The return of Miss Mildred Rogers to Omaha after a lengthy absence is one of the interesting events of the spring social season in Omaha. During the past year Miss Rogers and her mother, Mrs. Warren Rogers, have been on an extended tour of the Oriental countries and following their return to the United States they spent several weeks in California. Mrs. Rogers and her daughter will now make their home in this city permanently. They have recently taken an apartment at the Tabouca where they are residing.

Correct Method For Washing Face
First of all—lift the muscles as you wash the face. That is, wash with all motions going upward instead of downward. Use warm water and a mild soap and always rinse in water as warm as the first you used; and in clear water—otherwise soap will stay in the skin—and then dry by a cold rinse. This does not take any more time than the slipshod method.

Some women soap the washcloth full of—well, an old sort of soap, then lather over the skin, scrubbing about and pulling and jerking at the face any old way. The natural tendency is to bear hard on the downward stroke—watch yourself when you wash the face and you will see what is meant. This pressure comes particularly around the mouth, whose corners are pulled downward. Now, all motions should be up—to raise the muscles that will sag downward soon enough after you have passed thirty years. There is no reason why face washing should not be a beauty treatment as well as a cleansing one, you know. The washing should clean and stimulate the complexion, should bring new blood to the surface and should leave the face feeling fresh and rejuvenated.

A frequent cause of skin disorder

Pimples and boils often traced to lack of vitamins in food

SKIN specialists say that we often get "danger signals from the skin" that something is wrong with our health which we may not yet be aware of.

Pimples and blackheads (acne) and boils are often the signals of a falling off in health. "A bad acne may indicate profound debility," writes a physician connected with a number of leading New York hospitals, and "the repeated occurrence of boils should always be looked upon as an indication of lowered vitality."

It has been found from actual clinical tests that "surprisingly satisfactory results" are obtained in treating these complaints with yeast.

Today yeast is everywhere recognized as a valuable "conditioner." It supplies the newly-discovered vitamins which is known to be lacking in many of our foods and thus corrects lowered vitality which is so often the underlying cause of these minor ailments.

To assure a proper amount of this health-protecting vitamin in their meals many are making Fleischmann's Yeast a part of their regular diet. Have it on the table at mealtimes where everyone can get it.

People ask: "Won't yeast when taken have the effect it has in raising bread?" No. It is highly digestible and is assimilated just like any other food. Eat it before or between meals—from one to three cakes a day.

Those who are troubled with gas should first dissolve it in boiling water. Others will like it spread on toast, bread, or crackers; dissolved in fruit-juices, milk, or water; or just plain. Place a standing order with your grocer for Fleischmann's Yeast, and get it fresh daily.

To get the valuable free booklet telling more about what yeast has done for others and can do for you, address THE FLEISCHMANN COMPANY, Dept. 98-F, 701 Washington St., New York, N. Y.

To clear the skin of pimples and boils
In 17 cases of acne (pimples and blackheads) treated in leading hospitals Fleischmann's Yeast proved to have properties of great value. Every case showed improvement or cure, taking from one week to two months.

"In many of the cases, yeast caused an improvement in the general physical condition, quite unassociated with the improvement of the symptoms in question," say the doctors who tested the yeast.

To clear up pimples and boils eat one to three cakes of yeast daily. In acute cases of pimples and all cases of boils be sure to consult your doctor.

She Had Made Her Own Clothes for Ten Years

SHE could cut, fit, drape better—make material go further—than many a professional dressmaker she knew. Of what use then, would the Deltor be to HER? Why need she bother using it at all? Then...

The DELTOR

Showed Her How Even SHE Could Save 50c to \$10

She was given a piece of material of the length the Deltor specified—startlingly less than any pattern she used ever required before. Still, she started in... confident that she could lay out her pattern as advantageously without the Deltor's use.

BUT—20—30 minutes—an HOUR passed—and still she was baffled by the problem of getting ALL her pieces within that length of goods.

THEN—she turned to her Deltor. And there, plainly, was the simple solution—a "picture-chart" that showed at a glance how the Butterick experts achieved that marvelous economy—for every width of suitable material, in her own exact size of the pattern she chose.

AND—in a few moments, she was all ready to cut—with a SUBSTANTIAL SAVING, as she admitted, over the best SHE could have done herself!

... And the Deltor Does Still MORE!

It gives you, in simple pictures that anyone can follow, the expert's way of putting the pieces together; and it whispers the secrets of that inimitable French knack of finishing every detail of the garment, so that it truly looks "Paris" rather than "home-made".

THE Deltor is now yours with every new Butterick pattern, (and only with Butterick patterns). Try the "Deltor way" of making your next dress—and you will find it a revelation of ECONOMY, plus wonderful results!
