THINKING OF HOME AND MOTHER

CHAPTER V.

A Light in the Dark Chirpy Cricket preferred the dark to the day. He was different from Jennie Junebug and Mehitable Moth, who dearly loved a light at night.

and would dash joyously into any

There was only one light that Chirpy Cricket was always glad to see. He thought Freddie Firefly's flashes looked very cheerful as they twinkled about the farmyard. And he often told Freddie that he would be willing to linger above ground in the daytime now and then, if only Freddie would stay with him and make merry with his light. But Freddie Firtfly knew enough

to decline the invitation. He was well aware that nobody could see his light when the sun was shining. And he was afraid that other merrymakers in the farmyard might make matters far from merry for him. For Freddie Firefly feared all birds. At night he used his trusty light to frighten Mr. Nighthawk or Willie Whip-poor-will. But he didn't intend to run any risk in the daytime, with Jolly Robin or Rusty Wren.

Chirpy Cricket soon saw that it was useless to try to get Freddie Firefly to enjoy an outing with him by daylight. So every night he spent as much time as he could in Freddie's company.

If the truth were known, Chirpy Cricket wished that he had a light of

his own. And he couldn't help hop-

"Will you loan me your light?" Chirpy asked him.

ing that sooner or later Freddie Firefly would offer to lend him his. Night after night the two met in the farmyard. But nothing seemed further from Freddie Firefly's thoughts than lending his brilliant greenish-white light to Chirpy Cricket, or to any one else.

But Chirpy simply couldn't keep his eyes off that wonderful flash-light when Freddig Firetly was in the neighborhood. People began to notice that he even stoppe sometimes, to stare at Freddie Fire

At last Chirpy Cricket made up his mind that if he was ever going to borrow the light he would have to ask Freddie for it. Several nights passed before he could think of a good reason for using it. But after while he thought or a fine one. So he went straight to Freddie Firefly "I'm going to see Miss Christabel Cricket home after the music is over tonight." Chirpy said, "and I've been wondering if you'd be willing to do me a favor."

"Why, certainly!" Freddic Firefly

"Will you loan me your light?" hirpy asked him. "You know there'll be no moon when it's time to go home. And your light would be a great help to me, for Miss Christabel lives beyond the barnyard fence."

For just a few moments Freddy Firefly apptared greatly surprised. To tell the truth. Chirpy's request almost took his breath away. And while he recovered himself he forgot to flash his light—a most unusual oversight. But Freddie was no persons to dis-

appoint a friend. Besides, he had just said, "Why, certaianly!" Really, there was nothing for him to do but to say the same thing. (Copyright, Grosset & Dunlap.)

WHY-

Does Fertilizing Plants Make Them Grow Better?

What we know as "growth"whether in plants or in human beings as the increase in size and strength due to the assimilation of certain products which are converted into the substance of the growing object itself. In the case of children, for example, bread and milk and potatoes, coupled with other foods which go to make up the bone and muscle tissues, result in a steady cure, but in some localities only is the date of May 1 mentioned. the same with plants.

upon them that increasing the healthy diet of children would have.

Ward the rising sun.

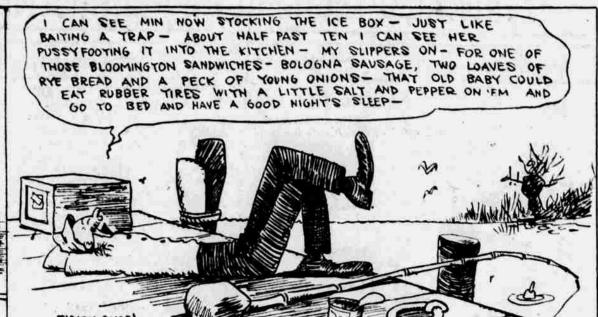

This superstition is a mixture of The plants thrive better, grow survivals of tree-worship, sun-worship and more fruit. Fertilizer, therefore, is nothing more than "plant food," providing an extra amount of substances in which the surrounding earth may be deficient and giving earth may be deficient and giving than they god. Then there is the mystic rowan so closely identified with the true ash, the Norseman's tree of life. The child is passed through toward the rising sun thus being dedicated to the sunthe plants more nutrition than they allow to secure from the ground alone. But, just as different children need different types of food, so also do various types of plants require fertilizers containing varying forms of nutriment. Sweet peas, for example, should not be treated with the same fertilizers used for asters the same dedicated to the sungod. Then there is the passing of the child through a narrow opening in the sides of which, it is hoped, his affliction will become entangled and detached from his body.

In this book, "The Evil Eye," El-worthy cites this superstition as one of the many which refute those who doubt that idolatery still persists. example, should not be treated with the same fertilizers used for asters or dahlias, while beans require different handling than corn or wheat. Modern science has made great strides in discovering just what strides in discovering just what strides fertilizers are best suited to the different types of plant life and, the different types of plant life and, as a result, crops are now being raised in soil which was formerly considered good for nothing at all. Romance in Origin Of Superstitions

By H. I. KING. The Split Rowan.

In northern New England and in he Maritime Provinces of Canada a popular cure for a child suffering from congenital hernia is to pass it nine times through a split mountain ash (rowan) tree. This must be done at sunrise and some say that the operation must be performed in the presence of the parents and up-on the morning of May 1. In some sections it is believed that if a person cured in this manner afterwards sits by a fire in which mountain ash is burning he will feel great

This superstition exists in this country in almost the exact form in which it exists in rural England, where it has been known from the earliest days reached by tradition. The number of times which the child should be passed through the split tree varies in different locali-ties and in England the true ash is the designated tree. Sunrise is always designated for the time of the

The latter, of course, draw their food from the ground around them by means of their leaves. Increasing the split so that it runs east and west ing this food has the same effect and the child passed through it to

Jewel, Flower, Color Symbols for Today

By MILDRED MARSHALL. The turquoise is today's talismanic gem. In the far east it was looked upon as a lucky stone for those who dealt in any business in which horses were concerned, and so it has come down to us as a talisman for those engaged in horse racing or trading. The turquoise was also credited with power to protect its wearer from accident. Today's natal stone is the load-

stone, which attracts all good things to its wearer. It was believed by the ancients to be particularly potent in attracting love. Green is today's lucky color, par-

ticularly for those who are discouraged or sad, since it is symbolic

Today's flower is the red geranium, which should be chosen if one is making a gift to one who is ill or in distress, since it is symbolic of good cheer and happiness. (Copyright, 1921, Wheeler Syndicate, Inc.)

Common Sense

By J. J. MUNDY. Some Men Hate Changes.

When a wife makes a practise of changing articles of furniture in the room in which her husband spends most of his time, shifting the chairs, couch and desk from the places he is accustomed to finding them, there

is trouble ahead.

Most men dislike to have changes in their homes. They want to find the ash tray in the same place every night. The chair they use is never right if it is moved to another location or

if coming from another direction.
Wives like changes; they get tired dusted off things. seeing the same old things in the Copyright, 1821, George Matthew Adams same old places all the time. things from place to place in the opened to women.

Parents' Problems

Should a child be permitted of the place he will occupy as soon have a canary bird?
as the evening meal is over.

A child might be permitted to have a canary bird, provided the fact that such a bird depends for its life and happiness upon living in captivity be perfectly understood. Better, however, than a canary bird, would be an interest in, and an acquaintance with the birds seen in the fields and woods, or even on the sidewalks. A child will eventually have much more fellowship with birds by watching many at liberty

than by owning one in a cage.
