Cold Storage To Prolong the Life of Furs

If you would keep your furs in condition; if you would get six to ten years wear out of them—as you should, if your furs are good, then it is essential to entrust them to experts for renovation and storage during the warmer months.

To Guard Against Moths and Moth Eggs.
None of the artifices commonly practiced at home will avail. Moth eggs must be removed from the fur by a thorough cleansing process such as only experts are equipped to administer.

Furs Stored in Moth Proof Vaults.
Vaults that are likewise fire and burglar proof, and in which cool, dry, filtered air is circulating—the atmosphere, in fact, is just of that nature in which fur bearing animals best thrive. Telephone for our motor to call—and there's an end of worry.
