I walked up to him, touched my hat, which I understood was the way to do when addressing a New York policeman, and asked him where was Broadway. Polarine MOTOR OILS

Your guarantee of engine power and engine protection

Lubricating oil has a double duty. It must maintain a fuel-tight and gas-tight seal between the piston rings and the cylinder walls-otherwise fuel and the explosive gases are not completely converted into useful power. Fuel is wasted and you get less power.

It must maintain a smooth, cushioning film in all bearings and between all engaging parts otherwise bearings burn out, parts wear loose, vibration becomes excessive, breakage and expensive repairs and replacements become necessary.

Polarine is the perfected lubricating oil of the world's largest and most experienced manufacturer of oils for all purposes. It maintains its body and lubricating qualities under extremes of temperature and operating conditions. It is your best and safest guarantee of both engine power and engine protection.

Polarine is made in four grades-light, medium heavy, heavy and extra heavy-but only one quality. Get the proper grade for your car next time you buy clean-burning Red Crown Gasoline-and you will start cutting down motoring costs.
