Experts Say Oil Supply of World To be Increased

While Some Districts Falling Off in Production. Many, New Fields Have Been Discovered.

By HOLLAND.

Forty years ago a few oil wells were driven in a district which since that time has become one of the largest of the oil producing fields of te United States. One who was influential in the high development of his oil field said this morning that he wells which he caused to be drilled 40 years ago continue to produce oil, although the amount of daily production for each well is not much more than a barrel of oil. But he is permitting these wells to continue their production, not because

much profit is found in that production, but because they are testing the life of the pool from which the oil comes.

On the other hand the corporation with which this man is identified has brought in wells in that district some of which have produced 40,000 barrels a day, although so large a production as this was not long continued. A few months ago a well drilled by this corporation yielded at first approximately 30,000 barrels a day. No one knew how long this P. G. Kerlog. No one knew how long this F production would be continued. It Mark might end suddenly. There might E. G. gradual diminution of the flow and in fact the daily output has decreased until the yield from this well now averaging 10,000 barrels a

Report Supply Decreasing.

Much interest has been caused by recent statements which intimate that the production of Nexican oil is rapidly decreasing these Mexican fields will be exhausted. Frobably they will be exhausted in time because sooner or later all oil pools are exhausted. But the wisset and most experienced of those who are engaged in the oil producing industry do not venture to make any prediction which would fix exhausted. They do say, however, that citier pools will be discovered and that years will pass before the Mexican yield from other districts. The Pennsylvania for one, where there has been heavy investment of capital, which now characterize the industry have been compared by conforming the industry have been compared by conforming the industry with the search which has been made show lists for gold and silver. The romances which showled are search which has been maked the industry have good understanding of the physical characteristics.

The operators in the oil industry have good understanding of the physical characteristics of the Mexican and the Gulf oil pools in Texas. They speak of these oil fields as mound fields differing in that respect from the pools in the interior which must be reaching and. These Mexican pields are pools are in the vicinity of sail water. The hydro static pressure which this water exerts is very great and undeubtedly explains the enormous initial europourines from some of the newly driven wells.

Sait water. The hydro static pressure which this water exerts is very great and undeubtedly explains the enormous initial europourines from some of the newly driven wells.

Sait and the production of the physical characteristics of the Mexican and the Gulf oil pools in Texas. remaining oil in the pool, or almost all of it, secured.

Like the prospecting for the discovery of precious metal mines and also like the operations of these mines after they have been discovered, oil pools which prospectors have reported favorably upon are discovered partly by chance, chiefly by the use of expert knowledge geological and other scientific experience. But the veins which at first yielded gold and silver in almost fabulous amounts have been at last entirely or partially exhausted. That is true also of copper, so that while the world is not now covered by prospectors who are searching for gold and

New York. May 9.—The market for coffee futures remained very quiet today as though waiting for the reparations situation to take more definite shape. On the whole, however, the tone was steadier owing to an improvement in Rio exchange rates, and a firmer tone in the cost and freight market, with July selling up from 6.05c to 6.14c and September from 6.45c to 6.53c. The general market opened at an advance of 2 points and closed at a net advance of nine to 13 points. May, 5.81c. July, 6.11c; September, 5.61c; October, 6.66c; December, 5.9c.; January, 7.09c; March, 7.28c.

Spot market was quiet and unchanged at 6 cents for Rio 7s and 8%c to 9%c for Santos 4s.

outpourings from some of the newly driven wells.

Salt water does reach these pools in time as fresh water reaches some of the misnd pools, but not until drilling which covers the entire mound has been completed can it be known whether the oil pool is exhausted. Water does mix with the oil causing agitation. But after a while this agitation disappears so that the pumps can be again started and the remaining oil in the pool, or almost all of it, segured.

New York Cotton.

New York Cotton.

New York May 2.—The cotton market opened steady at an advance of 3 to 6 points ou wall Street and Inverpool buying, but there was considerable New Orleans and southern selling around 13.20c for July and 13.73c for October.

This caused reactions in the absence of any general demand and the market was very quiet with prices barely steady during the early trading. July eased off to 13.65c, or about 7 points net lower.

Private cables reported a very poor spot demand.

Locally business was restricted with traders inclined to expect more or less nervousness and irregularity while awaiting a decision on the matter of war reparations.

A years ago the estimated yield was carried over. 485,000,000 bushels, with a final re-Acreage loss through abandon-ment from that seeded last fall was

improved financial situation, and they and condition was largest in Kansas. Oklahoma and Texas, the latter losing 14 points in condition, Kansas regarding dividends or falling prices 4 and Oklahoma 5 points for the Kansas has 135,888,000 month. bushels, or nearly 2,000,000 bushels

In an ordinary financial situation, the government's monthly crop report would be regarded as an important influence on all the markets.

What will be the effect of such a forecast on the price of wheat, it is difficult to say. It comes on top of an unsold surplus from the crop of 1920, greater than left over by any crop with the single exception of the "1.000,000,000 bushels harvest" of 1915. Yet, an abundant wheat crop would in any case serve to sustain our export trade and our railway traffic, and if it should turn out that the harvests of other countries were deficient, it would be recognized as a windfall of good fortune.

