

Paroles Granted to M. Katleman And "Red" Neal

Frank Green, Negro Convicted of Killing Wife, Also Given Freedom From State Prison.

Lincoln, May 25.—(Special)—Three paroles and one commutation of a life sentence were granted by the state prison board of pardons and paroles today out of a list of 30 applications heard last week. Morris Katleman and "Red" Neal, sentenced from Omaha to one to seven years in the state penitentiary for aiding and abetting automobile thefts, were given paroles. They were the parolees by the board last winter.

Attorney General Davis filed a dissenting opinion.

Law Not Satisfied.

Neal and Katleman, who have been in prison a little over a year, have not served time enough to satisfy the law and public opinion, the attorney general held in his dissenting opinion.

Present times are such, he declared, that it behooves exceeding care not to create in the minds of the people that the state is not at all times able and ready to punish the guilty.

In announcing the decision of the board to parole Neal and Katleman Governor McKelvie, chairman, pointed out these two men have been model prisoners at the prison and that there were no objections offered the board at the hearing last week against granting the applications.

Frank O. Green, 36, negro, serving life sentence for the murder of his wife in 1914, was granted a commutation to 15 years by the board on the recommendation of officials of the Omaha National bank, where Green worked as a night watchman.

Testimony at the hearing last Tuesday was that Green killed his wife while intoxicated and enraged at her alleged infidelity. When questioned by the board at the hearing Green declined to attack his dead wife's character, declaring "she is not here to defend herself."

Youth Is Paroled.

Charles H. Brown, 21, serving three to 15 years for burglary on the South Side, in Omaha, was granted a parole, to be effective as soon as suitable arrangements can be made. His parole was recommended by H. C. Murphy, South Side attorney, who appeared at the hearing last week in behalf of the youth's mother, who is a washerwoman who works for the attorney's family.

The application of Ernest Kenniston, 53, the oldest inmate of the state prison, sent up for the murder of Sax Cox, Minatare, Neb., newspaper man in the early days, was denied.

Third Application.

Kenniston entered the penitentiary in 1906 and has but three more years to serve. Kenniston was a hotel owner in Minatare at the time of the murder and shot Cox during an argument over prohibition. This was his third application before the pardons board.

Other applications which were denied follow:

Harry Miller, Douglas county, serving one to 20 years for forgery; Martin Cunningham, three to 15, robbery; Clyde Dewey, one of five, passing no fund checks; Ray Hawn, one to seven, grand larceny; John McCarthy, one to 10, breaking and entering; John J. Reynolds, one to 10, stealing and receiving stolen automobiles, and Charles Stevens, one to 10, breaking and entering.

Milton F. Logan and Stephen Cornell, serving five and six years' terms, respectively, for statutory offenses, were denied paroles by the governor.

Continued Heat Of Last 5 Days Tops May Record

Longest Stretch of Sweltering Heat in May in History of Federal Weather Bureau.

All May heat records have been shattered by continued high temperatures of the last five days.

Weatherman Robins of the federal bureau was unable to find any record of temperatures ranging 90 degrees or above for five successive days in May of any year.

Moreover, he was unable to forecast any relief for heat-ridden Omaha.

At 10 a. m. yesterday the temperature was 77 degrees above and the maximum was 92 at 2 p. m. Heavy thunder showers late in the day cooled the atmosphere slightly.

The heat wave which has held the city in its torrid grip started Friday, with a high temperature of 92 above zero. The minimum temperature on Friday was 68.

Saturday the mercury rose to 90 above, with a minimum of 70, Sunday 92 maximum and 7 minimum, Monday 92 and 75 and Tuesday 91 and 73.

Although the continued heat has

broken all records the high temperature for a single day has broken no May records. Back on May 14, 1917, the mercury rose to 96 degrees above, the highest temperature for that entire summer.

Good rains throughout the north-eastern and central parts of the state occurred Tuesday night, according to reports to the federal bureau, and although temperatures have been high throughout the state there is no sign of drouth, according to Mr. Robins.
