BLACKHEADS GO QUICK BY THIS SIMPLE METHOD

ADVERTISEMENT

Blackheads—big ones or little ones—soft ones or hard ones—on any part of the body, go quickly by a simple method that just dissolves them. To do this get about two ounces of calonite powder from your druggist—sprinkle a little on a hot, wet sponge—rub over the black-heads briskly for a few seconds— and wash off. You'll wonder where the blackheads have gone. The calonite powder and the hot water have just dissolved them. Pinching and squeezing blackheads only open the pores of the skin and leave them open and unsightly—and unless the blackheads are big and soft they will not come out, while the simple application of calonite powder, and water dissolves them right out, leaving the skin soft and the pores in their natural condition. You can get calonite powder at any drug store and if you are troubled with these unsightly blemishes you should certainly try this simple method.
