000 bushels at 27c over May, track Baltimore.

There is a feeling among the most con-

Pit Notes.

We are open Saturday evenings until 10 o'clock.—Adv.

Grain Exchange to Study

Problems of Marketing Chicago, March 24.—Representatives of the leading grain exchanges met today to consider legislation enacted or pending in several states on the subject of marketing.

J. P. Griffin, president of the Chi cago board of trade, announced that no definite conclusion had been reached as to what action should be

Grain trade leaders declared that legislation prohibiting trading in contracts for future delivery would destroy the economic functions of the grain exchanges.

taken, but that a committee would

be appointed to make a survey and
