Cattle—Cattle were nominally steady inday. Receipts were only 120 head, not enough to test the market. Total for the week is 23,000, the lightest so far this month. All classes of beef and butcher cattle ruled higher at the start of the week, but reacted sharply on the close and by Friday the early gain had peen lost prices being 50@75c under the week's best time, or barely steady with a weak ago. Heavy cattle were very dull at the decline. Stockers and feeders held steady all week up to Friday, when prices showed declines of around 25c.

Flour Exports Heavy.

Buying of wheat against export sales was the basis for an advance of 2½ @3½ c, after an early dip. There was also said to be a lot of flour soid for export. Trade to be a lot of flour soid for export. Trade to be a lot of flour soid for export. Trade to be a lot of flour soid for export. Trade to be a lot of flour soid for export. Trade to be was reached buying subsided, and with increased offerings, prices receded and closed with the early builg lost, the last sales being at almost the inside.

Aside from the export news there was tuillish. The green bug scare is said to have worn itself out in the southwest. A crop expert from Texas says there is little darrage there after 60 days of activity on the part of the bugs. There were rains it parts of the west and at the same time Hutchinson, Kan, messages reported a 60 mile an hour dust storm.

Incliveries were 12,000 bushels.

The control of the financial markets was chiefly dispressed to the care of the car

Notes Cut Down.

Notes in circulation were cut down \$2,100,000 and the combination of large receipts of imported gold with \$24,000,000 addition to the New York bank's credit in the reserve system's central gold fund (a result of repayments by interior reserve banks) brought the New York institution's gold reserve no less than \$78,400.000 above that of the preceding week end.

Notwithstanding the half holiday coming between two full stock exchange holidays, today's stock market was reasonably active, its transactions running to more than one-half of those of Thursday. Changes in prices for the day were generally upward, with numerous advances of 1 to 5 points in the industrial groups and with the rallways' shares generally closing a fraction better. The usual tactives of concentrated professional selling of three or four industrial shares were pursued again, and in these cases, declines of 1 to 4 points were effected. But even these stocks closed considerably above the lowest and the effect of their face were not great.

Advances furnamber Declined.

Bonds and Notes

vious week, the general trend of the market is carier to discover. Last week recovery was not as rapid as that of the week before and the railway shares in particular, made no further net gains.

But advances far outnumbered the declines, running from 1 to 5 points in a large variety of stocks, with larger gains in a few shares of the quicker moving class and nearly all stocks show substantial recovery from the year's low trices, reached very generally during the second week of March.

The bond market was more irregular in its changes for the week, and gives no evidence of any distinct tendency. vious week, the general trend of the market Kansas City Grain.
