

What the 2A Brownies do

All of the pictures on this page are reproduced *in the exact size* from negatives made with 2A Brownies on Kodak Film.

What You Can Do with a Brownie

The pictures really tell, better than words, just what anybody can do with a Brownie. It is a very simple little camera, yet it is fully equipped for snap-shots out-of-doors, for time exposures indoors or out, for flashlights and home portraiture. It can, with the aid of a seventy-five cent Kodak Portrait Attachment make delightful "close-ups," as the picture of Mary Louise in the upper left-hand corner amply proves. And it's all very easy.

There are Brownies in several sizes, but this is about the 2A Brownie in particular. It makes pictures 2½ x 4¼ inches, has a meniscus achromatic lens, a rotary self-setting shutter, has three stops (diaphragms) and two finders—one for vertical and one for horizontal exposures. It requires no focusing and loads in daylight with Kodak Film Cartridges of six or twelve exposures. It is covered with a fine imitation grain leather with metal parts finished in nickel and black enamel.
