Polarine

MOTOR

OILS

One method of cutting motoring costs

Low grade oil, or oil of unsuitable body, is the direct cause of fully ninety per cent of all overhauling, repair and re-placement costs. It is also frequently responsible for the low mileage many an automobilist complains of and blames on his gasoline.

Finding just the correct lubricating oil for your engine will save you a lot of expense and bother.

Polarine is the highest quality motor oil you can buy. Its stability under high engine heat provides a fuel-tight and gas-tight seal in the cylinders which insures maximum power and mileage from gasoline. Its smooth, continuous film protects bearings and engaging parts against wear, vibration and breakage.

Polarine is made in four grades-light, medium heavy, heavy and extra heavy-but only one quality. Get the proper grade for your car next time you buy clean-burning Red Crown Gasoline-and you will start cutting down motoring costs.