The Bradstreet average of commodity prices does not differ greatly in the recent movement indicated from the calculation published this week. Being a "straight average," made on a purely numerical basis and without modification, according to relative importance of the various articles, it is perhaps all the more interesting to learn that the decline from last year's highest average now works out 48 % per cent. In February, 1920, the Bradstreet average was practically 149 per cent above the first war month. To

last year out 48 % per cent. In ...

Bradstreet average was practically per cent above the first war month. To effect the readjustment which has been accomplished in a little more than one year on this occasion, a dozen years were required after our civil war. But there was no such exploitation after April, 1865, as that which began in April, 1919.

Receipts of wheat at Minneapolis were 246 cars; Duluth, 37.

Weekly report of George C. Bryant Indiana agricultural statisticion, United States Department of Agriculture.

"More than half of the corn ground is prepared and considerable seeding has been done. With favorable weather this work could be finished in two weeks. Winter wheat in low ground does not look well. Many reports of Hessian fly. chinch bugs and joint worms. Spring wheat spotted in some localities; acreage two small. Gats seeding and reseeding is completed; condition spotted. Stand thin in many nerthern counties."

Le Count wired from Caldwell, Kansas: "Heavy rain today from Bellville to Herrington from Wichita here. Soil is thoroughly soaked. Came across Kansas today via Rock Island, and from train wheat looking generally good. Eastern Kansas condition of wheat is uniformly good. Saw some spots where straw was very rank that was being lodged by rain, but this is not important."

F. S. Fessenden, agricultural statistician for Illineis, in not report to the department of agriculture avers.

ment of agriculture says:

"Plowing for corn has made slow progress during the week but is nearly completed. The acrose will probably be smaller than that of last year." Oklahoma Crops Poor.

Oklahoma Crops Poor.

Inglis writes from Oklahoma Clty:

"Over territory covered since leaving Chicago, wheat has gone back rapidly. A month ago prespects were for an early harvest; season is now about normal; cutting will commence about same time as last year; wheat has lost color, fields lok ragged; height running from 8 to 15 incress in the same fields. Stools crassy with a starming amount of the late stooling ctad. Oats in Oklahoma poor, almost hopeless. Corn has good stand but so far made little growth. Pastures through Oklahoma poor."

From constitions in northwestern North Dakota are the most favorable since 1315, the year of lagt big crop, according to a survey by the Minneapolis Tribune. Seeding operations are from 10 days to 3 weeks ahead of last year. Reports here show the soil to be in splendid condition, with the acreage of all grains, with the possible exception of wheat, being generally greater than 1920.

Bartlett-Frazier says:

"The unfavorable crop reports from Nebraska circulated this morning appear to come in the main from extreme western counties of the state and adjoining territory in Colorado. This is the semi-arid belt where dry farming is stready precarious, good crops seldom secured and the crop area relatively small."

precarious, good crops seldom secured and the crop area relatively small."

They were bought as feeders on the local market last fail, when they weighed around 448 pounds each. Yearerday the stock averaged 1.229 pounds.

'Clover Leaf camp of Royal Neighbors, will give a card party Thursday evening at Odd Fellows hall. There will be 29 table prizes and a valuable door prize.

Forced out of business sale, Milinery, Eastman Kodaks and albums Must be old by May 23 Open evenings 4817 South Twenty-fourth street, South Side.—

Adv.

M. B. Kellogg of Creighton brought in a lead of prime Hereford steers, averaging 1,492 pounds, to the local market vesterday and received the top price of \$3.65 a hundred. They were bought here two years ago as calves and Mr. Kellogg said he got a pretty good price considering the present cattle stume. News was received at the Stock Exchange building yesterday of the death of N. P. Moriensen, a veleran farmer, stockman and banker at Sweetwater Mr. Moriensen was 80 years old and had been a shipper to the local live stock market for many years.

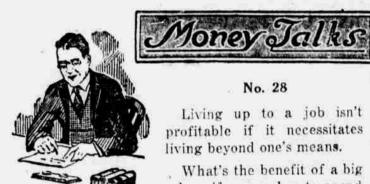

Sarah Ontman, 2, 4508 South Twenty-sixth sizect, who was seriously burned by flames from a benfire at Twenty-

They were bought as feeders on the local market last fall, when they weighed around 448 pounds each. Yesterday the stock averaged 1,229 pounds.

*Clover Leaf camp of Royal Neighbors, will give a card party Thursday evening as slawly improving. The orisis has not been reached yet and the girls recovery is problematical.

Boy Prisoner Makes Rope Of Clothing and Escapes

Pawnee City, Neb., May 9.—(Special.)—Alfred Tweedy, youthful prisoner at the county jail here, made his escape. Making a rope from his clothing, he lowered himself from the third floor of one building, where the jail is situated, to the ground. Before touching earth, his rope broke, but evidently with no disastrous results as the boy has not been seen here since. His two companion occupants did not attempt to escape. The three were arrested after breaking into a box car at

Living up to a job isn't profitable if it necessitates living beyond one's means.

What's the benefit of a big salary if a man has to spend all of it (or more) to put up a front?

Most of us learn sooner or later that financial independence isn't achieved by chasing rainbows and gathering goat

It pays better to clip coupons than to carve capons and cut capers.
