Disease Becoming Prevalent Among Indians—Three Stages of Disease Described.

Oklahoma City, Okl., Aug. 2.—More than 400 cases of pellagra in Oklahoma were today reported to Dr. A. R. Lewis, state health commissioner. Tonight he said he would not minimize the danger in Oklahoma from the disease and said he was sure there were from 500 to 600 cases in the state. He planned to attend a Washington conference on pellagra conditions in the south.

The disease is becoming prevalent among the Indians, according to the health commissioner, especially among the women, who stay at home much of the time and live principally on corn bread and salt pork. The men spend much time in towns where they eat various foods and thus escape pellagra, according to the commissioner.

Many of the afflicted persons have not been treated by physicians, Dr. Lewis said, because pellagra appears much as sun burn and victims are in the secondary stage before the cases are diagnosed.

It is of prime importance that the appearance of sun burned spots should be protected immediately from the sun, the commissioner said, as only in this manner can they be kept from becoming sores that lead to the secondary stage. It also is of the greatest importance that the diet be changed to nutritious food and that the patient be well nourished.

The three stages of the disease were described tonight as follows:

Primary—Appearance of sun burn on hands and face and exposed parts of body, followed by sores that become worse gradually. Interior of mouth, gums and tongue become tender.

Secondary—Stomach disturbed, food repulsive.

Final—Mental trouble; melancholy, insanity or death.

### Harlan Pastor Claims to Effect Cures by Prayer

Says Cripples Walk, Blind See And Deaf Hear at Meetings In Duluth; Will Visit Nebraska.

Harlan, Ia., Aug. 2.—(Special.)—Reports have reached here of the miraculous cures through the power of prayer credited to Rev. P. C. Nelson, Harlan evangelist. He is concluding a successful series of meetings, attended by many remarkable cures, in Duluth. He goes next to Toronto and from there to Oakland, Neb. He will visit in Harlan on his way to his Nebraska engagement.

The stories of the healings performed by Evangelist Nelson read like fiction. He describes many of them in a letter to a friend here. He tells of the lame throwing away their crutches, the blind being made to see and the deaf and mute to hear and talk. Similar cures through prayer are not uncommon with other evangelists, declares the Rev. Mr. Nelson.

At Spearman, Tex., people suffering with bodily ailments came as far as 800 miles to receive his prayers. Miraculous cures followed. At Enid, Okla., he offered prayers for 275 in a single day. Many left their crutches and walked from the church, apparently cured. Thirteen deaf mutes were cured at Kansas City as the result of the Harlan man's prayers, he declares. A man brought to the church in an ambulance was able to walk to an automobile.

At Duluth a woman who had been blind for 20 years was given back her sight. A lad of 12, blind since a babe 10 days old, had his sight restored.

### Fire That Destroyed Barn Believed to Have Been Incendiary

Grand Island, Neb., Aug. 2.—(Special.)—While no proof is so far available, it is believed that the origin of the fire which destroyed a large barn and contents on the ranch of Robert Taylor, near Elsie, in the northwestern part of the state, may have been incendiary.

There had been a dispute with some of the transient help employed from time to time about wages. Five dollars a day, it is said, was demanded, while under the present low prices for most farm products, only \$3 a day and board could be offered.

Suspicion is aroused because the upper portion of the barn—it was an immense structure, covering two acres—had such a large area ablaze in so short a time, regardless of the fact that 150 tons of hay were stored in it. The barn at the time also contained five automobiles, one large truck, numerous sets of harness and a team of fine horses, all of which were burned. It was the main barn for a ranch comprising 42 sections of land.
